Preface
Editors Biographies
Program Organizers
Aluminum Committee
Experimental Study of the Dissolution of Aluminum Phases as a Function of Temperature, Caustic Concentration and Additives
The Manufacture of Tricalcium Aluminate
Overview of the Behaviour of Sodium Oxalate in Bayer Liquor and its Effect of the Process
Sodium Aluminosilicate Scale Formation on Steel Substrates: Experimental Design and Assessment of Fouling Behaviour
Effects of Temperature and Method of Solution Preparation on the Performance of a Typical Red Mud Flocculent
Mixer Design Optimization for High Solids Contents Media: Methodology and Application to the Pechiney's High Density Predesilication Process
Application of Theory on Systematic Energy Saving in Process of Alumina Production
Water Conservation in Alumina Refinery Plant
Effect of Temperature on the Agglomeration of Hydrate
Crystallisation Rate Behaviour of Aluminium Hydroxide as a Function of Solution Concentrations
Preparation of Nanosized Alumina Powder by Phase Transfer
A Method for Evaluating Seed Balance Parameters in Alumina Refinery Seed Classifications Systems
Research on the Mechanism and Optimum Adding Method of Additives in Seed Precipitation
Evaluation of Superfine Particles in the Precipitation Circuit Agglomeration Phase
Influence of Bayer Liquor Composition on the Measurement of Slurry Velocity Using an Electrochemical Flowmeter
A Fractal Model for the Aggregate Size Distributions Generated During Red Mud Flocculation
Effect of Organics on the Separating Efficiency of Flocculates in Red Mud Sedimentation
Settling Properties and Utilization of Red Mud Produced in Bayer Process with an Excessive Addition Lime
Conversion of Conventional Wet Disposal of Red Mud into Thickened Tailing Disposal (TTD) at Nalco Alumina Refinery, Damanjodi
Experience with Thickened Disposal of Red Mud
New Salicylic Acid Containing Red Mud Flocculants
Recent Innovations in Controlling Dust Emissions in the Bauxite/Alumina Industry
Improvements of the Processes to Produce Alumina from Chinese Diasporic Bauxite
Investigation of New Digesting Technology of Diaspore
Bayer Process Chemical Calculations "A Systematic Approach"
The Influence of K$_2$O in Spent Liquor on Bayer Process of Diasporic Bauxite
Processing of Aluminum Ores and Human Safety
The Dunkirk Smelter, from 216 to 257 kt/Year Through 10 Years of Technology Creeping and Continuous Improvement

The Affect of Pot Operation and Work Practices on Gaseous and Particulate Fluoride Evolution

Effect of Open Holes in the Crust on Gaseous Fluoride Evolution from Pots

In-Plant PFC Monitoring: Technology Options and Performance Concerns

Tunable Laser Diode Technology for Continuous HF Monitoring in Potrooms

A Streamlined, Portable Mid-IR TDL Based System for On-Site Monitoring of PFC's from Potroom Exhaust Ducts

Protocol for Measurement of Tetrafluoromethane and Hexafluoromethane from Primary Aluminum Production

Measuring, Reporting and Verifying Greenhouse Gas Emissions from Aluminum Reduction Operations

PFC Emissions Measurement from Aluminium Pechiney Smelters

An Analytical Model for Cathode Voltage Drop in Aluminum Reduction Cells

Start-Cuve: Thermo-Electro-Mechanical Transient Simulation Applied to Electrical Preheating of a Hall-Heroult Cell

Performing Fast Trend Analysis on Cell Key Design Parameters

Modeling of the Coke Bed Used in the Electrical Preheat of an Aluminum Reduction Cell

Effects of Ambient Temperature and Ventilation on Shell Temperature, Heat Balance and Side Ledge of an Alumina Reduction Cell

Minimization of Outward Wall Deformation of Cathode Casing Steel Structure During Operation

Thermo-Chemo-Mechanical Aspects of Refractory Concrete Used in a Hall-Heroult Cell

In-Situ Observations of Frozen Electrolyte in Laboratory Reduction Cells

Error Analysis in the Measurement of Current Efficiency in Hall-Heroult Cells - Part I: Background Development

Error Analysis in the Measurement of Current Efficiency in Hall-Heroult Cells - Part II: Applications and Results

Characterization of the Fluctuation in Anode Current Density and "Bubble Events" in Industrial Reduction Cells

Field Study of the Anodic Overvoltage in Prebaked Anode Cells

Addition of Refractories from Spent Potlining to Alumina Reduction Cells to Produce Al-Si Alloys

An Improved Method for Removing Light Metals from Molten Aluminum in a Reduction Plant

Anode Reaction in Aluminium Electrolysis Prior to and During Anode Effect

Technique and Mechanism of Aluminum Floating Electrolysis in Molten Heavy Na[subscript 3]AlF[subscript 6]-AlF[subscript 3]-BaF[subscript 2]-CaF[subscript 2] Bath System

Research on the Instabilities in the Aluminum Electrolysis Cell

Process Modelling as a Key Factor in AP14 Retrofit at Aluminij D.D. Mostar

The 3D Modeling of MHD-Stability of Aluminum Reduction Cells

Twenty Years of Progress at Hindalco's Aluminium Smelter
Conversion of the AP 14 Potline at Aluminij D.D. Mostar from Side to Point Feeding p. 387

Aluminum Carbothermic Technology Comparison to Hall-Heroult Process p. 395
Aluminum Carbothermic Technology Alcoa-Elkem Advanced Reactor Processes p. 401
Modeling of Solubility of NiO/NiAl$^{[2]}O^{[4]}$ and FeO/FeAl$^{[2]}O^{[4]}$ in Cryolite Melts p. 415
Aluminum Fluoride Control Strategy Improvement p. 425
Noise Classification in the Aluminum Reduction Process p. 431
Neural Network Qualifier of Noises of Aluminium Reduction Cell p. 437
Analysis and Correction of Heat Balance Issues in Aluminum Reduction Cells p. 441
Increased Current Efficiency and Reduced Energy Consumption at the Trimet Smelter Essen Using 9 Box Matrix Control p. 449
Estimation of a Technological Condition of the Aluminium Reduction Cells on the Basis of Its Daily Energy Balance p. 457
A Supervision System for Aluminum Reduction Cell p. 463
Stakeholder Engagement Process in the EIA of an Aluminium Smelter p. 471
A New Anode Effect Quenching Procedure p. 479
HF Emission from Dubal's Electrolysis Cell p. 487
Formulation, Structure and Properties of Carbon Anodes from Coal-Tar Pitch/Petroleum Pitch Blends p. 495
Precise Measurement of Density of Coal Tar Oil and Liquid Binder Pitch p. 503
Worldwide Pitch Quality for Prebaked Anodes p. 509
Change of Focus: Use of Refinery Simulation Tools for Coke Quality Related Predictions p. 519

Importance of Granulometry in Calcined Petroleum Coke p. 525
Classification of Pores in Prebake Anodes Using Automated Optical Microscopy p. 531
Anode Quality Improvements at the Valesul Smelter p. 535
Drilling of Stub Holes in Prebake Anodes p. 541
The New AP-FCBA Paste Plant Technology p. 547
Alcan Alma New Anode Paste Plant Start-Up and Early Operation p. 555
New Plant for Anode Paste Conditioning and Anode Pressing with a Hydraulic Vacuum Press p. 561
Paste Granulometry and Soderberg Anode Properties p. 569
Production Technology Development of Carbon Materials for Aluminum Electrolysis in China p. 575
Exhaustion, Pneumatic Conveyor and Storage of Carbonaceous Waste Materials p. 583
The Impact of the Firing and Control System on the Efficiency of the Baking Process p. 589

Creep and Sodium Expansion in a Semigraphitic Cathode Carbon p. 595
Modelling of Thermal and Sodium Expansion in Prebaked Aluminum Reduction Cells p. 603
Reactivity of Carbon Materials Against Metallic Sodium p. 611
Comparative Characterisation of Graphitized and Graphitic Cathode Blocks p. 617
Operational Changes in Carbon Cathode of Aluminum Cell p. 627
Mechanical Behavior of Carbon Cathode: Understanding, Modeling and Identification  p. 633

Performance of Graphitized Carbon Cathode Blocks  p. 641
Improvement of Abrasion Resistance of Graphitized Cathode Block for Aluminum Reduction Cells  p. 647
Laboratory Test Method for Measuring Wear Rates of Carbon Cathode Materials  p. 655
A New Technology for Cathode Rodding Used in Aluminium Electrolytic Cells  p. 661
Electrical Resistance of Aluminum-Steel Electric Transition Joints vs Time and Temperature  p. 669
The Aluminum Industry's Efforts to Prevent Molten Metal Explosions  p. 679
Melting Safety for Aluminum Processing Facilities  p. 683
Cause and Prevention of Explosions Involving Hot-Top Casting of Aluminum Extrusion Ingot  p. 687
Evaluating RSI Sows for Safe Charging into Molten Metal  p. 695
Investigating Molten Aluminum Explosions  p. 701
Industry Research Efforts to Identify FR Fabrics for Molten Aluminum Environments  p. 705
Measurement of the Onset of Hot Cracking in DC Cast Billets  p. 711
The Influence of Caster Roll Diameter on the Microstructure of Twin Roll Cast Aluminum Strip  p. 719
Improved VDC Billet Casting Mould for AL-SN Alloys  p. 725
Influence Parameters on Continuous Casting of Aluminium  p. 733
Casthouse Modifications for Improved Slab Quality  p. 741
Simulation of Solidification Process Used in Twin Roll Casting  p. 747
Evaluation of Mechanical and Non-Mechanical Hot Tearing Criteria for DC Casting of an Aluminum Alloy  p. 753
Permeability of the Mushy Zone in Aluminum Alloys: Evaluation of Different Approaches  p. 759
Secondary Aluminum Melting Research in a Laboratory Scale Reverberatory Furnace  p. 769
The Effect of Solidification Defect on the Dross Formation During Re-Melting of Aluminum 5182 Alloy RSI  p. 773
Refractory Requirements for Aluminum Casthouses, More Informative Product Datasheets for Materials Selections  p. 779
The Behavior of Selenium Impurities During the Alloying of Aluminum with Magnanese Additions  p. 787
DC Casting - Mathematical Modeling to Optimize the Running Cost of a Casthouse  p. 795
Aluminium Melting and Dross Formation - A Historical and Modern Perspective of the Situation  p. 801
Large Capacity Melting System  p. 809
Modelling of Fluid Flow Phenomena During DC Casting of Aluminium Alloys  p. 815
Detailed Modeling of a Metal Distributor by Means of a Combined Numerical and Physical Approach  p. 821
Effect of Water Quality and Water Type on the Heat Transfer in DC Casting  p. 829
Thermomechanical Analysis of the DC Casting Process for AA5182 Billets - Comparison  p. 835
Solid State Constitutive Laws on Model Predictions of Strain and Butt Curl
Mathematical Modelling of Water Ejection and Water Incursion During the Start-Up Phase of the DC Casting Process p. 841
Study of Aluminum Degassing by Hydrogen Analysis with Supersonic Expansion Mass Spectrometry p. 851
Investigation of Inclusion Re-Entrainment During Filtration p. 873
Aerospace Alloy Refining Efficiency Data for Lars (Lars: Liquid Aluminum Refining System) p. 881
Recent Experiences with the Use of SiO$_2$ for Removing of Magnesium from Molten Aluminum Alloys p. 885
Computer Simulations for the Removal of Solid Particles from Molten Aluminum in the Rotating Impeller Degasser p. 893
Physical Modeling of the Aluminum Degassing Process: Experimental and Mathematical Approaches p. 901
Measurement of Bubble Dispersion and Other Bubble Parameters in a Gas Fluxing Unit at Alcoa Using a Capacitance Probe p. 909
Grain Refinement of Secondary Aluminium-Silicon Casting Alloys p. 917
Characterisation of a New Generation of Grain Refiners for the Foundry Industry p. 923
Modeling of Microporosity Formation During Solidification of A356 Aluminum Casting p. 929
Microstructure Evaluation and Microporosity Formation in AlSi7Mg 0.3 Alloys p. 937
Growth-Restriction Effects in Grain Refinement of Aluminium p. 945
A Comparison of the Family of AlTiB Refiners and their Ability to Achieve a Fully Equiaxed Grain Structure in DC Casting p. 953
Effects of Grain Refining on the Type and Morphology of Intermetallic Phases in Unalloyed Aluminium p. 961
Effects of Hydrogen, Solidification Rate, and Ca on Porosity Formation in As-Cast Aluminum Alloy A356 p. 971
Optimal Heat Treatment of A356.2 Alloy p. 983
