Gamma TiAl and the engine exhaust valve p. 3
First production results from a prototype plant for mass production of [gamma] TiAl-valves p. 9
Accelerated insertion of materials : gamma alloys pose challenges, but are really not unique p. 15
Titanium aluminides for automotive applications p. 23
The development of sheet gamma TiAl technology under the enabling propulsion materials/high speed civil transport (EPM/HSCT) program p. 33
Equilibrium of multi-phase gamma alloys : a quantitative approach based on site occupancies of alloying additions p. 49
Deformation twins - their nucleation and development in TiAl p. 57
Suppression of the massive transformation in a Ti-48 at. % Al alloy : a direct consequence of the oxygen induced chemical ordering of the [alpha]-phase p. 63
Thermo-physical properties of a Ti-44Al-8Nb-1B alloy in the solid and molten conditions p. 75
The effect of processing and porosity on the elastic moduli of gamma-TiAl p. 83
An investigation of microstructure formation during solidification of gamma titanium aluminide alloys p. 89
Effects of added interstitial elements in ternary Ti-Al-Cr and quaternary Ti-Al-Cr-Nb p. 97
Evolution of the microstructure of two Nb-containing [gamma]-TiAl alloys with different heat treatments p. 105
Temperature dependence of compressive behavior in aluminum-titanium-vanadium ternary alloys containing gamma and beta grains p. 113
Crystallographic considerations for lamellar orientation control of Ti-48Al PST crystal p. 121
TEM and HRTEM investigation of intragranular lamellar structures formation in a Ti-48 at. % Al alloy p. 127
Recent developments of TiAl alloys towards improved high-temperature capability p. 139
High temperature intermetallic alloy based on a new intermetallic compound [gamma][subscript 1] in the TiAl+Nb system p. 153
Microstructure control using [beta]-titanium phase for wrought gamma TiAl based alloys p. 165
High temperature properties of TiAl alloys produced by elemental powder metallurgy p. 177
Processing, microstructure and mechanical properties of directionally solidified TiAl based alloy reinforced by Al[subscript 2]O[subscript 3][subscript 3] particles p. 185
Development of a hot forged TiAl alloy and manufacturing of components p. 199
Microstructure and mechanical properties of extruded gamma met PX p. 207
TiAl G4 : investment cast processing and mechanical properties p. 213
Microstructures & properties of extruded TiAl-Nb-W alloys p. 219
Melting and casting of gamma titanium aluminide ingots p. 227
Powder metallurgy processing of gamma titanium aluminide p. 233
Status and prospects of [gamma] - TiAl ingot production p. 241
Powder production techniques and PM processing routes for gamma titanium aluminides p. 249
An innovative method for manufacturing $\gamma$-TiAl foil

"Low-temperature" sheet rolling of $\gamma$-[alpha]$_2$ titanium aluminides: approach and implementation

Texture formation in $\gamma$-TiAl sheets

Effect of rolling strain on the processing of $\gamma$-titanium aluminides by roll bonding and reaction annealing

Near-$\gamma$ TiAl investment casting and its optimization

Processing, microstructure and tensile properties of $\gamma$-TiAl PM alloy 395MM

Synthesis of nano-crystalline $\gamma$-TiAl materials

Thermomechanical processing and tensile mechanical properties of $\beta$-solidifying $\gamma$-[alpha]$_2$-$\gamma$-[alpha]$_3$ alloys

Processing of gamma-based TiAl alloys by torsional deformation

Cost-effective production of powder metallurgy gamma titanium aluminide composite plate

Cost-effective TiAl-based materials

Development of cost-effective technique for sheet rolling of $\gamma$-TiAl based alloys

Synthesis of gamma-TiAl/[alpha]$_2$O_[alpha]$_3$ in-situ composites

Processing and properties of TiAl alloy manufactured with MA-PDS process

Elementary deformation mechanisms during creep of TiAl alloys at 750[degrees]C

Investigation of $\alpha_2$ to $\gamma$ phase transformation controlling the creep deformation rate in lamellar TiAl intermetallics

Influence of different texture aspects on creep properties of a fully lamellar Ti-47Al-2Cr-2Nb alloy

Microstructural modification for enhanced creep resistance in XD TiAl alloys

Strength properties of a precipitation hardened high niobium containing titanium aluminate alloy

The effect of Mo and Al content on the creep deformation of Ti-48Al-2Cr-2Nb-xMo titanium aluminides

Characterization of gamma-TiAl castings for engine blade components

Creep behavior and microstructural changes during short-term creep in a $\gamma$-TiAl based alloy with fully lamellar microstructure

Creep in $\gamma$-TiAl sheet material with a high niobium content

$\alpha_2$ decomposition and H-carbide/zeta-silicide precipitate evolution in precipitation strengthened Fe-$\gamma$-TiAl

The effect of long time elevated temperature exposure on the microstructure and creep behavior of Ti-48Al-2Cr2Nb-xMo titanium aluminide

High temperature internal friction on Nb-containing $\gamma$-TiAl alloys

Effect of microstructure on thermal stability and mechanical properties of an engineering $\gamma$-TiAl based alloy during long-term exposure at 700[degrees]C and 800[degrees]C in air

Strain ageing in $\alpha_2$-[alpha]$_2$-[alpha]$_3$-[gamma]-based titanium aluminides

Durability assessment of various gamma TiAl alloys

Fatigue properties of a Ti-48Al-2Cr-2Nb alloy produced by casting and powder metallurgy
Micromechanical modeling of deformation and fracture in Lamellar gamma-TiAl alloys  p. 493

Studies of twin activity at crack tips in near-gamma tial using electron channeling contrast imaging  p. 503

Mechanical surface treatments for enhancing fatigue performance of gamma titanium aluminides at ambient and elevated temperatures  p. 509

The influence of microstructure and surface residual stresses on pre-yield cracking in TiAl alloys  p. 517

Fracture processes, fracture resistance and fatigue crack propagation in gamma TiAl  p. 521

Preliminary results on damage tolerance in fatigue tests of [gamma]-TiAl valves  p. 531

Oxidation resistance of [gamma]-TiAl based alloys in a simulated combustion atmosphere  p. 541

Environmental protection of gamma titanium aluminides  p. 551

The oxidation behavior of engineering gamma TiAl alloys  p. 559

Synthesis and characterisation of oxidation resistant coating for gamma TiAl  p. 567

The effect of copper on the cyclic oxidation of Ti-48Al-2Cr-2Nb  p. 575

The effect of water vapor on the oxidation behavior of [gamma]-TiAl-Ag coatings at 800[degrees]C in air  p. 579

Effect of Ta and Zr additions on the oxidation characteristics of Ti-44Al-xNb alloys  p. 585

Microstructural aspects of diffusion bonding of high niobium containing gamma TiAl-based alloys  p. 591

Validation of a realistic model for studying the effect of welding parameters on GTA welding of gamma titanium aluminide  p. 601

Transient liquid phase joining of gamma met PX  p. 605

A microstructural study of the fusion zone of gas tungsten arc welded gamma titanium aluminide  p. 613

Joining of sheet based titanium aluminide products  p. 619
