Use of CO$_2$-snow for protecting molten magnesium from oxidation
Solid oxide membrane (SOM) for cost effective and environmentally sound production of magnesium directly from magnesium oxide
Wear testing of inert graphite anodes for magnesium production
Pilot experiments of magnesia direct electrolysis in a 5kA magnesium reduction cell

Electrochemical co-deposition of magnesium-aluminum alloys in alkali chloride melt

Thermal properties of electrolytic magnesium production feed
Protecting liquid Mg by solid CO$_2$ : new ways to avoid SF$_6$ and SO$_2$
Life cycle environmental impact of magnesium automotive components
Mg[OH]Cl.2H$_2$O chlorination
Magnesium wrought alloy properties of the AZ-series
Large profile magnesium alloy extrusions for automotive applications
Microstructure refinement of magnesium alloy (AZ31) through a combination of extrusion and room temperature equal channel angular process
Measuring the temperature dependence of the flow surface of magnesium alloy sheet

High strength wrought magnesium alloys by employing grain-refined powder
Microstructure control of AZ31 alloy processed by different-speeds-rolling
Effect of strontium on the microstructure and mechanical properties of AZ31 magnesium alloy
Grain refinement of wrought AZ61 magnesium alloy
Castability of magnesium alloys
Effect of heat-treatment on microstructure and strength of quasicrystal-containing extruded Mg-Zn-Y alloys
Phase transformation and creep of Mg-Al-Ca based die-cast alloys
Grain-refining of Mg alloys by nanoscaled TiN particles
Solidification and microstructure of Mg-Al-(Ca,Sr,Ce,La) ternary alloys
The assimilation kinetics of manganese aluminum compacts into liquid magnesium
Numerical simulations of radiative heat transfer between high-temperature fluidized beds and magnesium castings
Scale-up of magnesium new rheocasting from a laboratory level to an industrial process

Microstructural evolution during severe deformation of AZ31 magnesium alloy under non-isothermal processing conditions
Bendability and microstructure of magnesium alloy tubes at room and elevated temperatures
An internal variable approach to the superplastic deformation of AZ31 magnesium alloy

Infrared processing of magnesium wrought alloys
Adapted extrusion technology for magnesium alloys
Microstructure development of extruded Mg alloys
In-situ investigation of twinning behaviour in Mg-3Al-1Zn
Experimental investigation of the equilibria in Mg-Al-(Ca, Sr) systems
New phases in Mg-Al-Ca system
Stress-strain response in skin and core regions of die cast magnesium alloy AM60B determined from spherical microindentation
Observation of the microstructure and characterization of local mechanical properties of AM50 using a micro-indentation technique
Thermodynamics of Mg-Zn-Zr : implication on the effect of Zr on grain refining of Mg-Zn alloys
Influence of strong static magnetic field on solution and aging behavior in AZ91 magnesium alloys
Strain path and temperature effects on texture and microstructure evolution of AZ31

Prediction and measurement of residual stresses/strains in a direct chill casting magnesium alloy billet
Evaluation of the surface heat flux in the secondary zone during the direct-chill casting of magnesium alloy AZ31
A mathematical model of heat transfer and fluid flow in the direct chill casting of AZ31 magnesium billets
Process and alloy development for hydrostatic extrusion of magnesium : the European community research project MAGNEXTRUSCO
An efficient route to magnesium alloy sheet : twin roll casting and hot rolling
Control of wall thickness distribution in magnesium tube gas forming with large diameter expansion
An EBSD study on microstructural evolution during superplastic deformation of a fine-grained AZ31 magnesium alloy
High strength Mg-Zn-Y alloys with LPSO structure
Magnesium castings in aeronautics applications - special requirements
Effects of aluminum addition on magnesium-lithium-zinc alloy
Effects of Al addition on microstructure and mechanical properties of Mg-Zn-Y alloys

The behavior of CaO in magnesium alloys
The role of rare earth elements in structure and property control of magnesium die casting alloys
Grain refinement of commercial purity Mg-9%Al alloys by superheating
The influence of alloying elements and heat treatment upon properties of elektron 21 (EV31A) alloy
The effects of grain refinement on the castability of magnesium permanent mould castings
Use of a magnesium dosing furnace with a modern dosing system
Comparison of as-cast and plasma deposited commercial magnesium alloys
Accumulation of aluminum after solidification : AZ91D Mg-Al-Zn plate produced by die casting and gravity casting
Effects of grain refinement and melt filtration on the mechanical properties of sand and permanent mold cast magnesium AZ91D alloy
Semisolid processing and its application to magnesium alloys
Grain refinement of AZ91 in new rheocasting
Effects of processing parameters on flow behavior of semi-solid AZ91 alloy and application of continuous cast magnesium billets
The effect of high pressure die casting process characteristics on the properties and performance of advanced Mg alloys
Numerical simulations and experimental study of hot core distortion phenomenon in magnesium casting
Effects of liquid metal gate velocity on the porosity in high-pressure die-cast AM50 alloy
Macrosegregation in high-pressure die-cast AM60 alloy
Friction stir spot welding of Mg-alloys for automotive applications
Surface contamination on magnesium ingots
Metallurgical background to the development of creep resistant gravity casting magnesium alloys
Solid solution effects on the tensile behaviour of concentrated Mg-Zn alloys
The effect of process parameters and tool geometry on thermal field development and weld formation in friction stir welding of the alloys AZ31 and AZ61

Effects of alloying elements on microstructure and high-temperature mechanical properties of Mg-Al alloys
Creep studies of MRI153 magnesium alloy castings
An electron microscope study of intermetallic phases in AZ91 alloy variants
Nd:YAG laser welding of magnesium alloy castings
Corrosion properties of secondary AZ91 alloys
Intermetallic morphology development in AM60 alloy
EIS study of corrosion behavior of AZ91 and AM50 alloys
Evaluation of corrosion protection methods for magnesium alloys in automotive applications
Corrosion inhibition of magnesium alloys in coolants
Characterization of die skin structure and its effects on the corrosion properties of the hot-chamber die casting AZ91D thin plate
Microstructure and wear characteristics of laser clad Al-12% Si, Al-30% Si and AlSi/WC on AS21 magnesium alloy
The electropolishing and anodic coating of AZ31 magnesium alloy
Corrosion protection and repassivation after the deformation of magnesium alloys coated with a protective magnesium fluoride layer
Mg$_2$Si coating technology on magnesium alloys to improve corrosion and wear resistance
