BWR SCC & Modeling
Advances in Electrochemical Corrosion Potential Monitoring in Boiling Water Reactors
Effects of Hydrogen Peroxide and Oxygen on Corrosion of Stainless Steel in High Temperature Water
Effect of the Plastic Strain Level Quantified by EBSP Method on the Stress Corrosion Cracking of L-Grade Stainless Steels
Correlation Between Deformation-Induced Microstructures and TGSCC Susceptibility in a Low Carbon Austenitic Stainless Steel
The Initiation of Environmentally Assisted Cracking in BWR High Temperature Water

Stress Corrosion Cracking of Type 316 and 316L Stainless Steels in High Temperature Water
Crack Growth Behaviors of Low Carbon 316 Stainless Steels in 288°C Pure Water
Influence of Heat Treatment, Aging and Neutron Irradiation on the Fracture Toughness and Crack Growth Rate in BWR Environments of Alloy X-750
Effects of Si on SCC of Irradiated and Unirradiated Stainless Steels and Nickel Alloys

Stress Corrosion Crack Growth Behavior of Cold Worked Austenitic Stainless Steel in High Temperature Water
Finite Element Calculation of Crack Propagation in Type 304 Stainless Steel in Diluted Sulphuric Acid Solution Under Stress Corrosion Conditions
The Electrochemistry of Boiling Water Reactors
Modeling and Experimental Studies of Intergranular Corrosion in Austenitic Stainless Steels Used in Light Water Reactor Systems
Evaluation of the Fracture Research Institute Theoretical Stress Corrosion Cracking Model

Crack Growth
The Effect of Hold Time on the Crack Growth Rate of Sensitized Stainless Steel in High Temperature Water
Effects of Positive and Negative dK/da on SCC Growth Rates
Evaluation of Stress Corrosion Crack Growth Rate Based on Inspection Data on Alloy 600 Tubing
High-Resolution Characterizations of Stress-Corrosion Cracks in Austenitic Stainless Steel from Crack Growth Tests in BWR-Simulated Environments

Zircaloy
Characterization of Oxides Formed on Model Zirconium Alloys in 360°C Water Using Micro-Beam Synchrotron Radiation
Effect of Pre-Deposited Magnetite on Deposition of Nickel Oxides on Zr Surface in 573K Pressurized Water
Effect of Zinc Injection on Crevice Corrosion Resistance of Pre-Filmed Zircaloy-2 Tube Under Heat Transfer Condition

Transient Oxide Film Growth on Zirconium in High Temperature Aqueous Solutions
Irradiation Assisted Stress Corrosion Cracking
The Effect of Oversize Solute Additions on the Irradiation-Assisted Stress Corrosion Cracking Resistance of Austenitic Stainless Steels

Effect of Metallurgical Condition on Irradiation-Assisted Stress Corrosion Cracking of Commercial Stainless Steels

Irradiation-Assisted Stress Corrosion Cracking of Heat-Affected Zones of Austenitic Stainless Steel Welds

Irradiation Effects in a Highly Irradiated Cold Worked Stainless Steel Removed from a Commercial PWR

Crack Growth Behavior of Irradiated Austenitic Stainless Steel Weld Heat Affected Zone Material in High-Purity Water at 289°C

Effect of the Accelerated Irradiation and Hydrogen/Helium Gas on IASCC Characteristics for Highly Irradiated Austenitic Stainless Steels

Plastic Deformation Behavior of Type 316LN Stainless Steel in Non-Irradiated, Thermallysensitized Condition or in Irradiated Condition During SSRT

Development of Test Techniques for In-Pile SCC Initiation and Growth Tests and the Current Status of In-Pile Testing at JMTR

Fractographic Observations on a Highly Irradiated AISI 304 Steel after Constant Load Tests in Simulated PWR Water and Argon and after Supplementary Tensile and Impact Tests

In-Core Crack Growth Rate Studies on Irradiated Austenitic Stainless Steels in BWR and PWR Conditions in the Halden Reactor

Irradiation Assisted Stress Corrosion Cracking Susceptibility of Core Component Materials

Influence of the Neutron Spectrum on the Tensile Properties of Irradiated Austenitic Stainless Steels, in Air and in PWR Environment

Study on SCC Growth Behavior of BWR Core Shroud

Irradiation Effects

Influence of Localized Deformation on Irradiation-Assisted Stress Corrosion Cracking of Proton-Irradiated Austenitic Alloys

Deformation Structure in 316 Stainless Steel Irradiated in a PWR

Irradiation-Induced Microstructure, Swelling and Post-Irradiation Deformation of Stainless Steel 18Cr-10Ni-Ti Irradiated with Chromium Ions to 1-100 Dpa at 300-635°C

Microstructural Study and In Situ Investigation of Strain Localization in Ions Irradiated Austenitic Stainless Steels

Enhancement of Deuterium Retention in Helium or C+3 Ion Implanted 18Cr10NiTi Stainless Steel

Microstructural Evolution in Neutron-Irradiated Stainless Steels: Comparison of LWR and Fast-Reactor Irradiations

Dose Rate Effects on Microchemistry and Microstructure Relevant to LWR Components

Void Swelling of Austenitic Steels Irradiated with Neutrons at Low Temperatures and Very Low Dpa Rates

Response of PWR Baffle-Former Bolt Loading to Swelling, Irradiation Creep and Bolt Replacement as Revealed Using Finite Element Modeling

LAS & RPV Steels

Boric Acid Corrosion of Light Water Reactor Pressure Vessel Materials
The Effect of Transients on the Crack Growth Behavior of Low Alloy Steels for Pressure Boundary Components Under Light Water Reactor Operating Conditions

Mitigation Effect of Hydrogen Water Chemistry on Stress Corrosion and Low-Frequency Corrosion Fatigue Crack Growth in Low-Alloy Steels

Nickel-Based Weld Alloys

Examination of Stress Corrosion Cracks in Alloy 182 Weld Metal after Exposure to PWR Primary Water

Development of Crack Growth Rate Disposition Curves for Primary Water Stress Corrosion Cracking (PWSCC) of Alloy 82, 182, and 132 Weldments

Stress Intensity and Temperature Dependence for Crack Growth Rate in Weld Metal Alloy 182 in Primary PWR Environment

The Effect of Cold Work and Dissolved Hydrogen in the Stress Corrosion Cracking of Alloy 82 and Alloy 182 Weld Metal

Influence of a Cyclic Loading on the Initiation and Propagation of PWSCC in Weld Metal 182

Microstructural and Microchemical Characterization of Primary-Side Cracks in an Alloy 600 Nozzle Head Penetration and its Alloy 182 J-Weld from the Davis-Besse Reactor Vessel

The Effect of Grain Orientation on the Cracking Behavior of Alloy 182 in PWR Environment

SCC Behavior in the Transition Region of an Alloy 182-SA 508 Cl.2 Dissimilar Weld Joint Under Simulated BWR-NWC Conditions

Load Path Effects on the Fracture Toughness of Alloy 82H and 52 Welds in Low Temperature Water

Reduction of Toughness Results for Weld Metal 182 in a PWR Primary Water Environment with Varying Dissolved Hydrogen, Lithium Hydroxide and Boric Acid Concentrations

Low Temperature Crack Propagation Evaluation in Pressurized Water Reactor Service

Establishment of Experimental Conditions for the SCC Growth Rate Test of Alloy 600 and Ni Base Weld Metal in High Temperature Oxygenated Water

Evaluation of SCC Crack Growth Rate in Alloy 600 and Its Weld Metals in Simulated BWR Environments

Evaluation of Mechanical and Environmental Parameters Affecting Primary Water Stress Corrosion Cracking of Nickel-Based Alloys

Fracture Surface Morphology of Stress Corrosion Cracks in Nickel-Base Welds

Noble Metal & SCC Mitigation

BWR SCC Mitigation Experiences with Hydrogen Water Chemistry

Effects of Bulk Water Chemistry on ECP Distribution Inside a Crevice

The Impact of Oxygen and Hydrogen Recombination Efficiency on the Effectiveness of NMCA in Reducing the Corrosion Potential in Boiling Water Reactors

Online NobleChem Mitigation of SCC

Corrosion Mitigation of BWR Structural Materials by the Photoelectric Method with TiO2 - Laboratory Experiments of TiO2 Effect on ECP Behavior and Materials Integrity

Electrochemical Behavior of Oxygen and Hydrogen on ZrO2 Treated Type 304 Stainless Steels in High Temperature Pure Water
Corrosion Mitigation of BWR Structural Materials by the Photoelectric Method with TiO2- A SCC Mitigation Technique and Its Feasibility Evaluation

Operational Experience
Flow Accelerated Corrosion and Cracking of Carbon Steel Piping in Primary Water-Operating Experience at the Point Lepreau Generating Station
Risk-Reduction Strategies Used to Manage Cracking of Carbon Steel Primary Coolant Piping at the Point Lepreau Generating Station
Recent In-Service Experience with Degradation of Low Alloy Steel Components Due to Localized Corrosion and Environmentally Assisted Cracking in German PWR Plants

German Experience with Intergranular Cracking in Austenitic Piping in BWRs and Assessment of Parameters Affecting the In-Service IGSCC Behavior Using an Artificial Neural Network
Root Cause Failure Analysis of Defected J-Groove Welds in Steam Generator Drainage Nozzles
Laboratory Investigation of the Stainless Steel Cladding on the Davis-Besse Reactor Vessel Head
Laboratory Investigation of PWSCC of CRDM Nozzle 3 and Its J-Groove Weld on the Davis-Besse Reactor Vessel Head
Laboratory Investigation of the Alloy 600 Bottom Mounted Instrumentation Nozzle Samples and Weld Boat Sample from South Texas Project Unit 1
Boric Acid Corrosion Laboratory Investigation of the Davis-Besse Reactor Pressure Vessel Head
Measurements of Carbon Steel ECP and Critical Deuterium Concentration Under CANDU Conditions in the Halden Reactor
PWR Primary
The Role of Surface Films in the Stress Corrosion Cracking of Alloy 600 in PWR Primary Water
Oxidation of Ni Base Alloys in PWR Water: Oxide Layers and Associated Damage to the Base Metal
Alloy Oxidation Studies Related to PWSCC
Effect of the Chromium Content and Strain on the Corrosion of Nickel Based Alloys in Primary Water of Pressurized Water Reactors
The Mechanism and Modeling of Intergranular Stress Corrosion Cracking of Nickel-Chromium-Iron Alloys Exposed to High Purity Water
Crack Initiation in Alloy 600 SG Tubing in Elevated pH PWR Primary Water
Initiation of SCC in Alloy 600 Wrought Materials: A Laboratory and Statistical valuation
SCC Initiation Testing of Nickel-Based Alloys Using In-Situ Monitored Uniaxial Tensile Specimens
Cracking of Alloy 600 Nozzles and Welds in PWRs: Review of Cracking Events and Repair Service Experience
Verification of an Intraspecimen Method Using a Constant Stress Test of Sensitized Alloy 600
In Search of the True Temperature and Stress Intensity Factor Dependencies for PWSCC
Effects of PWR Primary Water Chemistry and Deaerated Water on SCC
Crack Growth Rates in Primary Side Materials in Elevated pH PWR Water
Evaluation of Crack Growth Rate for Alloy 600 Vessel Penetrations in a Primary Water Environment

SCC Growth Behavior of Austenitic Stainless Steels in PWR Primary Water Conditions

Environmentally Assisted Crack Growth of Cold-Worked Type 304 Stainless Steel in PWR Environments

SCC of Cold-Worked Austenitic Stainless Steels in PWR Conditions

Influence of Carbide Precipitation and Rolling Direction on IGSCC Growth Behaviors of Austenitic Stainless Steels in Hydrogenated High Temperature Water

Effect of Strain-Hardening on Stress Corrosion Cracking of AISI 304L Stainless Steel in PWR Primary Environment at 360°C

107 tCycle Fatigue Limit of Type 304L SS in Air and PWR Water, at 150°C and 300°C

Statistical Analysis of the LCF Behavior of Type 304L SS Tested at 150°C and 300°C in Air and PWR Water

Comparison of the Fatigue Life of Type 304L SS as Measured in Load and Strain Controlled Tests

PWR Secondary

Laboratory Examination of Pulled Mill Annealed Alloy 600 Steam Generator Tube with Free Span Axial ODSCC

Quantitative Morphological Characterization of Deposits Formed in the Secondary System of the Comanche Peak Steam Electric Station Using Scanning Electron Microscopy (SEM)

Impurity Source Terms and Behavior in Nuclear Once-Through Steam Generators

Observations and Insights into Pb-Assisted Stress Corrosion Cracking of Alloy 600 Steam Generator Tubes

Modeling Concentrated Solution Transport and Accumulation in Steam Generator Tube Support Plate Crevices

Clues and Issues in the SCC of High Nickel Alloys Associated with Dissolved Lead

Effect of Lead Contamination on Steam Generator Tube Degradation

The Effect of Lead Ions on the Dissolution and Passivation of Nickel Base Alloys

Effects of Pb on SCC of Alloy 600 and Alloy 690 in Prototypical Steam Generator Chemistries

Evaluation of Crack Growth Rate for Alloy 600TT SG Tubing in Primary and Faulted Secondary Water Environments

Stress Corrosion Cracking of Nickel Alloys in "Complex" (Liquid and Vapor) Environments

Effect of Water Chemistry on Corrosion Resistance of Alloy 600 SG Tubes Under Acidic Conditions

SCC Behavior of Model Alloy 600 Containing Minor Element Cerium in a Caustic Solution

A New Technique for Intergranular Crack Formation in Alloy 600 Steam Generator Tubing

Erosion-Corrosion of Alloy UNS N04400

Assessment of Amine Specific Effects on the Flow Accelerated Corrosion Rate of Carbon and Low Alloy Steels

Oxidation Behavior of Austenitic Materials Exposed to Secondary Side Water at 282°C
Characterization of Austenitic Materials Exposed to Secondary Side Water at 282°C

SuperCritical Water-Cooled Reactors
Challenges and Recent Progress in Corrosion and Stress Corrosion Cracking of Alloys for Supercritical Water Reactor Core Components
Effect of Proton Irradiation and Grain Boundary Engineering on Stress Corrosion Cracking of Ferritic-Martensitic Alloys in Supercritical Water
Corrosion of Zirconium-Based Fuel Cladding Alloys in Supercritical Water
Corrosion-Resistant Coatings for Use in a Supercritical Water Candu® Reactor
Corrosion and Stress Corrosion Cracking of Ferritic-Martensitic Alloys in Supercritical Water
Corrosion of Candidate Materials for Supercritical Water-Cooled Reactors
General Corrosion Properties of Titanium Based Alloys for the Fuel Claddings in the Supercritical Water-Cooled Reactor
Waste Materials and Mechanical Properties
Dynamic Strain Aging of Ni-Base Alloys Inconel 600 and 690
Stifling of Crevice Corrosion in Alloy 22
Materials Degradation Issues in the U.S. High-Level Nuclear Waste Repository
SCC Initiation and Growth Rate Studies on Titanium Grade 7 and Base Metal, Welded and Aged Alloy 22 in Concentrated Groundwater
Dynamic Strain Ageing and EAC of Deformed Nitrogen-Alloyed AISI 316 Stainless Steels
