

Development of new polyacrylate flocculants for red mud clarification	p. 5
Effect of flocculant molecular weight on rheology	p. 11
Fractal model describing the aggregation of various mineral materials	p. 17
Study on the clarification of a red mud slurry during flocculation	p. 23
Wastewater treatment methods	p. 27
Cross-country bauxite slurry transportation	p. 35
Occurrence and characterization of Zn and Mn in bauxite	p. 41
Beneficiation of high quartz content bauxite from Los Pijiguaos	p. 47
Thin layer chromatography of bauxite : instrumental characterisation and quantification by scanning densitometry	p. 53
New technology for digestion of bauxites	p. 59
Digester design using CFD	p. 939
Oxalate removal by occlusion in hydrate	p. 65
Organic carbon in Indian bauxites and its control in alumina plants	p. 71
Effects of ultrasonic on Bayer digestion of diasporic bauxite	p. 75
FLUIDCON - a new pneumatic conveying system for alumina	p. 81
Evolution of microstructure and properties of SGA with calcination of Bayer gibbsite	p. 89
Beryllium in pot room bath	p. 95
Automated crystal optical technique for quantitative determination of phase and particle size composition of alumina	p. 101
Operating cost - issues and opportunities	p. 109
Digital fieldbus implementation for mineral processing	p. 115
Maximising bauxite grinding mill capacity to sustain plant production	p. 121
Upgrade of existing circulating fluidized bed calciners at CVG bauxilum without compromising product quality	p. 125
Crystal growth modifying reagents; nucleation control additives or agglomeration aids?	p. 131
Plantwide replacement of the existing control equipment by a new DCS at AOS	p. 139
Influence of alumina morphology and microstructure on its strength	p. 145
Study on the rate of crystal growth and the phenomena of template crystallization during seeded precipitation from sodium aluminate liquor	p. 149
Effects of monohydroxy-alcohol additives on the seeded agglomeration of sodium aluminate liquors	p. 153
Study on the effect of K_2O on seed precipitation in sodium aluminate liquors	p. 159
Influence of ions on the aggregation of hydroxide aluminum seed	p. 165
Effects of power ultrasound on precipitation process of sodium aluminate solutions	p. 169
Study on the oscillation phenomena of particle size distribution during the seeded agglomeration of sodium aluminate liquors	p. 173
