

Preface

Time-Resolved Analyses of Microstructure in Advanced Materials under High Magnetic Fields at Elevated Temperature Using Neutrons

Isothermal Phase Transformation Cycling in Steel by Application of a High Magnetic Field

Solid State Materials Processing in a High Magnetic Field

Impact of Magnetic Field on Recrystallization and Grain Growth in Non-Ferromagnetic Metals

Application of Pulsed Magnetic Field Treatment for Residual Stress Reduction of a Welded Structure

Retained Austenite in SAE 52100 Steel Post Magnetic Processing and Heat Treatment

Metals Solidification under the Influence of External Fields: Research Status in Shanghai University

Experimental Study on Solidification Structure of Al Ingot by Pulse Magneto Oscillation

Effect of Pulsed Magnetic Field on the Solidified Structure of Pure Al Melt

High Magnetic Field Influences on Fabrication of Materials with Magnetic Phases

Synthesis of Acicular Magnetite Using Coprecipitation Method under Magnetic Field

Rapid Ceramic Processing by Field-Assisted Sintering Technique

The Use of Power Ultrasound for Material Processing

Influence of Power Ultrasonic Treatment on Solidification Structure and Segregation of 1Cr18Ni9Ti Stainless Steel

A Numerical Investigation of the Solidification of Al-12.6%Si Alloy during Mold-Vibration

Degassing of Molten Aluminum Using Ultrasonic Vibrations

Research Progress on Ultrasonic Cavitation Based Dispersion of Nanoparticles in Al/Mg Melts for Solidification Processing of Bulk Lightweight Metal Matrix Nanocomposite

Experimental Investigations on Rotary Ultrasonic Machining of Hard-to-Machine Materials

Non-Contact Ultrasonic Treatment of Metals in a Magnetic Field

Numerical Simulation for Mold-Filling and Coupled Heat Transfer Processes of Titanium Shaped Castings under Centrifugal Forces

Integrated Multiphysics and Multiscale Modeling of Electromagnetically-Assisted Materials Processing Systems

Coupled Modeling for Electromagnetic Solidification Transport Processes of Alloy Castings

Effect of Complex Electromagnetic Stirring on Solidification Structure and Segregation of 60Si 2CrVaT Spring Steel Bloom

Influence of Electric Current Pulse on Solidification Structure of Hypoeutectic Al-Cu Alloy

Pulsed Electromagnetic Forming and Joining

Solidification Behaviour under Intensive Forced Convection

Monte Carlo Simulation of Growth of Solid under Forced Fluid Flow

Steel Production with Microwave Assisted Electric Arc Furnace Technology

Study on Fracture of Aluminium Alloy 2014 Conical Ring in Hot Rolling under Different Temperature
