

Preface

Editor's Biography

Program Organizers

Aluminum Committees

Alumina and Bauxite

Bayer Process Safety, Environmental and Sustainability Issues

The Asia-Pacific Partnership: An Important New Initiative for a Sustainable Alumina Industry

Operations Support in the Alumina Industry - A Valuable Partnership

Sustainable Storm Water Management

Achieving Excellence in Liquid Effluent Treatment at Alunorte

Sustainability of Chinese Alumina Production from High Silica Diasporic Bauxite

The Design of Pressure Safety Systems in the Alumina Industry

Mercury Vapor Sensor for Alumina Refinery Processes

Bauxite Ore Handling and Benefication

Mining Scheduling at Paragominas Bauxite Mine

Transformation of Sodalite to Cancrinite under High Temperature Bayer Digestion Conditions

Desilication of Bauxite Ores Bearing Multi-Aluminosilicates by Thermochemical Activation Process

Reductive Roasting and Magnetic Separation of Greek Bauxite Residue for Its Utilization in Iron Ore Industry

Reaction Behavior of Sulphur Existed in Diasporic Bauxite in Bayer Digestion Process

Roasting Pretreatment of High Sulfur Bauxite of China

Study on Bayer Process and Soda-Lime Sintering Process of Special Diasporic Bauxite with High Silica

Process Improvements and Experiences - Red Side

Advanced Process Control in Alumina Digestion Unit

The Red Mud Recycles on Bayer Process and Its Effect on the Iron Content on Liquor

Effect of Lime Quality on Slaking

Selection of Sedimentation Equipment for the Bayer Process - An Overview of Past and Present Technology

A Novel Chemistry for Improved Aluminate Scale Control in Bayer Process

Using a Statistical Model in the Red Mud Filtration to Predict the Caustic Concentration in the Red Mud

Formation of Scales in Pipes and Equipments with Kelly Filter Liquor

The Application of Nepheline in Alumina Industry

Methods - Bauxite Characterization, Bayer Chemistry, Alumina Quality

Characterisation of Iron Mineralogy in Jamaican Bauxite and Associated Aspects of Alumina and Soda Losses

Technological Characterization of Bauxite from Pará-Brazil

Estimating Process Capability Indexes through Random Samples in CVG-BAUXILUM

Characterisation of Alumina and Soda Losses Associated with the Processing of Goethitic Rich Jamaican Bauxite

Impact of Excess Synthetic Flocculent on Security Filtration

The Effects of Temperature, Hydrate Solids Concentration and Particle Size on Clarity in Laboratory Settling Tests

Exergy Analysis of Alumina Production Heat Flow Diagrams

Alumina Precipitation

Kinetics of Super-Fine Aluminum Hydroxide Precipitation from Sodium Aluminate Solutions with Gel-Seed

Effect of //945;-Alanine on the Seeded Precipitation of Sodium Aluminate Solution

Effects of Four Aromatic Carboxylic Acids as Inhibitors on the Seeded Precipitation Ratios of Sodium Aluminate Solutions and the Agglomeration Efficiency of Gibbsite

Effect of Ultrasound on Particle Size Distribution of Al(OH)₃ in Seeded Precipitation of Sodium Alumina Solution

Effect of Carbonization Seeds on Seeded Precipitation of Sodium Aluminate Solution

Effect of Cationic Polyacrylamide on the Seeded Agglomeration Process of Sodium Aluminate Liquors

Model on Batch Seeded Gibbsite Precipitation from Bayer Liquor

Process Improvements and Experiences - White Side

Electrocatalytic Oxidation of Organics in Bayer Liquor

The Influence of Moisture in the Attrition Index of Alumina

The World's Largest Hydrate Pan Filter: Engineering Improvements and Experiences

Superior Arguments for Most Modern Filtration Technologies in High Capacity Alumina Refineries

Energy Efficiency in Gas Suspension Calciners (GSC)

Increased Availability and Optimization of Calciner Performance Due to Automation
