

Early-Age Autogenous Shrinkage of High-Performance Concrete Columns by Embedded Fiber Bragg-Grating Sensor	p. 1
Effects of Surface Roughness on Tribological Characteristics in Micro Double Cup Extrusion of Aluminum	p. 5
Effect of the Bearing Preload on the Characteristics of the Spindle Stiffness	p. 9
Dynamic Analysis of a 6-DOF Inverted Stewart Platform	p. 13
On Numerical Simulations of the Micro-Gears and their Cold Forging Process	p. 17
Design and Fabrication of a Multi-Functional Nanomanipulator	p. 21
Topological Optimum Design Considering Stress Constraint Using Approximate Function	p. 25
Numerical Modeling and Design of an Inspection Device with Thermoelectric Coolers for the Coke Oven	p. 29
Modeling of Thermoelectric Coolers for Freezing/Thawing Applications	p. 33
Numerical Simulation and Experimental Measurement of a Printed Circuit Board Subjected to Drop Test	p. 37
The Vibration Analysis of a Simply Supported Plate Excited by Piezoelectric Actuators	p. 41
A Study on a Novel Vibrating Conveyor	p. 45
An Incidence Matrix Support for Conceptual Design Based on Port Ontology	p. 49
Rheological Properties of Aircraft Grease Containing Nano-Additives	p. 53
Friction and Wear Behavior of Titanium Complex Grease with Admixture Base Oil	p. 57
Fuzzy Design Scheme Selection Method Based on QFD Integrated with TRIZ	p. 61
Research on the Method of Circumferential Spring Dual Mass Flywheel Damper Matching with Diesel Engine	p. 65
Research on Module Partition Strategy of Optional Disassembly	p. 69
Description of Work-Hardening Layer's Depth by Soft Coefficient	p. 73
Experimental Study and Hydrodynamic Performance Analysis of a Bio-Tail Fin Propellant System	p. 77
The Highly Efficient Calculation Method of 3-D Frequency-Domain Green Function	p. 81
Research on Multi-Actuators Speed Control Methods in Large-Scale Vessel	p. 85
Optimization Design of Pressure Shell in Underwater Vehicle Based on Response Surface Model	p. 89
Design and Testing of Towed Fishery Detector in Horizontality	p. 93
High Voltage Breaker Cam Actuator's Optimization Design on the Virtual Prototype Technology	p. 97
Research on Modeling and Simulation of Scheduling with Tool Failure in FMS	p. 101
Foundation Structure Design and Analysis for Offshore Wind Turbine	p. 105
Research on Obtaining Functional Periodicity by Using Su-Field	p. 109
Investigation of Cavity Wind Rotor with Three Blades Vertical Axis	p. 113
Research of Equipment Selection and Matching Expert System in Fully Mechanized Caving Face Based on Ontology	p. 117
Research on Dynamics of Rotor Systems in Large Centrifugal Compressor	p. 121

Research on Extrusion Velocity in Freeform Extrusion Fabrication of Aqueous Alumina Paste	p. 125
Research on Loading Method of High-Speed Closed Power Flow Test System	p. 129
An Immune Particle Swarm Optimization Algorithm for Solving Permutation Flowshop Problem	p. 133
A Subjective Evaluation Method for Man-Machine Interface Based on Grey Interval Relational Analysis	p. 137
Simulation Research on Temperature Field of Circular Cavity Hydrostatic Thrust Bearing	p. 141
A Contrast of Generation Sinusoidal Fringe Pattern Method Based on Phase Measurement Profilometry	p. 145
Fault Diagnosis and Analysis for Marine Planetary Gearbox	p. 149
Generalized Variational Principles of Quasi-Static Electro-Magneto-Thermo-Elasticity	p. 153
On the Biomechanical Design of the Walking Assistance Mechanism in Aided-Walking Wheelchair	p. 157
Loci Conversion and Corner Smoothing with PH Curves in CNC System	p. 161
An Outlier Detection Method Based on Fuzzy C-Means Clustering	p. 165
Structural Design and the State of Motion Analyzes for Multi-Degree-of-Freedom Electro-Hydraulic Mix-Drive Motion Simulator	p. 169
Optimal Research of Actuator Placement for Piezoelectric Smart Structure	p. 173
Simulation Research on Dynamic Characteristics of Mooring System for Double Body Working Ship	p. 177
Kinematical Analysis of Manipulators Interfacing	p. 181
The FUZZY-D-P-GA of Navigation Performance and Structure Characteristic of Ships	p. 185
A Study of LED C-Like Linear Tube by Micromachining Technique for LCD Backlight Applications	p. 189
A Dispatching Rule Study of a LED Sorting System	p. 193
The Structural Design and Optimization for the Inner-Frame of Subsea Flange Connection Tool	p. 197
Using Multiaxial Fatigue Method to Predict Gear Bending Fatigue Life	p. 201
Exploration for Rapidly Dividing a Complex Structure 3D Modeling into its Assembly Cells	p. 205
Design and Experimental Research on Ester Ferrofluid Seal for Stern	p. 209
Real Eigenvalue Sensitivity for Reduction of Vibration of Two-Stage Parallel Shaft Gearbox	p. 213
Study on Shell-Solid Coupling Method of Trunk Structure for Efficient FE Analysis	p. 217
The Design for Twelve-Accelerometer Gravity Gradiometer	p. 221
Development of a Magneto-Rheological Fluid Tension Control Device	p. 225
Modelling and Analysis for an Electric Power Assisted Steering System of Plug-In Hybrid Electric Car	p. 229
Design of Multi-Module Experiment-Rig of Ship Electrical Propulsion Prime Mover	p. 233

Kinematics Research on Blade Control Mechanism of Variable Vector Propeller	p. 237
Parallel Horizontal Sealing Mechanism Design and Experimental Research about Heat Sealing Parameters	p. 241
A Determination Method of Product Design Parameters with Interval Constraint	p. 245
Methods of Assigning Attribute Weights Based on Rough Set and D-S Evidential Theory	p. 249
A Research on the Concepts and Estimate Methods of Remanufacturing Rate of Engine	p. 253
An Approach for Module Partition of Product	p. 257
Design and Analysis of a Cylindrical Traveling Wave Ultrasonic Motor Using Orthogonal Longitudinal Composite Transducer	p. 261
Study of Flat Belt Drive Mechanics	p. 265
The Influence Parameters Study on Free Span Allowable Length Design	p. 269
Mechanism Research on the Waviness Excitation of Ball Bearings	p. 273
A 3D Virtual FEM and SA Method to Determining the Optimization Clearance for a Punching Die	p. 277
X-Ray Image Reconstruction of Solder Joints by Using Several Algebraic Reconstruction Techniques	p. 281
Finite Element Analysis of Heterogeneous Sandwich Sheets During Rolling	p. 285
Computational Analysis of Multibody Dynamic Systems Using Nonlinear Recursive Formulation	p. 289
Stress Analysis of a Resin Pocket Embedded in Laminated Composites for an Optical Fiber Sensor	p. 293
Numerical Simulation of Quasi-Brittle Fracture in UHPFRC I-Beam as a Linear Complementarity Problem	p. 297
The Research and Application of 3D Laser Scanning Measurement Technology in Forestry	p. 301
Automatic Point Clouds Registration Based on the Method of Least Squares	p. 305
CFD Investigation of Performance for Marine Current Turbine Based on RANS Simulations	p. 309
Optimization of Pass Parameters on Two-Grooves Skew Rolling for Al Ball	p. 313
Study on Dynamic Performance of High Spot Open-Closed Gripper Mechanism in Printing Machine	p. 317
Study on Knowledge Expression Methods and Reasoning Strategies in Intelligent CAD System	p. 321
Optimum Design for Single Cross Section of Pillar Structures of Vehicles	p. 325
Design for Saving Energy Based on Energy Flow Analysis Method and CAE Technology	p. 329
Interference-Free Multi-Axis NC Machining of Cylindrical Cam Using Enveloping Element	p. 333
Analysis of Core-Candlestick Drill in Drilling Composite Materials	p. 337
Investigation into Micro Machining Cutting Parameters of PMMA Polymer Material Using Taguchi's Method	p. 341
Convective Heat Transfer Measurements of Die-Casting Heat Sinks	p. 345

Modular Horizontal Continuous Casting Machine: Meeting the Challenge of Flexible Manufacturing of the Future	p. 349
Mixed Convection Cooling of a Stretching Sheet in the Presence of a Magnetic Field for Manufacturing Processes	p. 353
Optimal Inspection Allocation Decision with Production Line Balance in Multi-Station Assembly Systems	p. 357
Welding Repair Strategies for Aluminium Structures	p. 361
Mathematical Transformation of Machine Settings from Cradle-Type to Cartesian-Type Hypoid Generator	p. 365
A Regression Neural Model for In-Process Surface Roughness Monitoring in End Milling Operations	p. 369
A Study on Ultrasonic Vibration Milling of Inconel 718	p. 373
The Design of a Novel Sensor Fusion Model for Monitoring People's Density in Public Places Using Infrared Thermography	p. 377
The Application of Force and Acoustic Emission Sensors for Detecting Tool Damage in Turning Processes	p. 381
Inverse Design of Performance on a Long-Stroke Sequential Turbocharging Diesel Engine	p. 385
Statistical Analysis of 3D Surface Micro-Topography Characteristics of Micro-WEDM	p. 389
Experimental and Structural Analysis on Strength of Thermit Welding	p. 393
Research on Manufacturing Execution System Oriented to Agile Manufacturing	p. 397
Wavelet Method for Roughness of Micro-EDM's Surface Contour Lines	p. 401
Experimental Research of Pneumatic Drop-on-Demand High Temperature Droplet Deposition for Rapid Prototyping	p. 405
Flow Field Analysis of Gas Jets from Nozzles for Gas-Assisted Laser Cutting	p. 409
Cracking Mechanism of Laser Cladding Rapid Manufacturing 316L Stainless Steel	p. 413
Dynamic Behavior of the Forging Manipulator under the Press Motions	p. 417
Dynamic Analysis of Wafer Slicing by Using Multi Wire Saw	p. 421
Experimental Investigation on Electrochemical Micro Machining of Complex Shape Parts	p. 425
Numerical and Experimental Studies of the Precision Forging of a Screw Propeller	p. 429
Numerical Simulations of Friction Stir Welding Process and Subsequent Post Weld Cold Rolling Process	p. 433
Constraint-Based Synchronous Fitting of Surfaces	p. 437
Process Planning and Program Generation for STEP-Compliant NC Manufacture of Complex Surface Components	p. 441
The Research of Data Points Quality Assessment Method in Reverse Engineering	p. 445
Analysis of Temperature Distribution and its Influencing Factors in Laser Welding of Beryllium Cylindrical Shells	p. 449
A Semantic Gateway Architecture for System Integration in Networked Manufacturing	p. 453

Application of Rigid/Visco-Plastic Element Free Galerkin Method in Three-Dimensional Bulk Metal Forming Processes	p. 457
Study on Modeling Technique about Complex Valve Body Based on Reverse Engineering	p. 461
Research on the Plan for NC System Based on STEP-NC	p. 465
Study on Workpiece Machining Precision PID Control Model in Closed-Loop Manufacturing Systems	p. 469
Using Modal Analysis and Optimization to Determine Elastic Constants of Thick Composite Plates	p. 473
Soy-Based Polyurethane Foam Reinforced with Carbon Nanotubes	p. 477
Predictions of Springback of Strain-Hardening Material in U-Shaped Bending Process	p. 481
Rapid Manufacturing of Metal-Ceramic Composites	p. 485
Dynamic Analysis on Underlay Microstructure for Cu/Low-k Wafer during Wire Bonding	p. 489
Comprehensive Hygro-Thermo-Vapor Pressure Model for CMOS Image Sensor	p. 493
Study on Thermo-Mechanical Behaviors of Shape Memory Polymer	p. 497
Material Point Method in Impact Engineering Problems	p. 501
Research on Superfine Wood Powder Disintegrator with Multi-Granularity Used in Power Generation	p. 505
Simulation of the Flow Behavior of Thin Polymer Film during Nanoimprint Lithography Based on a Viscoelastic Model	p. 509
Elastoplastic Instability of the Double-Arc Ring-Stiffened Cylindrical Shell	p. 513
Analysis on Microstructure of AlSi7Cu5 Alloy by Slope Near-Liquidus Method	p. 517
Simulation and Experimental Study on Temperature Fields for Laser Assisted Machining of Silicon Nitride	p. 521
Removal of Brilliant Green from Aqueous Solution Using Diatomite-Attapulgite Composite Nano-Size Adsorbent	p. 525
Manufacturing Technology and Material Characterization of Ti44Ni47Nb9 Alloy Fastener Ring by Tungsten Inert Gas Welding	p. 529
Thermal Cycle Characteristics of AM 50 Magnesium Alloy Welded by FSW	p. 533
Structure and Properties of TaCx Coating on Biomedical 316L Stainless Steel by RF Magnetron Sputtering	p. 537
Preparation of Imprinted Polymer with D-Phenylalanin on Silica Surface	p. 541
Experimental Research on Diamond String Bead Wire Cutting the Steel-Based Material	p. 545
Technical Parameters of Rice-Straw Board with Fire-Retardant of Wood	p. 549
A Knowledge-Based System for Product Design with Modules	p. 553
Utilizing Restricted Direction Strategy and Binary Heap Technology to Optimize Dijkstra Algorithm in WebGIS	p. 557
Adaptive Neural Network L2-Gain Control for Unmodeled Dynamics Nonlinear System	p. 561
A Stereo Vision Based Target Tracking and Obstacle Avoidance	p. 565
Image Processing Algorithm for Tracking and Picking an Object for an Open Platform Mobile Robot	p. 569

Passivity-Based Rotor Time Constant Estimation and Adaptive Position Control of Induction Machines	p. 573
On the Firing Test Properties of Thinfilmmetallic Initiators	p. 577
Open Architecture of Robot Control System Based on PROFI-BUS	p. 581
Simulation and Research of the Space 5-DOF Manipulator Kinematics and Dynamics	p. 585
A Measurement Fusion Fault-Tolerating PID Control for Time-Delay System with Colored Noise Disturbance	p. 589
Stabilization Control of Nonholonomic Wheeled Mobile Service Robots	p. 593
Modeling of Flexspline and Contact Analyses of Harmonic Drive	p. 597
The Dynamics Analysis of the Robot Polishing System by the Multi-Agent System	p. 601
Configuration Design of a Novel Mobile Robot with 5th Wheel	p. 605
Mobile Platform of a Rocker-Type W-Shaped Track Robot	p. 609
Design and Affect about Parameter to Capability Research on Driving Device of Puncturing Mud Robot	p. 613
Vibration Control of Nonholonomically Redundant Flexible Manipulators	p. 617
The Automatic Spraying in the Realization of Complicated Surface Coating	p. 621
Research on Moment Coupling and Compensation Control of Three-Axis Ship Motion Simulation Turntable	p. 625
Trajectory Planning Realization for Multi-Legged Walking Machine's Leg	p. 629
Applying Genetic Algorithm to Resource Constrained Multi-Project Scheduling Problems	p. 633
Finite Capacity Planning for Multiple TFT-LCD Color Filter Fabs	p. 637
Facility Planning for TFT-LCD Array Fab	p. 641
Calculation of Contact Forces of Large-Scale Heavy Forging Manipulator Grippers	p. 645
Layout Optimization of Mooring Base of the Ship-Based Helicopter Based on FEM	p. 649
Interference Suppression Detector for Spread Spectrum System Based on Amplitude Domain Processing	p. 653
A Layout Method for Control Panel of Thermal Power Plant	p. 657
A Novel 3D Mesh Segmentation Method of Algebraic Models in Reverse Engineering	p. 661
Path Planning and System Simulation for an Industrial Spot Welding Robot Based on SimMechanics	p. 665
Layout Design of Naval Gun Magazine Based on Improved GA	p. 669
Digital Design of the Ocean Casing Pipes Centering Equipment	p. 673
Numerical Simulation of Ship Maneuvering Motions in Viscous Flow	p. 677
External Effect Analysis of Enterprises' Action in Industrial Symbiosis Network	p. 681
Parameterized Modeling and Virtual Prototype of Planetary Reducer	p. 685
A Formal EXPRESS-to-OWL Mapping Algorithm	p. 689
Simulation of Diesel Electronic Control PPVI Fuel Injection System	p. 693

Research on Simulation System of the Interfacing Apparatus of Underwater Vehicle Based on VR	p. 697
An Intelligent Image Segmentation Algorithm for Medical Ultrasonic Instruments	p. 701
Simulation Research on Braking Safety Properties of Aircraft Traction System	p. 705
Solution of the Edges of Mode III Asymmetrical Dynamic Interface Crack Subjected to Variable Loads	p. 709
Hardware-in-the-Loop Simulation of Speed-Adjusting System for DC Motor Based on dSPACE	p. 713
Study of Ship Motion Simulation Based on HLA Technology	p. 717
A Methodology to Estimate the Reliability of Passageway system in Naval Ship Design	p. 721
The Simulation and Analysis of the Dining-Room Servicing Mode in a Luxury Passenger Liner	p. 725
The Simulation and Analysis of the Servicing Mode of the Showering System in a Luxury Passenger Liner	p. 729
Modeling and Applying of the Relationship between Module Interfaces Based on the Extenics	p. 733
Research on Fuzzy Scheduling Problem of Single-Stage Multi-Parallel Machines	p. 737
Semantic Similarity Based on Ontology Technology and its Application in Mobile Information Retrieval for Product Design	p. 741
Remote Machine Condition Monitoring Using Wireless Web Technology	p. 745
Research on Simulation Optimization and Experiment of Dynamical Vibration Absorption Boring Bar with Damping	p. 749
Research and Application of Workflow Technology in Multiple-Disciplinary System Development	p. 753
Research on Workflow Management of Multi-Disciplinary Collaborative Design Based on Ontology	p. 757
Using AHP and TOPSIS Approaches in Nuclear Power Plant Equipment Supplier Selection	p. 761
Study of Product Modeling Method Based on UML	p. 765
Status of Eco-Design in Thai Furniture Industry	p. 769
Core Sustainable Values: Examining the Consideration and Influence of Social Factors within Sustainable Technologies	p. 773
Web-Based Education Support Tools Used for Teaching the "Engineering Graphics" Course	p. 777
Boundary Element Method and its Application for Measuring Moisture Content in Woody Materials	p. 781
An IPMC Actuated 3D Swimming Microrobot and its Propulsive Efficiency Analysis	p. 785
Influence of Hydrogen Contents of Ti-6Al-4V Alloy on Cutting Force and Temperature	p. 789
Heterogeneous Object Modeling Approach Based on ACIS and HOOPS	p. 793
Design of Cascade-Smith Hybrid Control Structure for Pressure Control	p. 797

Research on Identification Method of Multi-Mixed Vibration Signal of Aeroengine	p. 801
The Order Tracking Study of Variant Speed Process of Aeroengine Vibration Signal	p. 805
Multi-Axis EDM CNC System Based on RT-Linux	p. 809
Fabrication of Micro Structures by Ultra Short Voltage Pulse Electrochemical Machining	p. 813
Bearing Condition Identification Using Improved Multiscale Entropy and SVMs	p. 817
Tangent Hole Machined by Micro Electrical Discharge Machining	p. 821
Dynamic Stress Concentration of Circular Cavity and Double Linear Cracks in Elastic Medium	p. 825
Dynamics Model and Control of Path Following of Wheel Mobile Robot	p. 829
Study on Computer-Aided Optimizing Milling Parameters of Numerical Control Machine	p. 833
Indirect Adaptive Generalized Predictive Control for an Autonomous Underwater Vehicle	p. 837
A Method for Numerical Solutions to Problems with Pipes under Unknown Forces and Constraint Conditions	p. 841
The Research of Processing Technique for Die-Pressing Based on FEA	p. 845
Research of Fatigue Limit and Stress Concentration on Structural Steel with Double-Notches	p. 849
Microstructure and Micro Mechanical Property of Part Formed by GMAW Surfacing Rapid Prototyping	p. 853
Development and Experimental Study of a Small Type Submarine Mower	p. 857
Studies and Application of Aquatic Processing Products Supply Chain Traceability System	p. 861
Bending Fatigue Design Method for Double Sides Loaded Gears	p. 865
