Advanced coatings on high temperature applications p. 1
Metal dusting reaction mechanisms p. 15
High temperature passive oxidation mechanism of CVD SiC p. 27
Void formation in magnetite scale formed on iron at 823 K-elucidation by chemical potential distribution p. 37
Transition from external to internal oxidation of single phase binary alloys p. 45
Behaviour of copper and nickel during high temperature oxidation of steel containing them p. 53
Modern analytical techniques in high temperature oxidation and corrosion p. 61
In situ study of real structure effects on the initial oxidation of FeCrAl alloys by two-dimensional high temperature x-ray diffraction p. 69
Oxidation of a low carbon, low silicon steel in air at 600-920[degrees]C p. 77
Micro-area analysis of the corrosion products formed on alloy 825 exposed to simulated waste incineration boiler conditions p. 87
Gas-tight oxides - reality or just a hope p. 93
Phase equilibria of the nickel-aluminium-chromium system at 1150[degrees]C p. 103
Initial oxidation rate law of binary alloys by hopping migration of cations p. 111
Current understanding of steam oxidation - power plant and laboratory experience p. 119
The role of alloy composition in the steam oxidation resistance of 9-12%Cr steels p. 129
Effects of hydrogen on the corrosion resistance of metallic materials and semiconductors p. 139
Beneficial effect of impurity sulfur on high-temperature steam oxidation of high chromium ferritic steels p. 147
TDS measurement of hydrogen released from stainless steel oxidized in H[subscript 2]O-containing atmospheres p. 163
Effect of chromium content on the oxidation behaviour of high-speed steels in dry and moist air environments p. 171
Steam oxidation of TP 347H FG in power plants p. 181
Hot corrosion and steam oxidation properties of new heat resistant steels for ultra super critical boilers p. 189
The relationship between high-temperature steam oxidation and hydrogen dissolution in high-chromium ferritic steels p. 197
Steam oxidation testing of coatings for next generation steam power plant components p. 205
Corrosion rate and oxide scale characteristics of austenitic alloys in supercritical water p. 213
Oxidation behavior of Pt+Hf-modified [gamma]-Ni +[gamma]'-Ni[subscript 3]Al alloys p. 221
Early-stage oxidation behavior of [gamma]'-Ni[subscript 3]Al-based alloys with and without Pt addition p. 229
2CaO [actual symbol not reproducible] SiO[subscript 2]-CaO [actual symbol not reproducible] ZrO[subscript 2] thermal barrier coating formed by plasma spray process p. 239
Fundamental coating development study to improve the isothermal oxidation resistance and thermal cycle durability of thermal barrier coatings p. 247
Preparation of high oxidation-resistant surface by molten salt electrodeposition p. 255
Strain tolerance and microstructure of thermal barrier coatings produced by electron beam physical vapor deposition process p. 267
Wet oxidation : a promising way for fabrication of zinc oxide nanostructures p. 277
Interdiffusion between Ni based superalloy and diffusion barrier coatings at 1423K p. 285
Interdiffusion behavior of electroplated platinum-iridium alloys on nickel-base single crystal superalloy TMS-82+ p. 293
Isothermal oxidation of Pt modified and Ru modified aluminide coating on a fourth generation single crystal superalloy p. 301
Development of an oxidation resistant coating on Nb-based ultra-high temperature alloy p. 309
Oxidation behavior of Ru-containing Ni-base single-crystal superalloys p. 317
Micro-/nano-crystal aluminized ODS coatings p. 323
Novel electrodeposited Ni-based nanocomposite precursors for nitriding and low temperature chromizing p. 331
Oxidation property of CoNiCrAlY coatings prepared by various thermal spraying techniques p. 339
In situ observation of failure behavior for plasma sprayed thermal barrier coating systems under static loadings p. 345
Environmental effect of hot corrosion on creep and fatigue failure of thermal barrier coating systems p. 353
Development of new bond coat system in Ni-base alloys p. 361
Effect of zirconium on cyclic-oxidation of Ni-40Cr-3Re alloys with [alpha]-Cr / [beta]-NiAl coatings p. 369
Formation of Ni aluminide layer containing La by molten-salt electrodeposition and cyclic-oxidation resistance p. 377
Effect of laser fusing on hot corrosion resistance of nickel based self fluxing alloy coating p. 385
Mechanical properties and adherence of oxide scales p. 393
The effect of oxide scale on the mechanical behavior of low alloyed steel at high temperature p. 401
Effect of scale microstructure on scale adhesion of low carbon sheet steel p. 409
Exfoliation and fracture behavior of oxide films formed on titanium and its alloys in high temperature environments p. 417
Interaction between mechanical loading in creep and reactivity of zirconium and zircaloy at temperature p. 425
Strains in thermally growing alumina films measured in situ using synchrotron X-rays p. 433
Quantitative adhesion energy values of chromia-rich thermal oxides on stainless steels determined by blister and tensile tests p. 441
The effects of steel composition on the oxidation kinetics, scale structure and scale-steel interface adherence of low and ultra-low carbon steels p. 451
Deformation and fracture behavior of surface oxide scale on Fe-13Cr alloy in hot-rolling process p. 461
Hardness of oxide scales on Fe-Si alloys at room- and high-temperatures p. 469
Oxidation behavior and scale properties of Si containing steels  p. 477
In Situ growth-stress measurement of Cr$_2$O$_3$ scale formed on stainless steels by Raman spectroscopy  p. 489
Effect of Cr content and water vapor on fracture behavior of the scales formed on Fe and Fe-Cr alloy  p. 497
Influence of cooling rate and steel composition on the scale failure characteristics during cooling of Si-containing low carbon steels  p. 505
Development and application of high Cr-high Si-Fe-Ni alloys to high efficiency waste-to-energy boilers  p. 513
Experiences with Inconel 625 in biomass and waste incineration plants  p. 523
Hot corrosion monitoring of waste incineration corrosion processes using electrochemical techniques  p. 531
Corrosivity of KCl(g) at temperatures above its dew point - initial stages of the high temperature corrosion of alloy sanicro 28 at 600[degrees]C  p. 539
Influence of chlorine, sulphur and water vapor on high temperature corrosion of Fe, Cr, Ni alloys for waste incinerators  p. 547
Effect of alloying elements on corrosion resistance of Ni-base cast alloys in waste incineration environments  p. 555
The influence of sulfur additions on the corrosive environments in a waste-fired CFB boiler  p. 563
An overview of metal dusting in synthesis gas environments  p. 571
The role of copper in resisting metal dusting of Ni-base alloys  p. 581
Numerical analysis and control of gas carburizing under changes in gas compositions  p. 589
Microstructures of SiO$_2$ scales formed on MoSi$_2$  p. 595
Oxidation rate of magnesia-carbon refractory with aluminium additive  p. 603
TEM observation of the initial stage oxidation of TiAl based alloys in a simulated combustion atmosphere  p. 609
Influence of the third element on the high temperature oxidation behavior of [gamma]-$^3$Ni$_3$Al alloys  p. 617
Influence of additional elements on the oxidation behaviour of Nb-Al-Cr base alloys  p. 625
Influence of ion implantation of several elements on oxidation behavior of TiAl  p. 633
Isothermal oxidation of sintered [beta]-FeSi$_2$ in air  p. 641
High temperature oxidation of TiAl-1.5wt.%Mn-(0, 5, 10)wt.%Y$_2$O$_3$ alloys  p. 649
Microstructure and oxidation of Al/BN composites fabricated by the pressureless infiltration method  p. 657
Effect of coatings on the creep and oxidation behavior of TiAl alloys at 1173K in air  p. 665
