Fracture Mechanics of Materials
Conference Information p. v
Preface p. ix

Fracture Mechanics
Length-Scale Effects in Nano- and Micro-Mechanics of Solids p. 1
Mechanism-Based Strain Gradient (MSG) Plasticity and the Associated Asymptotic Crack-Tip Fields p. 9
An Analysis of Fatigue Crack Growth Rate Considering Spatial Variation of Fatigue Crack Growth Resistance p. 19
Rectangular Array and Zig-Zag Array of Elliptical Holes in Solids under Uniaxial Tension (Formulae of Maximum Stresses and Tensile Stiffnesses) p. 25
Crack Growth in Stainless Steel 304AT 538[degree]C under Fatigue Loading with and without Hold Time p. 31
An Inverse Fracture Problem of a Shear Specimen with Double Cracks p. 37
Fracture Mechanics Analysis of Cracked Plate Repaired by Composite Patch p. 43
Fracture Toughness Test of Small CNS Specimen with an Interface Crack Subjected to Mixed-Mode Loading p. 49
Theoretical Investigation of Controllable and Regular Fracture Theory p. 55
Crack Identification Using Classical Optimization Technique p. 61
Study on Strength of Rock Material under Dynamic Triaxial Compressive Loads Based onp. 67
Sliding Crack Model
Kinking out of a Mixed Mode Interface Crack p. 73
Global Crack-Line Displacement Fitting Procedure: Edge Cracks p. 79
A Stochastic Modeling for Predicting Fatigue Crack Growth under Variable Amplitude Loading p. 85
A Highly Accurate BEM in Fracture Mechanics p. 91
Simulation and Experimental Verification of Axial Multi-Crack Propagation and Crack Kinking in Pressurized Fuselage p. 97
Calculation of Stress Intensity Factor Using Weight Function Method for a Patched Crack p. 103
Interaction of a Horizontal Finite Crack with a Center of Dilatation in Elastic Half-Planes p. 109
Determinations of Stress Intensity Factor in Isotropic and Anisotropic Body by the Photoelastic and Caustics Methods under Various Load Ratios p. 115
A Micromechanics Criterion for the Ductile Fracture of a Polycarbonate p. 121
Effect of Specimen Thickness and Load History on Crack Growth of 7175-T74 Forging Aluminum Alloy p. 127
Plastic [eta] Factors Based on Load-CMOD Records for SE(B) Toughness Testing Specimens p. 133
Electromagnetic Thermoelastic Solids with an Elliptical Cavity or a Crack under Uniform Heat Flow p. 139
Evaluation of Stress Intensity Factor Using White Light Photoelastic Experiment p. 145
Singularity Intensity Factor Calculation in Plates and Shells Based on the Singular Line Mapping Technique in FEMOL p. 151
Collective Evolution Characteristics and Computer Simulation of Voids Near the Crack Tip of Ductile Metal p. 157
The Relationship of SIF between Plate and Plane Fracture Problems and the Effect of the Plate Thickness on SIF
Fractographic Approach for Fracture Mode
Microscopic Deformation at a Crack Tip in a Ferroelectric Material
The Unified Description of the Three-Dimensional Fields at Notches and Cracks
Buckling and Fracture of Thin Films under Compression
Recent Advances in Three-Dimensional Fracture Mechanics
Static Magnetoelastic Coupling in Soft Ferromagnetic Elastic Solids with Collinear Cracks
A Study on Deformation Energy of P/M Copper and Ingot Material
Fracture Analysis on the Coating Crack Perpendicular to the Interface of BiMaterial

A Combined Model of Short Crack Closure Accounting for Both Plasticity and Roughness
Induced Crack Closures
Scattering of Plane Compressional Waves by a Spherical Inhomogeneity with a Linear Spring Type Interface
Dynamic Fracture
From Recent Studies on Impact Fracture of Polymers and Polymer Composites
Dynamic Stress Intensity Factors of Cylindrical Interface Cracks Subjected to P-Wave

Effects of Impact Loading Rate on the Delamination Behavior of Composite Laminates
Shock Adiabatics of Cement Mortar at Intense Dynamical Loading by Taking into Account the Internal Damage
A Study on the Impact Failure Mechanism of Aluminum-PMMA Interfacial Crack
Experimental Analysis of Dynamic Effects in Brittle Fracture of PMMA
Impact Damage Behavior and Evaluation of Residual Strength in Plain-Woven Glass/Epoxy Composites
Measurement of Dynamic Fracture Parameters in the Expansion Process at High Strain Rate
Evaluation of Large Strain in Ductile Polymers under High Speed Loading
Damages in Woven Polymer Matrix Composites under Impact Loading
Applications of the Shadow Spot Method on the Determination of Dynamic Stress Intensity Factors
High Strain-Rate Deformation of Composite Materials Using a Split Hopkinson Bar Technique
Experimental Studies on Dynamic Fracture Phenomena
The Fracture Problem of Framed Plate under Explosion Loading
Dynamic Mixed Mode Crack Propagation Behavior of Structural Bonded Joints
Analysis of a Crack in a Functionally Gradient Interface Layer under Static and Dynamic Loading
Fundamental Study of Dynamic Stress Wave Using a Dynamic Photoelastic Method
Using High-Speed Camera to Investigate Failure Waves in K9 Glass
A Study on Dynamic Fracture in Stiffened Cylinder Subjected to a Strong Acoustic Wave  p. 349

Computational Mechanics
Static and Mode Analyses of Composite Plates Using Modified 16-Node Solid Elements, and Prediction of Stiffness Errors Resulting from Reduced Integration  p. 355

Shape Optimization of General Structures  p. 361
Simulation of Crack Growth and Creep Fracture by a Multicrack Growth Model  p. 367
Dual-Phase Functionally Graded Composite Materials: Overall and Discrete Analysis Models  p. 373
A Study on Efficiency Improvement of Evolutionary Structural Optimization  p. 379
Numerical Simulation of Crack Elongation and Reinforcement Effectiveness of the Isolated Rockmass between Shiplocks of Three Gorges Project  p. 385
Out-Of-Plane ESPI Simulation for the Harmonic Vibration of a Thin Right-Angled Plate  p. 391

Element Modeling for Vibration Analysis of Plate  p. 397
Hierarchical Models for Laminated Composite Structures Based on p-Extensions  p. 403
Nonlinear Displacement Field in the Vicinity of Notch-Tip in Rubber Toughened PMMA  p. 409

Optimum Design for Fatigue Strength Improvement of Spot-Welded T-Type Bus Window Pillar Member  p. 415
Dynamic Response Analysis of a Structure under High Over-Load  p. 423
Nonlinear Analysis of Thick Composites with Fiber Waviness under Flexural Loading  p. 427

Fuzzy Mathematical Method for Evaluation of Rock Mechanical Indexes  p. 433
Topology Optimization of the Inner Reinforcement for an Automobile Hood Using Modal Design Sensitivity Analysis  p. 439
Computational Studies on Dynamic Fracture Phenomena  p. 445
Nonlinear Dynamic Buckling Analysis of a Grid Structure  p. 451
Dynamic Modeling and Numerical Analysis for Large Scale Chime Group  p. 457
Plastic Analysis of Square Grillage under A Point Load  p. 463
Finite Element Analyses of Specific Damping Capacity and Undamped/Damped Forced Motion of Composite Plate Using Modified 16-Node Solid Elements  p. 469
Stress Analysis for New Gasketless Flange and Superseal  p. 475
A Study on Stress Wave Propagation in Stiffened Cylinder Subjected to a Strong Acoustic Wave  p. 481
Element-Free Galerkin Methods for Fracture of Functionally-Graded Materials  p. 487
A Study on the Shape Design and Contact Characteristic of Wheel-Rail for Rolling Stock  p. 493
Stress Analysis of Toroidal Hole in an Infinite Body  p. 499
A Parametric Study on the Fracture Mechanics Analysis of Elbow with Surface Crack  p. 505
On the Multiple Isoparametric Finite Element Method and Computation of Stress Intensity Factor for Cracks in FGMs  p. 511
The Effect of a Longitudinal Stiffener on the Elastic Shear Buckling of Orthotropic Web Plate  p. 517
Interaction among a Row of N Semi-Elliptical Notches and Edge Cracks  p. 523
A Computational Investigation on Metal/Ceramic Joints under Thermal Cyclic Loadings  p. 529

Progressive Failure Analysis of Composite Laminates Using 3-D Finite Element Method  p. 535

The Influence of Plastic Deformation on Interface Fracture Behavior  p. 541

An Analysis of Ironing Limit in Sheet Metal Forming  p. 547

The Versatility of the Method of $K_{I}$, $K_{II}$ Analysis by FEM Based on the Stress Value at a Crack Tip  p. 553

Detecting Tool Wear in Face Milling with Different Workpiece Materials  p. 559

Three Dimensional Finite Element Analysis for Elastic Plastic Crack Propagation in Thin Metallic Plate  p. 565

Damage Mechanics

Study on the Bending Fatigue Damage of the Carbon and the Polypropylene Hybrid Fiber Reinforced Concrete  p. 571

The Effect of Aging Temperatures and Time on Mechanical Properties of CF8M  p. 577

Effect of Temperature on the Damage Behavior of an Adhesively Bonded Butt Joint  p. 583

Effect of Yield Strength and Crack Depth on COD-Decrease-Parameter $m$  p. 589

A Study on Intergranular Corrosion of Laser Treated Alloy 600 by DL-EPR Method and Microscopic Examination  p. 595

Damage of FRP Plates Containing Sharp Notches or Blunt Notches  p. 601

Radiation Damage of Reactor Pressure Vessel Steels Studied by Nondestructive Methods  p. 607

Reliability Calculation for Piping Containing Circumferential Crack Based on 3-D Elastic-Plastic SFEM  p. 613

Optimum Design of Linear Phased Array Transducer for NDE  p. 619

A Damage Model for Void Configuration and Failure under Different Constrained Deformation Region in Ductile Matrix  p. 625

Modeling of Mechanical Property Degradation by Short-Term Aging at High Temperatures  p. 631

On Failure Modes and Strength Characterization of Brittle Disordered Materials under Uniaxial Compression and Tension  p. 637

Influence of Tool Wear on Hole Damage in Small Diameter Drilling of Printed Wiring Boards-Investigation based on Estimation of Cutting Forces and Internal Damage  p. 643

Damage Tolerance Analysis Software (DATAS) for Crack Growth Life Prediction and Residual Strength Analysis of Aircraft Structures  p. 649

Prediction of Piping Failure Behavior using Wide-Plate Test  p. 655

Vibration Sensing and Impact Location Detection Using Optical Fiber Vibration Sensor  p. 661

New Estimates of Effective Moduli of Microcracked Materials  p. 667

Realization of Higher-Mode Deformation of Beams Using Shape Memory Alloy Wires and Piezoceramics  p. 673

Author Index  p. xxv

Keyword Index  p. xxxi

Behavior of Materials and Structure

Fracture Physics

Fracture and Strength of Solids Associated with their Textures  p. 679
Overview of Fracture of Piezoelectric Ceramics p. 695
Effect of Heat Treatment and Chemical Composition on Caustic Stress Corrosion p. 707
Cracking of Alloy 600 and Alloy 690
Nonlinear Evolution Properties of Rock Microfracturing Affected by Environment p. 713
Case Study on Fracture of Motor Whist Wire p. 719
The Propagation of a Layer-Confined Love Wave in Layered Piezoelectric Structures p. 725
Characteristics of Delamination in Graphite/Epoxy Laminates under Static and Impact Loads p. 731
An Experimental Observation About Dislocation Nucleation Based On Peierls Concept p. 737
Effect of Contact Shape on the Cracking Behaviour p. 743
Study of Fracture Origin on Low Cycle Fatigue of Spheroidal Graphite Cast Iron Having Various Matrixes p. 749
The Propagation Behavior of Love Waves in a Pre-stressed Piezoelectric Layered Structure p. 755
The Effect of Nucleation Time on the Growth of a Microvoid in a Viscoelastic Material p. 761
Effects of Stress Fields around Micro-Surface Defects on the Occurrence of Slip and Micro Cracks p. 767
Studies of Fracture of Piezoelectric Ceramics at HKUST p. 773
Tensile and Fracture Behaviors of PC/ABS Polymer Alloy p. 779
Influence of Stochastic Mesoscopic Structure on Macrosopic Mechanical Behavior of Brittle Material p. 785
Fracture and Strength of Notched Thick Composites p. 791
A Study on the Integrity Evaluation for PWR Vessel by Pressurized Thermal Shock p. 797
Crack Healing Behavior and Mechanical Property of Mullite/SiC Composite Ceramics p. 803
Multi-Crack Coalescence in Rock-Like Material under Uniaxial and Biaxial Loading p. 809
Effects of Temperature and Stacking Sequence on the Mode I Interlaminar Fracture Behavior of Composite Laminates p. 815
Effect of Remanent Polarization on Electro-mechanical Fields Near an Elliptic Cavity or a Crack in Piezoelectric Ceramics p. 821
Nano-Fractographic Estimation on the Profiles and Dimensions of Fatigue Striation p. 827
Strength of Crack-Healed Si[subscript 3]N[subscript 4]/SiC Composite Ceramics p. 833
Studies on the New Technique of Rapid Solidification and the Mechanical Behaviors of Mocrocrystalline Alloys p. 839
The Effects of Texture on K[subscript IH] in the Radial Direction in Zr-2.5%Nb Pressure Tube Materials p. 845
Influence of Grain Boundary Characteristics on Cavitation Behavior in P/M7475 p. 851
The Effects of Confining Compression on Fracture Coalescence in Rock-like Material p. 857
Fracture Toughness Enhancement Due to Stress/Strain-Induced Martensitic Transformations in Solids p. 863
Fracture Behavior of a Crack in Gas Pipeline Considering Constraint Effects p. 869
Numerical Analysis of Dimple Fracture Process under Different Constraint Conditions p. 875
Microstructure of the Carbon and the Polypropylene Hydrid Fiber Reinforced Concrete Acted by Bending and Tensile Stress. p. 881

Acoustic Emission Technique for Pipeline Leak Detection. p. 887

Fracture Behaviors of GFRP Plates Subjected to Impulsive Loading. p. 893

Fatigue and Creep

Fatigue Strength Decrease of Structural Materials Caused by Atmosphere Corrosion and Aging. p. 899

Creep Life and Properties Evaluation by ISM Method and Acoustic Emission for Cr-Mo-V Steels. p. 903

Expanding of the Fatigue Life of Thermal Barrier Coating by Mixing MoSi[subscript 2] to Thermal Sprayed Layer. p. 909

Effects of Pad Material on Fretting Fatigue Behavior in CFRP Laminates. p. 915

Study on Double Shot Peening and Fatigue Limit of Gear. p. 921

A Study on Probabilistic Fatigue and Calendar Fatigue Life. p. 927

Influence of Microstructures on Fatigue Limit of High Strength Ductile Irons. p. 933

Fretting Fatigue Behavior of Structural Steels. p. 939

Fatigue Failure Model for Composite Laminates under Multi-Axial Cyclic Loading. p. 945

A New Method to Deal with the Staircase Fatigue Test. p. 951

Fatigue Life Prediction of Spot-Welded Joint by Strain Energy Density Factor using Artificial Neural Network. p. 957

Fatigue Properties of Tungsten Fiber Reinforced Ti-6Al-4V Alloy. p. 963

Failure Analysis of the Fourth Compressor Pans in Aero-Engines. p. 969

Thermal Aging and Low Cycle Fatigue Characteristics of CF8M in a Nuclear Reactor Coolant System. p. 975

Study of Crack Propagation Behavior on Low Cycle Fatigue in Spheroidal Graphite Cast Iron Based on Observation of Surface and Fracture Section. p. 981

Cyclic Softening Properties of 30Cr2MoV Steel at Elevated Temperatures. p. 987

A Study on the Corrosion Fatigue Characteristics of 12Cr Alloy Steel. p. 993

Corrosion Fatigue Crack Initiation Life of a Ship Structural Steel in Dilute Sulfuric Acids. p. 999

An Analysis of Random Fatigue Strength of K-Type Tubular Joints by Probabilistic Fracture Mechanics Method. p. 1005

Fatigue Life Prediction of Bolted Joints Using Fatigue Modulus. p. 1011

Study of Crack Propagation Behavior on Low Cycle Fatigue in Squeeze Cast Aluminium Alloy. p. 1017

Reliability Analysis of Ship Hull Girders Considering the Degradations of Corrosion and Fatigue. p. 1023

Fatigue Analysis of Vane Components for Gas Turbine Engine. p. 1029

Fatigue Crack Growth Simulation and Estimation for Rolling Contact. p. 1035

The Effect of Tensile Hold Time on the Fatigue Crack Propagation Behavior in STS 316L. p. 1041

Fatigue Strength of Crack-Healed Ceramics. p. 1047

Polymer and Polymer Composites

Fracture Behaviours of Advanced Polymer Composites under Mixed Mode Loading. p. 1053

Interface Adhesion and Interlaminar Fracture Resistance of Carbon/PEEK Composites influenced by Cooling Rate. p. 1063
Nondestructive Evaluation of Degree of Fiber Waviness in Thick Composites

The Damage Evaluation of Rigid Particle Filled Polymer

Microstructural Morphology of Molded Thin Composites of Thermotropic Liquid Crystalline Polymer and Polyamide 6

Optimization of Molding Cure Condition on Al 7075/CFRP Sandwich Composite by the Taguchi Method

An Application of Localized Flexibility Method to Damage Identification in CFRP Laminated Plate

Crush Energy Absorbing Characteristics of Graphite/Epoxy Square Tubes

Surface Modification of Carbon Fibers by Anodic Oxidation and its Effect on Adhesion

The Bridging Analysis of Dynamic Crack Propagation in Fiber Reinforced PE Pipelines

Optimum Stacking Sequence Design of Fiber-Metal Laminates for Using Genetic Algorithm

A Thermomechanical Analysis of MCM-D Substrate of Polymer and Metal Multilayer

Failure Behavior and Electrical Property of CFRP and CFGRFP

Elastic Restraint between the Plate Components of FRP Compression Members

Mixed-Mode Ply Cracking in Multidirectional Continuous Fiber Composite Laminates

Axial Crush and Energy Absorption Characteristics of Aluminum/GFRP Hybrid Square Tube

Mechanical Behavior of Carbon/Phenolic Ablative Composites for Nozzle Application

Fracture Pattern and Lamination Configuration on Flexural Fracture of Multiple Layer CFRP

Strength Prediction of Mechanical Joints in Laminated Composite Plates

Crystallinity and Mechanical Properties of Glass Fiber Reinforced Thermoplastic Composites by Rapid Press Consolidation Technique

Fractography of Damaged Carbon Fiber/Epoxy Composites after Low-Velocity Impact

Anisotropic Mechanical Behavior of Three Dimensional Glass Fabric Reinforced Composites

Prediction of Compressive Strength of Stiffened Composite Plate after Impact

Void Nucleation Models and their Implications for the Material Behavior of Rubber-Modified Epoxies

On-line Frequency Estimation and Adaptive Vibration Control of Composite Structures with Delaminations

Metals, MMCs, Ceramics and CMCs

Strength and Fracture of Cu-Based Filamentary Nanocomposites

Modeling of Thermal Shock Spalling Crack in a Ceramic Slabs

Analytical Study of Prestrain Effects on Elastic Properties in Shape Memory Alloys

A Study on the Friction and Wear Characteristics of Brake Pads for Al MMC Brake Disc

On Targets Strength of Ceramic Materials for Impacting Penetration

Effects of Heat Treatment on Bending Strength of Aluminum Alloy Matrix Composites Reinforced Aluminum Borate Whisker

Mechanical Properties of Tungsten Fiber Reinforced Ti-6Al-4V Alloy
