SiC Bulk Growth
Large Diameter, Low Defect Silicon Carbide Boule Growth p. 3
SiC Single Crystal Growth by Sublimation: Experimental and Numerical Results p. 7
Impact of SiC Source Material on Temperature Field and Vapor Transport During SiC PVT p. 11
Crystal Growth Process
Defect Reduction in Sublimation Grown Silicon Carbide Crystals by Adjustment of Thermal Boundary Conditions p. 15
Progress in 4H-SiC Bulk Growth p. 21
Stability Criteria for 4H-SiC Bulk Growth p. 25
Growth Related Distribution of Secondary Phase Inclusions in 6H-SiC Single Crystals p. 29

Investigation of a PVT SiC-Growth Set-up Modified by an Additional Gas Flow p. 33
Mass Transport and Powder Source Evolution in Sublimation Growth of SiC Bulk Crystals p. 37

Some Aspects of Sublimation Growth of SiC Ingots p. 41
Growth of Highly Aluminum-Doped p-type 6H-SiC Single Crystals by the Modified Lely Method p. 45
Study of Boron Incorporation During PVT Growth of p-type SiC Crystals p. 49
Features of Semi-Insulating SiC Single-Crystal Growth by Physical Vapor Transport p. 53

Virtual Reactor: A New Tool for SiC Bulk Crystal Growth Study and Optimization p. 57
Coupled Thermodynamic - Mass Transfer Modeling of the SiC Boule Growth by the PVT Method

Numerical Simulation of Thermal Stress Formation During PVT-Growth of SiC Bulk Crystals p. 65
Crystal Growth of 15R-SiC and Various Polytype Substrates p. 69
Micropipe Filling by the Sublimation Close Space Technique p. 73
Mechanism for Damage Healing of Cracked 6H-SiC Substrates by the Sublimation Method p. 77

Chemical Vapor Deposition of SiC by the Temperature Oscillation Method p. 81
Aluminium-Silicon as a Melt for the Low Temperature Growth of SiC Crystals p. 85
SiC Epitaxy and Thin Film Growth

Homoeptaxial Growth
Epitaxial Growth of 4H-SiC in a Vertical Hot-Wall CVD Reactor: Comparison between Up-Flow and Down-Flow Orientations p. 91
Influence of the Growth Conditions on the Layer Parameters of 4H-SiC Epilayers Grown in a Hot-Wall Reactor p. 95
Enlarging the Usable Growth Area in a Hot-Wall Silicon Carbide CVD Reactor by Using Simulation p. 99
Modeling Analysis of SiC CVD in a Planetary Reactor p. 103
Influence of Silicon Gas-to-Particle Conversion on SiC CVD in a Cold-Wall Rotating-Disc Reactor p. 107
Ab Initio Study of Silicon Carbide: Bulk and Surface Structures p. 111
SiC Defect Density Reduction by Epitaxy on Porous Surfaces p. 115
Morphology of Sublimation Grown 6H-SiC(0001) Surfaces p. 243
Germanium on SiC(0001): Surface Structure and Nanocrystals p. 247
Origin of the Excellent Thermal Stability of Al/Si-Based Ohmic Contacts to p-Type LPE 4H-SiC p. 251
Ion-Irradiation Effect on the Ni/SiC Interface Reaction p. 255
Structure and Diffusion
Analysis of Strain and Defect Formation in Low-Dimensional Structures in SiC p. 259
Source Material Related Distribution of Defects in 6H-SiC Single Crystals p. 263
Characterization of 2 Inch SiC Wafers Made by the Sublimation Method p. 267
Ion Bombardment Induced Damage in Silicon Carbide Studied by Ion Beam Analytical Methods p. 271
Effects of Hydrogen Implantation and Annealing on the Vibrational Properties of 6H-SiC p. 275
4H- and 6H-SiC Rutherford Back Scattering-Channeling Spectrometry: Polytype Finger Printing p. 279
X-ray Diffraction, Micro-Raman and Birefringence Imaging of Silicon Carbide p. 283
X-Ray Diffraction Line Profile Analysis of Neutron Irradiated 6H-SiC p. 287
High-Resolution XRD Evaluation of Thick 4H-SiC Epitaxial Layers p. 291
Defect Analysis of SiC Sublimation Growth by the in-situ X-Ray Topography p. 295
Crystal Defects as Source of Anomalous Forward Voltage Increase of 4H-SiC Diodes p. 299
A Simple Non-Destructive Technique to Detect Micropipes in Silicon Carbide p. 303
Micropipe and Macrodefect Healing in SiC Crystals during Liquid Phase Processing p. 307
Micropipe Closing via Thick 4H-SiC Epitaxial Growth Involving Structural Transformation of Screw Dislocations p. 311
Growth Evolution of Dislocation Loops in Ion Implanted 4H-SiC p. 315
Lattice Parameter Measurements of 3C-SiC Thin Films Grown on 6H-SiC(0001) Substratep. 319
Crystals
Self Diffusion in SiC: the Role of Intrinsic Point Defects p. 323
Modeling of Boron Diffusion in Silicon Carbide p. 327
Quantitative Modeling of Hydrogen Diffusion and Reactivation of H-Passivated Al-Acceptors in SiC p. 331
Optical Properties
Optical Characterization of SiC Materials: Bulk and Implanted Layers p. 335
Line Broadening of Phonons in the Raman Spectra of Isotopically Disordered SiC p. 341
Micro-Raman and Photoluminescence Study on n-type 6H-SiC p. 345
Low-Frequency Vibrational Spectroscopy in SiC Polytypes p. 349
Free Carrier Diffusion in 4H-SiC p. 353
Valence Band Splittings of 15R-SiC Measured using Wavelength Modulated Absorption Spectroscopy p. 357
Zeeman Effect of D[subscript 1] Bound Exciton in 4H-SiC p. 361
As-Grown and Process-Induced Intrinsic Deep-Level Luminescence in 4H-SiC p. 365
Characterization of SiC:P Prepared by Nuclear Transmutation Due to Neutrons p. 369
Presence of Hydrogen in SiC p. 373
