Preface
Introduction
Biomechanics of the Knee
Catastrophic Tibial Polyethylene Failure Leading to Revision of Total Knee Arthroplasty
Alternatives to Total Knee Arthroplasty
Patient Selection and Indications for Total Knee Replacement
Preoperative Planning and Templating
Surgical Technique of Posterior Cruciate Sacrificing, and Preserving Total Knee Arthroplasty
Revision Total Knee Arthroplasty: Surgical Technique
Results of Total Knee Arthroplasty Using Older Constrained Implant Designs
Results of Total Knee Arthroplasty Using Older Nonconstrained Implant Designs
Posterior Cruciate-Retaining Condylar Designs: Results of Cemented Arthroplasty
Posterior Cruciate-Sacrificing Total Knee Replacement
Posterior Stabilized Knee Arthroplasty
Total Knee Replacement with Newer Constrained Designs
Unicompartmental Knee Replacement
Results of Revision Total Knee Arthroplasty
Complex Wound Closure Following Total Knee Arthroplasty
Management of Bone Defects
Custom Total Knee Arthroplasty
Cementless Total Knee Arthroplasty
Sepsis Following Total Knee Arthroplasty
Medical Management of Total Knee Arthroplasty Infection
Extensor Mechanism Complications
Wound Healing Complications
Deep Venous Thrombosis After Total Knee Surgery
Neurovascular Complications of Total Knee Arthroplasty
Postoperative Management and Rehabilitation Following Total Knee Arthroplasty
Modular Total Knee Systems
Material Considerations
