Contributing Authors
Preface
Acknowledgments
Regeneration in Alzheimer Disease and Aging p. 1
The Histopathology of Neuronal Degeneration and Plasticity in Alzheimer Disease p. 5
Adaptive Versus Pathological Plasticity: Possible Contributions to Age-Related Dementia p. 35
Connections Among Plasticity, Regeneration, and Aging at the Neuromuscular Junction p. 47
The Role and Repair of Forebrain Cholinergic Systems in Short-Term Memory: Studies Using the Delayed Matching-to-Position Task in Rats p. 53
Myelin Injury and Repair p. 67
Observations on the Pathology of Human Spinal Cord Injury: A Review and Classification of 22 New Cases with Details from a Case of Chronic Cord Compression with Extensive Focal Demyelination p. 75
Remyelination, Revascularization, and Recovery of Function in Experimental Spinal Cord Injury p. 91
Essential Prerequisites for Remyelination of Oligodendrocytes: Division, Motility, and Structural Rearrangement p. 105
Source of Remyelinating Oligodendrocytes p. 113
The Role of Astrocytes in the Remyelination of Glia-free Areas of Demyelination p. 125
Dynamic Aspects of Sodium Channel Expression in Astrocytes p. 135
Spinal Cord Injury: Physiology and Transplantation p. 157
Adaptive Plasticity in Spinal Cord p. 163
Inhibitory Control of Reflex Excitability Following Contusion Injury and Neural Tissue Transplantation p. 175
Intraspinal Transplants of Catecholamine-Containing Cells and Fetal Spinal Cord and Iris tissues in the Adult Rat p. 185
Steroid Hormones and Neuronal Regeneration p. 199
Distribution and Regulation of Steroid Hormone Receptor Gene Expression in the Central Nervous System p. 207
Gonadal Steroids and Neuronal Regeneration: A Therapeutic Role p. 227
The Effects of Glucocorticoid and Nonglucocorticoid Steroids on Acute Neuronal Degeneration p. 241
Strategies for the Development of New and Better Pharmacological Treatments for Acute Spinal Cord Injury p. 249
Regulatory Genes in Regeneration and Plasticity p. 257
The Role of Immediate Early Genes in the Regeneration of the Central Nervous System p. 263
Early Response Genes as Markers of Neuronal Activity and Growth Factor Action p. 273
A fos-lac Z Transgenic Mouse That Can Be Used for Neuroanatomic Mapping p. 285
Stress (Heat Shock) Protein Accumulation in the Central Nervous System: Its Relationship to Cell Stress and Damage p. 293
The Function of Phagocytic Cells in the Nervous System p. 305
Macrophage Responses to Central and Peripheral Nerve Injury p. 309
Microglial Secretion Products and Their Impact on the Nervous System p. 315
Microglia, an In Vivo Source of Reactive Oxygen Species in the Brain p. 321
Macroglial Functional Properties During Myelin Degradation p. 327
Novel Major Histocompatibility Complex Expression by Microglia and Site-specific Experimental Allergic Encephalomyelitis Lesions in the Rat Central Nervous System After Optic Nerve Transection p. 337
Expression of Monocyte/Macrophage Growth Factors and Receptors in the Central Nervous System p. 349
Subject Index p. 362
