

Preface

List of Participants

Chaos

The Origin and Structure of the Plasmasheet due to Stochastic Motion and Plasma Instabilities	p. 3
Nonlinear Dynamics of Charged Particles in Field-Reversed Current Sheets	p. 27
Particle Chaos in the Earth's Magnetotail	p. 54
Chaotic Ion Motion in Slow Shocks	p. 104
Nonlinear Dynamics of Space Plasmas and Predictive Modeling	p. 140
Ionospheric Waves and Turbulence	
Path Integral Approach to Stochastic Systems Near Self-Organized Criticality	p. 165
Investigation of Strong Langmuir Turbulence in Ionospheric Modification	p. 172
Ionospheric Langmuir Turbulence Produced by Powerful HF Radio Transmissions	p. 207
Nonlinear Radio Emission Processes in Planetary Magnetospheres	p. 229
Lower Hybrid Collapse and Charged Particle Acceleration	p. 252
Nonlinear Beam Motion During HF Ionospheric Heating	p. 256
Alfven Waves and Collisionless Shocks	
Evolution of Finite Amplitude Alfven Waves in Space Plasmas	p. 275
The Nonlinear Evolution of Quasiparallel Alfven Waves	p. 284
Unsteady and Reforming Quasi-Parallel Collisionless Shocks	p. 289
Nonlinear Interaction Between Ions and MHD Waves at Cyclotron Subharmonic Frequencies	p. 309
Waves and Instabilities	
Nonlinear Dynamical Models of Storage-Release Plasma Systems	p. 321
Effective Saturation of Absorption in a Magnetospheric Plasma Maser	p. 339
Acceleration of Electrons and Ions by Nonlinear Lower-Hybrid Waves	p. 347
Nonlinear Wave-Wave and Wave-Particle Interaction in Space Plasma	p. 361
Astrophysical Plasmas	
Electromagnetic Wave Scattering by Charged Dust in Plasmas	p. 385
Cosmic Ray Acceleration by Shocks: The Similarities and the Differences with the Problem of Cometary Ions Acceleration in the Solar Wind	p. 402
Turbulent Relaxation in Space Plasma	p. 443
Ionospheric Waves and Laboratory Plasmas	
Space Plasma Physics in the Laboratory	p. 449
Self-Organization of Space and Laboratory Plasmas	p. 464
Catalytic Destruction of Ozone by Chlorofluorocarbons and Partial Restoration by Methane in Large Laboratory Experiments	p. 468
Abstracts	
The Structure of the Dissipation Region during Magnetic Reconnection in Collisionless Plasma	p. 495
Space and Time Dependence of Strong Langmuir Turbulence Excited by HF Modification of the Ionosphere	p. 496
Index of Contributors	p. 497
