History of Development and Applications of Nuclear Analytical Methods in the Czech Republic

Methodology of Nuclear Analytical Methods

Nuclear Analytical Methods in the Life Sciences

Use of k0-NAA in the Life Sciences

Application of Short-Lived Radionuclides in Neutron Activation Analysis of Biological and Environmental Samples

Analytical Applications of Guided Neutron Beams

Developments in Tomographic Methods for Biological Trace Element Research

Use of Total Reflection X-Ray Fluorescence Analysis in the Life Sciences

Applications of PIXE in the Life Sciences

Radiotracer Method in the Study of Environmental Speciation and Migration of Contaminants

Comprehensive RNAA of Cadmium Cobalt Nickel and Copper Using 109Cd 57Co and Reactor-Produced 67Cu as Radioisotopic Yield Monitors

Enhanced Sensitivity for the Determination of Selenium by INAA

Effects of Target Temperature on Analytical Sensitivities of Cold-Neutron Capture Prompt g-Ray Activation Analysis

Use of 191Pt Radiotracer for the Development of Enrichment Procedures to Detect Natural Levels of Platinum in Biological and Environmental Materials

Determination of Cobalt in Biological Samples by Radiochemical Neutron Activation Analysis Employing Reversed-Phase Chromatography

Advanced Short-Lived Nuclide NAA with Application in the Life Sciences

Application of Nuclear Analytical Techniques Using Long-Life Sealed-Tube Neutron Generators

Optimization of Irradiation Conditions for Photon Activation Analysis of Biological and Environmental Samples Using a High Power Electron Accelerator

Environmental Applications

Use of Nuclear Analytical Techniques in Bioenvironmental Studies

Nuclear Analytical Techniques in Environmental Studies

Studies of Incinerator Ashes and Environmental Effects Using Radioanalytical Techniques

Study of a Low-Selenium Environment in China by INAA and Mössbauer Spectrometry

Analysis of Membrane Filters and Thick Fly Ash Samples by PIXE

Rubidium and Cesium in Spruce Needles: Concentrations and Biodynamics

Heavy Metals in Parmelia sulcata Collected in the Neighborhood of a Coal-Fired Power Station

Metal Determination by EDXRF in Lichens: A Contribution to Pollutants Monitoring

Energy-Dispersive X-Ray Fluorescence Analysis Applied to Biomonitoring on Alps

A Survey of Trace Elements in Fresh-Water Fish and Rice Along the Han River by Neutron Activation Analysis

The Accumulation and Distribution of Trace Metals in Some Localized Marine Species

Determination of Antimony in Natural Waters by Preconcentration on a Chelating Sorbent Followed by Instrumental Neutron Activation Analysis
Investigation of Element Speciation in Atmosphere
Determination of Heavy Metals in Humic Substances by Instrumental Photon Activation Analysis
Accumulation of Cesium and Radiocesium in Forest Litter in Selected Regions of Poland and Its Influence on Litter-to-Mushroom Transfer Factor
The Radioanalytical Laboratory at Pelindaba: Some Applications for Environmental and Health Monitoring
Biomedical Applications
Application of Nuclear Analytical Methods in the Investigation and Identification of New Selenoproteins
Detection and Determination of Selenoproteins by Nuclear Techniques
A Study on Children’s Condition Thalassemia Using Neutron Activation Analysis and Other Techniques
Kinetics of Elemental Content Changes of Bone Tissue of Mice During Evolution Under Hypokinetic Stress
Determination of Sodium-to-Calcium Ratio in Mouse Femora by INAA
Vanadium Levels in Urine and Cystine Levels in Fingernails and Hair of Exposed and Normal Persons
Hair Trace Elements in Kidney Dialysis Patients by INAA
Determination of Platinum by Neutron Activation Analysis in Nerve Tissue from Rats Treated with Cisplatin
Study of Trace Elements in Blood of Cancer Patients by Proton-Induced X-Ray Emission (PIXE) Analysis
Elemental Concentrations in Nigerians with Affective Disorders Using Proton-Induced X-Ray Emission
Trace Element Content in Breasts with Fibrocystic Disease
