Foreword

T-Cell Receptor V-Region Usage and Antigen Specificity: The Cytochrome c Model System... p. 1

T-Cell Receptor Usage of Major Histocompatibility Complex Class I Restricted Peptide-Specific T-Lymphocytes p. 12

Oligoclonality in the CD8+ T-Cell Population: Analysis Using a Multiplex PCR Assay for CDR3 Length p. 19

The Influence of Genetics, Environment, and Disease State on the Human T-Cell Receptor Repertoire p. 28

T-Cell Repertoires in Health and Disease p. 53

Dual Receptor T-Cells: Implications for Alloreactivity and Autoimmunity p. 66

Environmental and Genetic Factors Shape the Human T-Cell Receptor Repertoire p. 71

Forces Molding Circulating T-Cell Repertoires: Thymic Events Studied by Recombination Analysis p. 81

Evidence for Preferential Recombination Events in Normal Human T-Cell Repertoires p. 87

Frequency of Human [actual symbol not reproducible] Cells Correlates with Polymorphism in Recombination Signal Sequences p. 90

Preferential Expression of the Human V[beta]7.1 Gene Segment on CD8+ Peripheral Blood Lymphocytes p. 94

Variability in CD8+ T-Cell Oligoclonality Patterns in Monozygotic Twins p. 96

Improvements in Repertoire Analysis by CDR3 Size Spectratyping: Bifamily PCR p. 99

Monoclonal Antibodies to Human T-Cell Receptor Variable [beta] Regions p. 106

Bacterial Toxin Superantigens Stimulate All Members of Susceptible VB Gene Families p. 110

Evidence for an Endogenous Superantigen Deleting Human V[beta]2 Positive T-Lymphocytes p. 113

Construction of a Superantigen through a Structural Modification of an Inactive Protein p. 117

Generation of a Panel of Transfected Murine Cells Expressing Human V[beta]: Application to the Study of Fine Specificities of Superantigens p. 120

Human T-Cell Receptor Gene Nomenclature p. 124

Expansions of V[alpha]12 CD8+ T-Cells in Rheumatoid Arthritis p. 130

V-Genes of T-Cell Receptors in Rheumatoid Arthritis p. 138

T-Cell Receptor Use in Early Rheumatoid Arthritis p. 147

T-Cell Receptor V[beta] Gene Utilization in Rheumatoid Arthritis p. 159

The Role of T-Cell Receptor [beta] Chain Genes in the Susceptibility to Rheumatoid Arthritis p. 173

Analysis of the Peripheral Blood T-Cell Receptor Repertoire in Monozygotic Twins Discordant for Rheumatoid Arthritis p. 176

CDR3 Length Restriction of T-Cell Receptor [beta] Chains in CD8+ T-Cells of Rheumatoid Arthritis Patients p. 179

T-Cell Receptor [gamma]/[delta] Usage in Rheumatoid Arthritis: Persistence of Oligoclonality in the Periphery p. 183
Unstimulated Rheumatoid Synovial T-Cells Have a Consistent V[beta] Gene Bias when Compared to Peripheral Blood T-Cells

Analysis of Synovial Fluid T-Cell Repertoires by CDR3 Size Spectratyping Reveals Possible Antigen and Superantigen Stimulation

Characterization of Oligoclonal Synovial T-Cells in Rheumatoid Arthritis

Oligoclonal T-Receptor (V[beta]) Use in the Response to Connective Tissue Antigens by Synovial Fluid T-Cells from Rheumatoid Arthritis Patients

Use of T-Cell Receptor V Genes in Synovial Membrane in Rheumatoid Arthritis

T-Cell Receptor V[beta] Gene Usage in Rheumatoid Synovial Follicles

High Frequencies of Identical T-Cell Clonotypes Accumulating in Different Areas of Synovial Lesions of Rheumatoid Arthritis Patients

V[beta]17 T-Cell Receptor Peptide Vaccine: Results of a Phase I Dose-Finding Study in Patients with Rheumatoid Arthritis

Comparison of Epitope Specificity and T-Cell Receptor Usage in Response to Type II Collagen Immunization between H-2[superscript q] and H-2[superscript r] Mice

Effect of Constrained T-Cell Receptor Repertoires on Collagen-Induced Arthritis in T-Cell Receptor V[beta] Transgenic and Congenic Mice

Limited Heterogeneity in T-Cell Receptor V[beta] Chain Gene Expression in Arthritic Joints of BUB/BnJ (H-2[superscript q]) Mice - A T-Cell Receptor [actual symbol not reproducible] Strain

Restricted T-Cell Receptor Usage in DA Rats during Early Collagen-Induced Arthritis

Anti-T-Cell Receptor Peptide Specific T-Cells and Adjuvant Arthritis

T-Cell Receptor Use in Rheumatoid Arthritis

T-Cell Receptor Genes: Germline Polymorphisms and Genetic Susceptibility to Demyelinating Diseases

A Review of T-Cell Receptors in Multiple Sclerosis: Clonal Expansion and Persistence of Human T-Cells Specific for an Immunodominant Myelin Basic Protein Peptide

T-Cell Receptor Use in Multiple Sclerosis

Unique T-Cell Receptor Junctional Sequences Found in Multiple Sclerosis and T-Cells Mediating Experimental Allergic Encephalomyelitis

The Relationship between Human Multiple Sclerosis and Rodent Experimental Allergic Encephalomyelitis

The T-Cell Receptor in Multiple Sclerosis

Characterization of T-Cell Receptor [actual symbol not reproducible] Usage in the Brain of a Subject with Multiple Sclerosis

DNA Sequence and Polymorphism Analysis of a Region of the T-Cell Receptor [beta] Locus Thought to Contain a Susceptibility Gene for Multiple Sclerosis

Clonal Dominance of CD8+ T-Cells in Multiple Sclerosis

Limited Restriction in [alpha][beta] T-Cell Receptor Usage of T-Cell Clones Specific for Myelin Basic Protein (a.a. 84-102) and hsp65 (a.a. 3-13) Peptides within Major Histocompatibility Complex-Identical Individuals
T-Cell Receptor Expression in the Thymus from Patients with Myasthenia Gravis p. 438
T-Cell Receptor Repertoire in Pulmonary Sarcoidosis p. 441
Use of a Polymorphic Dinucleotide Repeat DNA Marker in a T-Cell Receptor V[beta] Gene to Identify a Distinct Subset of Pauciarticular-Onset Juvenile Rheumatoid Arthritis Patients

V[beta]-Specific Activation of T-Cells by the HIV Glycoprotein gp 160 p. 447
T-Cell Receptor [actual symbol not reproducible] Gene Usage in Experimental Autoimmune Thyroiditis p. 450
T-Cell Receptor Use in Organ-Specific Human Autoimmune Diseases Other Than Rheumatoid Arthritis and Multiple Sclerosis: Summary and Overview p. 453
Index of Contributors p. 461
