Computer Architectures and Programming Models for Scalable Parallel Computing p. 1
Array-Data Flow Analysis and its Use in Array Privatization p. 2
Automatic Array Alignment in Data-Parallel Programs p. 16
A Novel Framework of Register Allocation for Software Pipelining p. 29
Call by Name, Assignment, and the Lambda Calculus p. 43
On the Orthogonality of Assignments and Procedures in Algol p. 57
Imperative Functional Programming p. 71
Communicating Reactive Processes p. 85
Semantics for Communication Primitives in a Polymorphic Language p. 99
A Concurrent, Generational Garbage Collector for a Multithreaded Implementation of ML p. 113
Separating Stages in the Continuation-Passing Style Transformation p. 124
Specifying the Correctness of Binding-Time Analysis p. 137
A Natural Semantics for Lazy Evaluation p. 144
An Introduction to Logical Relations and Parametric Polymorphism p. 155
Formal Parametric Polymorphism p. 157
Relational Parametricity and Local Variables p. 171
Algebraic Reasoning and Completeness in Typed Languages p. 185
Graph Types p. 196
Explicit Polymorphism and CPS Conversion p. 206
Polymorphism by Name for References and Continuations p. 220
Efficient Flow-Sensitive Interprocedural Computation of Pointer-Induced Aliases and Side Effects p. 232
Automatic Generation and Management of Interprocedural Program Analyses p. 246
Static Single Assignment for Explicitly Parallel Programs p. 260
Constructing Call Multigraphs Using Dependence Graphs p. 273
Safe Type Checking in a Statically-Typed Object-Oriented Programming Language p. 285
Object-Oriented Programming without Recursive Types p. 299
A Constructive Logic of Multiple Subtyping p. 313
Stratified Functional Programs and Computational Complexity p. 325
The 3 R's of Optimizing Constraint Logic Programs: Refinement, Removal and Reordering p. 334
Layer Sharing: An Improved Structure-Sharing Framework p. 345
Differential Logic Programming p. 359
Evicted Variables and the Interaction of Global Register Allocation and Symbolic Debugging p. 371
Incremental Program Testing Using Program Dependence Graphs p. 384
Complexity of Bi-Directional Data Flow Analysis p. 397
Type Checking Type Classes p. 409
Efficient Recursive Subtyping p. 419
A Sort Inference Algorithm for the Polyadic Pi-Calculus p. 429
Smartest Recompilation p. 439
Compositional Analysis of Modular Logic Programs p. 451
