Message from the Conference Chair p. 2
Conference Committee p. 3
Message from the Program Chair p. 4
Program Committee p. 5
TRI-Ada ’93 Call for Participation p. 6
TRI-Ada ’94 Call for Participation p. 10
Author Index p. 427
(Panel): Building Safety Critical Systems p. 17
Using X With the Ada Mindset p. 20
Ada/X Window System Bindings: Conversion Strategies p. 29
Porting Application Between Two Commercial Ada/Motif Bindings p. 37
A Model for Analyzing Megaprogramming, Reuse, and Domain Specific Software Architectures p. 58
A Case Study in Process Definition p. 65
A Project Support Environment Reference Model p. 82
Software First: Applying Ada Megaprogramming Technology to Target Platform Selection Trades p. 90
(Panel): The Future of Software Development p. 103
(Panel): Reuse Library Interoperability Group (RIG): Purpose and Progress p. 105
A Controlled Experiment with Software for Teaching Ada Tasking p. 116
Object-Oriented Design and Automatic Ada Code Generation in the Education of Software Engineers p. 126
Software Reuse: A Context for Introducing Software Engineering Principles in a Traditional Computer Science Second Course p. 137
(Panel): ASIS: Tools with a View or Exposing Ada p. 147
(Panel): Capability Evaluations p. 153
(Panel): Early Experiences with Ada 9X Program Organization p. 155
(Panel): Teaching Ada by the Book: The Pedagogy of Ada in CS1 p. 161
The Feasibility of Domain Specific Software Reuse for Electronic Warfare Systems p. 170
Demonstrable Fault Tolerance for Distributed Ada p. 180
Observations on Program-Wide Ada Exception Propagation p. 189
(Panel): Scoping DoD Domains for Software Reuse p. 197
Ada 9X and CASE: A Methods Perspective p. 200
(Panel): Professionalism in Software p. 211
Implementing Ada 9X Features using POSIX Threads: Design Issues p. 214
Integrating Inheritance and Synchronization in Ada 9X p. 229
A Distributed Shared Virtual Memory for Ada 83 and Ada 9X Applications p. 242
(Panel): Managing Software Projects with Metrics p. 253
(Panel): Reuse Acquisition Models p. 259
(Panel): Dialog on Software Engineering and Ada p. 261
An Integrated Tool Environment for Ada Compiler Validations p. 268
Towards Target-Level Testing and Debugging Tools for Embedded Software
(Panel): Reuse Metrics
Automating the Ada Programming Process: A Domain-Specific Approach
Platform Independent Translations for a Compilable Ada Abstract Syntax
Ada Abstraction, Generation, Verification
(Panel): Economic Benefits of Process Improvement
(Panel): STARS: Impact of Megaprogramming on Systems Engineering, Process, and Future Competitiveness
The Development of Software in the Ada Language for a Mid-Range Hematology Analyzer
A Universal Delogger Using the Ada Semantic Interface Specification (ASIS)
The Aladdex Operating System for the Aladdin Multiprocessor
CASE Tool Architecture for Knowledge-Based Regression Testing
Visual Conventions for System Design using Ada 9X: Representing Asynchronous Transfer of Control
ROMAN 9X: A Technique for Representing Object Methods in Ada 9X Notation
(Panel): Re-Engineering, Reverse Engineering, and Conversion of Legacy Systems to Ada
(Panel): Ada 9X Compilers - How Soon and How Good
