Message from the Chairs
Conference Committees
Computing Week '94 Steering Committee
Technical Papers Committee
Paper Referees

A Rapid Prototyping System for Real Time Systems  p. 7
A Better Approximation Algorithm for the Query Optimization Problem  p. 15
A Tool for Debugging Internet Multicast Routing  p. 22
A State Transition Based Incremental Protocol Specification  p. 30
A Theoretical Comparison between Mutation and Data Flow Based Test Adequacy Criteria  p. 38

System-Level Testing of Distributed Systems  p. 46
A Graphical Methodology for Concurrent System Design  p. 52
A Program Understanding Environment Based on the Star Approach to Tool Integration  p. 60

An Evolutionary Approach to Combinatorial Optimization Problems  p. 66
Terminal Assignment in a Communications Network Using Genetic Algorithms  p. 74
Graph-Theoretic Approaches to Problem Decomposition in Multi-Agent Systems  p. 82
Linear Algorithms for Two Independent Set Problems in Permutation Graphs  p. 90
Visualization of a User's Information Space  p. 94
A Data Modeling Framework for Queueing Network Models  p. 102
Incorporating Semantics into 2-D Strings  p. 110
Characterization of Imperative Programs Involving Complex Iterations  p. 116
Empirical Validation of a New Structural Measure  p. 122
An Approach to Modeling and Measuring the Design Complexity of Abstract Data Types  p. 130

Issues in Formal Semantics of an Object Oriented Database  p. 139
A Taxonomy of Views in OODBs  p. 147
A Genetic-Based Solution to Load Balancing in Parallel Computers  p. 157
A Probabilistic Dynamic Load Balancing Algorithm for Homogeneous Distributed Systems (With Extension to Hypercubes)  p. 165
A Portable Implementation Method of Lucid with Message Passing  p. 173
Interprocess Communication and Hierarchically Shared Memory Space in ELC  p. 181
Transaction Management and Object-Oriented Modeling in a Distributed Dynamic Decisionmaking Environment  p. 189
ImagineDesk: A Software Platform Supporting Cooperative Applications  p. 196
A Constant Response Time Simultaneous Access Dictionary Machine  p. 203
Three-Dimensional Grid Partitioning for Network Parallel Processing  p. 210
Increasing Concurrency Through Optimism: A Reason for HOPE  p. 218
The QuickRing Network  p. 233
Multi-View Access Control Memory Computer System  p. 241
From Structured Analysis to Formal Specifications: State of the Theory  p. 249
A Monitoring Approach to Active Project Management  p. 257
Why We Tolerate Defective Software  p. 264
Identifying Essential Competencies of Software Engineers  p. 271
Recovery for Real-Time Main Memory Database Systems  p. 279
Partitioning Algorithms for a Distributed Deductive Database  p. 288
Data Replication Versus Timing Constraints in Distributed Database Systems  p. 296
Evolutions of Object States in Temporal Object-Oriented Databases  p. 304
Stability, Coupling, and Cohesion of Object-Oriented Software Systems  p. 312
Knowledge-Based OOA and OOD  p. 320
An Illustration of Extending Structured Software Development to Include Object-Oriented Techniques  p. 325
Comprehending Large-Scale Connectivity in Object-Bases  p. 332
Attributes: Should We Eliminate Them from Semantic Data and Object-Oriented Models?  p. 340
Computation Of Chain Queries In Distributed Database Systems  p. 348
Security Constraint Processing in a Distributed Database Environment  p. 356
Signature File Generation Techniques for Query Processing in Object-Oriented Databases  p. 364
Two-Level Grammars and Robustness in Natural Language Processing  p. 372
A Formal Model for Heuristic Search  p. 380
An Algorithm for Finding the Compact Sets in the Plane  p. 390
Algebraic Petri Nets and Their Applications  p. 396
