Computers Then and Now - Part 2
Enumerating the Risks of Reengineered Processes
Mapping a Functional Specification to an Object-Oriented Specification in Software Re-engineering
Merging Task-Centered UI Design with Complex System Development: A Risky Business
Recent Advances in Computer Chess
New Advances in Alpha-Beta Searching
The ABDADA Distributed Minimax Search Algorithm
A Shogi-Computer Test Set
Academic Careers for Women in Computer Science
Representation of Scientific Hypotheses for use by the Expert System, Research Assistant: The Setup
Improving Opening Book Performance Through Modeling of Chess Opponents
An Architecture for Planning with External Information Points in a Real-Time System
Use of C++ for CS1 or 2
Matrix Inversion in O(log n) on a Scan-Enhanced Reconfigurable Mesh Computer
Yet Another Efficient Algorithm for Replacing the Edges of a Minimum Spanning Tree
The PML-tree: An Efficient Parallel Spatial Index Structure for Spatial Databases
Applying Cryptography in Electronic Commerce
Arithmetic on the EDSAC
Women and Computers: The Past to the Future
Communication Technology and the Conference of the Future
Coupling and Cohesion in Object-Oriented Design and Coding
An Evaluation of a Client-Server Real-Time Database System
Ternary Relationship Decomposition and Higher Normal Form Structures Derived from Entity Relationship Conceptual Modeling
A Hybrid Conceptual Clustering System
The Politics of Advanced Information Technologies
Multimedia Applications
Content Based Retrieval for Image and Video Databases
Multimedia Messaging Systems
Interactive Television Systems
Panel Discussion: Multimedia in the 21st Century
Are MIS and CS Really Different?
Ada 95 and C++: Their Role in Future Object-Oriented Development
