Where Theory and Practice Meet: POPL Past and Future

Higher-Order UnCurrying p. 1

Alias Analysis of Executable Code p. 12

Escape Analysis: Correctness Proof, Implementation and Experimental Results p. 25

Data Flow Analysis is Model Checking of Abstract Interpretations p. 38

Bridging the Gulf: a Common Intermediate Language for ML and Haskell p. 49

Correctness of Monadic State: An Imperative Call-by-Need Calculus p. 62

A Functional Representation of Data Structures with a Hole p. 75

From System F to Typed Assembly Language p. 85

Maximal Static Expansion p. 98

Array SSA Form and its Use in Parallelization p. 107

Putting Pointer Analysis to Work p. 121

Edge Profiling versus Path Profiling: The Showdown p. 134

Global Trends in Flow Analysis p. 149

A Type System for Java Bytecode Subroutines

Javalight is Type-Safe - Definitely p. 161

Classes and Mixins p. 171

Manufacturing Cheap, Resilient, and Stealthy Opaque Constructs p. 184

From Polymorphic Flow Information to Intersection and Union Types p. 197

Inference of Polymorphic and Conditional Strictness Properties p. 209

Fast Interprocedural Class Analysis p. 222

Path-Sensitive Value-Flow Analysis p. 237

Local Type Inference p. 252

Static Typing for Dynamic Messages p. 266

Second-order Unification and Type Inference for Church-style Polymorphism p. 279

Dynamic Typing as Staged Type Inference p. 289

From Principles to Programming Languages

Proofs, Types, and Safe Mobile Code

Parallel Beta Reduction is not Elementary Recursive p. 303

Parallelization in Calculational Forms p. 316

Single and Loving it: Must-Alias Analysis for Higher-Order Languages p. 329

Barrier Inference p. 342

Secure Information Flow in a Multi-Threaded Imperative Language p. 355

The SLam Calculus: Programming with Secrecy and Integrity p. 365

A Typed Language for Distributed Mobile Processes p. 378

Security Properties of Typed Applets p. 391
