Improved external memory BFS implementations p. 3
Computing visibility on terrains in external memory p. 13
An experimental study of a parallel shortest path algorithm for solving large-scale graph instances p. 23
Computing many-to-many shortest paths using highway hierarchies p. 36
In transit to constant time shortest-path queries in road networks p. 46
Practical entropy-compressed rank/select dictionary p. 60
Intersection in integer inverted indices p. 71
Faster filters for approximate string matching p. 84
Algorithms to take advantage of hardware prefetching p. 91
Linearization: locally self-stabilizing sorting in graphs p. 99
Maximizing throughput in minimum rounds in an application-level relay service p. 109
Locating guards for visibility coverage of polygons p. 120
Engineering an efficient canonical labeling tool for large and sparse graphs p. 135
ScrewBox: a randomized certifying graph-non-isomorphism algorithm p. 150
0/1 vertex and facet enumeration with BDDs p. 158
Fast sorting and pattern-avoiding permutations p. 169
Analysis of insertion costs in priority trees p. 175
The average profile of suffix trees mark p. 183
On the average cost of insertions on random relaxed K-d trees p. 194
Boltzmann sampling of unlabelled structures p. 201
LRU caching with moderately heavy request distributions p. 212
Estimating the number of active flows in a data stream over a sliding window p. 223
A characterization of the degree sequences of 2-trees p. 232
The asymptotic number of spanning trees in circulant graphs p. 242
Smoothed analysis of probabilistic roadmaps p. 250
On the reduction of a random basis p. 265
Analysis of fast versions of the Euclid algorithm p. 271
