Author Index

Alternative Technologies in Iron and Steelmaking p. 3
Continuous Casting of Thinner Slabs at IPSCO p. 19
Yield Improvement at Inland's No. 4 BOF p. 31
Enhancing Continuous Caster Direct Hot Charge Throughput Using Artificial Intelligence Technology p. 43
Total Oxygen Measurements at Hoogovens IJmuiden BOS No. 2 p. 49
Development of Flow Control Mold for High Speed Casting Using Static Magnetic Fields p. 53
Development of Low Spitting Lance at Kashima No. 2 Steelmaking Plant p. 61
Automatic Operation of Converters at Mizushima Works p. 67
Application of Z-BOP Technology at Various BOF Shops p. 73
Modification of Lance Nozzle to Increase Productivity and BOF Lining Life at No. 2 Steelmaking Plant in Pohang Works p. 93
Measurement of Ladle Wall Temperature to Improve Control of Steel Temperature in BOF Plant p. 103
Improvement of RH Refining Technology for the Production of Ultra Low Carbon and Low Nitrogen Steel p. 117
Continuous Improvement at the Great Lakes Division No. 1 RH Degasser p. 121
Development of High-Speed, High-Efficiency Vacuum Decarburization Techniques in RH Degasser p. 127
Secondary Metallurgy for Clean Steel Production by Tank Degassing p. 135
Decarburizing Electrical Steels in a Vacuum Tank Degasser p. 145
The Use of Slag Iron Oxide Activity Measurements for Steel Making Process Control p. 153
Revisiting Slag Dart Technology for BOF Slag Control p. 157
Total Slag Management Program - An Innovative Performance Partnership p. 163
A Synthetic Slag Addition Utilizing Recycled Materials p. 167
Robotics Steel Chemistry Lab Start Up and Commissioning p. 175
M-Sequence Modulated Microwave Level Meter and Its Application p. 181
Improving the Operation Technology of the BOF at SICARTSA p. 189
Ladle Free-Opening Performance at Inland's Steelmaking Shops p. 199
The Cooling of BOF Steelmaking Lances p. 209
Improvements to Steel Cleanliness at Dofasco's #2 Melt Shop p. 219
Development of a Turbulence Inhibiting Pouring Pad/Flow Control Device for the Tundish p. 225
Modeling of Grade Change Operations During Continuous Casting of Steel p. 235
Repeating Operation of Hot Tundish Without Preheating in HTE Process of Continuous Casting p. 249
SEM - 85 Rapid Tube Changer: Development at U.S. Steel Fairfield Works p. 257
Methodology to Improve Ladle Slag Detection p. 261
Development of the Tundish Slag Stopper at Sparrows Point p. 265
Cleaner Steel Using Modified Ladle Shrouds and Higher Yields with Amepa p. 271
Submerged Entry Nozzle Quick Change System at U.S. Steel's Mon Valley Caster p. 275
Operating Experiences With a Liquid Core Detection System at Armco Steel's Ashland Slab Caster
High Carbon Tool Steel Casting by a Vertical Bending Caster With Soft Reduction
Improvement of Slab Internal Quality Through Enhanced Caster Maintenance at Sparrows Point
Slab Width Verification
Improvements of Billet Internal Quality by Means of Soft Reduction Techniques
On Line Detection of Mold Thermal Transfer Characteristics
Prevention of Shell Thinning Breakouts Associated With Widening Width Changes
Investigation of Strand Surface Defects Using Mold Instrumentation and Modelling
Optimization of Casting Conditions by the Measurement of Mold Wall Temperature at Pohang Works
Development of 1330 mm Wide Twin Drum Strip Casting Process for Stainless Steel
Control of Early Solidification of Strand Cast Slabs by Horizontal Mold Oscillation Synchronized With Vertical Mold Oscillation
Subsurface Mold Slag Entrainment in Ultra Low Carbon Steels
Pencil Blister Reductions at Inland Steel Company
Reduction of Alumina Slivers at Great Lakes No. 2 CC
Influence of Mold Heat Fluxes on Longitudinal Surface Cracks During High Speed Continuous Casting of Steel Slab
Inner Crack Formation in Continuous Casting: Stress or Strain Criterion?
Slab Breakage and Edge Cracking in Processing an Ultra Low Carbon Steel
Overview of Slag Deoxidation Utilizing Highly Reactive Aluminum
Microwave Treatment of Ferrous Slags
Physical Modeling of Metal Drop-Slag Reactions With Gas Evolution
Development of a New Type of Viscometer and Estimation of Viscosity and Solidifying Point by Calculation Formula
Reaction Equilibria Between Molten Iron and [actual symbol not reproducible] Slag
Minimizing Refractories Problems in Steelmaking
Refractory Performance at Stelco's Hilton Works
Basic Oxygen Furnace Bottom Wear Control by Hydrodynamic Design
Effects of CO-Molded Brick on Thermomechanical Stresses in BOF Linings
Preferential Refractory Wear in a Top Blown Basic Oxygen Furnace
New Technologies for Higher Performance of BOF Lining at ILVA/TA
Tundish Working Lining Developments at Bethlehem's Burns Harbor Division
Stopper Rod and Submerged Nozzle Design and Operation in Continuous Casting
Fully Automated Application of Tundish Working Linings at the DHCC LTV - Cleveland West
Reusable Well Blocks at the Edgar Thomson Caster
Development of Improved Ladle Nozzle System
Purge Plug Improvements in USS/KOBE Steel Ladles
Iron to Steel - Managing the Interface
Strategy for Two Blast Furnace Operation During Furnace Reline at the Great Lakes Division p. 565

Torpedo Car Refractory and Scheduling Improvements at Acme Steel p. 571

Increasing the Scrap Ratio in the BOF Converter p. 577

The Operation of a Single 11.2 Metre Blast Furnace Linked to a Single Twin Strand Slab Caster p. 583

Dynamic Scheduling of Primary Operations at Rouge Steel p. 587

Ladle Movement Improvements at Stelco Lake Erie Works p. 591

Tactical Operations Center "TOC" p. 597

Hot Metal Delivery p. 601

The Balance p. 609

The Psychology of Getting People to Accept and Effectively Implement New Technology p. 619

Successful Implementation of Ladle Metallurgy Technology in Steel Foundries p. 621

L-S Electrogalvanizing Company: A High Performance Organization in Action p. 625

Lessons Learned Implementing Expert Systems Technology Within the Steel Industry p. 631

Fathoming Technology Change in the Steel Industry p. 637

Dephosphorization of Ferromanganese Under Oxidizing Conditions p. 643

Lanthanide Additions for S, P, Pb, Sn, Sb... Control Through Slab Casting p. 649

Faster Hot Metal Desulfurization With Finer Calcium Carbide p. 659

Modeling of a Counter-Current Reaction Launder (CCRL) Process for Metal Refining p. 665

Energy Recovery From Molten Ferrous Slags Using a Molten Salt Medium p. 681

Minimization of Transition Slabs Based on Tundish Flow Control p. 695

Statistical Analysis of Residence Time Distribution of Fluid Elements in Continuous Casting Water Model Tundish With One Side Entry p. 703

Model Studies of Splash, Waves, and Recirculating Flows Within Steelmaking Furnaces p. 713

Numerical Simulation on Circulating Flow and Mixing of Molten Steel in RH Degassing System Employed a Coupled Domain-Splitting and Coordinate-Interlocking Technique p. 723

A New Technique for Estimating Velocity in Liquid Steel p. 729
