Recent advances in tungsten based hardmetals p. 1
Joining of hardmetal with steel p. 11
Embedded weapons-grade tungsten alloy shrapnel rapidly induces metastatic high-grade rhabdomyosarcomas in F344 rats p. 23
Fascination of the micro- and macrocosm - morphologies of science and of the Tyrolean Alps p. 33
Microwave sintering of submicron cemented carbides p. 43
Model for the press-sinter processing of automotive welding electrodes from refractory metal powders p. 57
Manufacture of tungsten/copper components by three-dimensional printing (3DP) p. 65
Predictions of tungsten heavy alloy density, size, shape, and microstructure in different gravitational environments p. 71
High strength ductile bonding of tungsten heavy alloys p. 83
Magnetic saturation measurements of chromium-doped cemented carbides p. 89
Early-stage densification and grain growth of nanosized WC-Co powders during sintering p. 98
Suppression of tungsten's leachability p. 107
Plasma processing of nano tungsten powders p. 116
Sub-micron and low-micron size molybdenum metal powders made by a new chemical precursor p. 122
Liquid-phase sintering of tungsten carbide with both cobalt and nickel binder phases by laser radiation p. 132
WC as a constituent in intermetallic-bonded diamond composites p. 141
Gravitational effects on mechanical and microstructural properties of tungsten heavy alloys p. 149
Plasma pressure compaction (P\textsuperscript{2}C) of submicron size tungsten powder p. 161
Tungsten particle coating by fluidized bed chemical vapor deposition p. 171
Hot explosive consolidation of copper-coated nanocrystalline tungsten powders p. 179
Fabrication of WC-Al-Ni composites by hot explosive consolidation: a structure/property relationship investigation p. 189
SPD induced nanostructuring of refractory metals for advanced properties p. 199
Microstructural refinement of tantalum by severe plastic deformation p. 208
Nanoengineering applied to tungsten p. 216
Effects of changes in test temperature and loading rate on the fracture toughness of bulk metallic glass-W composites p. 226
Influence of process variables on the microstructure of low pressure plasma sprayed tungsten p. 234
Characterization of vacuum plasma spray formed molybdenum-rhenium alloys p. 242
Dynamic abnormal grain growth in commercial-purity molybdenum p. 251
Liquid phase sintering of W-Co-Mn heavy alloys p. 257
Tungsten composites of liquidmetal alloys for kinetic energy penetrator applications p. 266
Growth of large tungsten single crystal cores with preferred and controlled orientations by strain annealing p. 274
Fabrication of single crystal tungsten rods by a flow CVD method p. 284
Advantages and disadvantages of the partial substitution of WC with VC in WC-Co alloys

Improving the high temperature wear characteristics of industrial tools and dies using functionally graded refractory metals

Metal injection molding of microstructured tungsten components for fusion applications

Investigation of thermal expansion of invar-based WHA

Internal strain development during loading of cemented carbide composites

WC-based ceramics for armor

A comparison of the deformation, flow, and failure of two tungsten heavy alloys in ballistic impacts

Consideration of microstructural effects in the analysis of adiabatic shear bands in a tungsten heavy alloy

The constitutive behavior of hafnium

High-strain-rate dynamic mechanical properties of a bulk metallic glass reinforced with tungsten particles

Adiabatic shear banding characteristics of conventional tungsten alloys

Failure behavior of a tungsten heavy alloy at different strain-rates under tensile loading

Crack propagation in WC-Ni cemented carbides with different shape of WC crystals

Calculation of the anisotropic yield surface of molybdenum sheets using a visco-plastic self-consistent model

Effect of tungsten particulate size on adiabatic shear band initiation

Optimum matrix material for adiabatic shear band initiation in a tungsten heavy alloy

Modeling of electric current assisted sintering for the production of bulk nanocrystalline tungsten

Dealing with potential environmental regulations for tungsten bearing compounds
