Contents and Contributors: Preface Contributing Authors

Introduction
Issues in Multimodal Spoken Dialogue Systems and Components
Multimodal Dialogue Systems
Speech Recognition Technology in Multimodal Ubiquitous Computing Environments
A Robust Multimodal Speech Recognition Method using Optical Flow Analysis
Feature Functions for Tree-Based Dialogue Course Management
A Reasoning Component for Information-Seeking and Planning Dialogues
A Model for Multimodal Dialogue System Output Applied to an Animated Talking Head

System Architecture and Example Implementations
Overview of System Architecture
XISL: A Modality-Independent MMI Description Language
A Path to Multimodal Data Services for Telecommunications
Multimodal Spoken Dialogue with Wireless Devices
The SmartKom Mobile Car Prototype System for Flexible Human-Machine Communication

LARRI: A Language-Based Maintenance and Repair Assistant
Evaluation and Usability
Overview of Evaluation and Usability
Evaluating Dialogue Strategies in Multimodal Dialogue Systems
Enhancing the Usability of Multimodal Virtual Co-drivers
Design, Implementation and Evaluation of the SENECA Spoken Language Dialogue System

Segmenting Route Descriptions for Mobile Devices
Effects of Prolonged Use on the Usability of a Multimodal Form-Filling Interface
User Multitasking with Mobile Multimodal Systems
Speech Convergence with Animated Personas
