Architectures, design and interfaces
Incremental software construction with refinement diagrams p. 3
Service-oriented systems engineering: specification and design of services and layered architectures p. 47
Interface-based design p. 83
The dependent delegate dilemma p. 105
System and program verification, model checking and theorem proving
Formalizing counterexample-driven refinement with weakest preconditions p. 121
A mechanically checked proof of a comparator sort algorithm p. 141
Keys in formal verification p. 177
On the utility of canonical abstraction p. 215
Process algebras and experimental calculi
Process algebra: a unifying approach p. 257
Computation orchestration p. 285
A tree semantics of an orchestration language p. 331
Security, system development and special aspects
Model driven security p. 353
