Preface

Collaboration in Supply Chain Planning

Agent-based Collaborative Supply Net Management

Creating Synergy through the Integration of Advanced Planning Systems and Configuration

Dealing with Constraint Issues in Agile Discrete Manufacturing Companies

Collaborative Capacity Planning and Control in Subcontracting Networks

Lean Supply Chain Planning

Supply Chain Integration: Direction, Extent and Balance

Collaborative Supply Chain Planning: A Case Study from the German Cutting Tool Industry

Collaboration in Value Creating Networks: The Concept of Collaborative Commerce

Collaboration in Product Innovation

Product Development Cost Estimation and Optimisation in a Global Manufacturing Environment

Product Family Based Coordination for Design and Production in the Supply Chain

Technology Value Analysis of the Ship Contract Design Value Stream

Rapid One-of-a-Kind Product Development in a Global and Virtual Manufacturing Environment

Distributed and Secure Cooperative Engineering in Virtual Plant Production

A Framework for e-Cooperating Business Agents: An Application to the (Re)engineering of Production Facilities

ICT Solutions for Collaborative Work

Security Integration in Inter-Enterprise Business Process Engineering

Discovering Distributed Processes in Supply Chains

A Web-based SMART STORE Platform for Collaborative Supply Chain Integration

Development of a Remote Monitoring System Using a Portable Phone for Manufacturing Support Systems

Review of B2B Integration

Collaborative Software Needs for Contract Manufacturers

Internet-Based Integration for Collaborative Business Processes: Implementing the Technology in SMEs

Integrating Material and Information Flows Using a Distributed Peer-to-Peer Information System

Simulation and Modelling

A Generic Framework for Simulation of Supply Networks with Bargaining Agents

The Path from Business Modelling to Technology Management

A Comparative Study of the Simulation Analysis of e-Business Implementation in Manufacturing Companies

Integration of Product, Process and Functional Orientations: Principles and a Case Study

Balancing of Hybrid Assembly Systems Using a Simulation Approach

Control of Complexity in Virtual Organizations: The Role of Enterprise Modelling

Managing Bottleneck Resources in Production Networks

Advances in Production Management Systems
Assessing the Effectiveness of Knowledge Management in Virtual Manufacturing Organizations  p. 427
A Study on Characterization of Agile Manufacturing System with Square Array Layout of Machining Centres  p. 441
Evaluation of Interdependent Plans  p. 451
Enhancing Collaboration through Web Enabled Performance Measurement System  p. 467
System Design Principles in Customer-Driven Manufacturing  p. 485
Strategic Manufacturing--Requirements for Supporting Tool  p. 517
Information Systems for Lean Value Adding Chains  p. 531
Advances in Enterprise Applications Software
Achieving a Transparent and Visual Automotive Value Chain with ICT-Support  p. 545
Optimal Set-Up of Industrial Scheduling Software  p. 561
Supply Chain Management Systems--A Survey of the State-of-the-Art  p. 573
Analyzing Maintenance Collaboration in Multiple Overlapping SAP Instances  p. 587
Indicators for Interactive Scheduling  p. 619
