

Thinking and Deciding
Decision Making Is a Skill
Thinking: automatic and Controlled
The Computational Model of the Mind
Through the Darkest Psychoanalytical Theory and Behaviorism to Cognition
Quality of Choice: Rationality
The Invention of Modern Decision Theory
What Is Decision Making?
Definition of a Decision
Picturing Decisions
Decision Quality, Revisited
Incomplete Thinking: A Legal Example
Over-Inclusive Thinking: Sunk Costs
The Rationality of Considering Only the Future
The Rest of This Book
A General Framework for Judgment
A Conceptual Framework for Judgment and Prediction
Research With the Lens Model Framework
Capturing Judgment in Statistical Models
How Do Statistical Models Beat Human Judgment?
Practical Implications of the Surprising Success of the Linear Model
Objections and Rebuttals
The Role of Judgment in Choices and Decisions
The Fundamental Judgment Strategy: Anchoring and Adjustment
Salient Values
Anchoring and (Insufficient) Adjustment
Anchoring on Ourselves
Anchoring the Past in the Present
Judging Heuristically
Going Beyond the Information Given
Estimating Frequencies and probabilities
Availability of Memories
Biased Samples in Memory
Biased Sampling From Memory
Availability to the Imagination
From Availability to Probability and Causality
Judgment by Similarity: Same Old Things
Representative Thinking
The Ratio Rule
Explanation-Based Judgments
Everyone Likes a Good Story

The Conjunction Probability Error (Again)
Judging From Explanations
Legal Scenarios: The Best Story Wins in the Courtroom
Scenarios About Ourselves
Scenarios About the Unthinkable
Hindsight: Reconstructing the Past
Sometimes It's Better to Forget
Chance and Cause
Misconceptions About Chance
Illusions of Control
Seeing Causal Structure Where It Isn't
Regression Toward the Mean
Reflections on Our Inability to Accept Randomness
Thinking Rationally About Uncertainty
What to Do About the Biases
Getting Started Thinking in Terms of Probabilities
Comprehending the Situation Being Judged
Testing for Rationality
How to Think About Inverse Probabilities
Avoiding Subadditivity and Conjunction Errors
The Other Side of the Coin: The Probability of a Disjunction of Events
Changing Our Minds: Bayes's Theorem
Statistical Decision Theory
Concluding Comment on Rationality
Evaluating Consequences: Fundamental Preferences
What Good is Happiness?
The Role of Emotions in Evaluations
The Value of Money
Decision Utility -- Predicting What We will Value
Constructing Values
From Preferences to Choices
Deliberate Choices Among Complex Alternatives
Ordering Alternatives
Grouping Alternatives
Choosing Alternatives
How to Make Good Choices
A Rational Decision Theory
Formally Defining Rationality
Making Theories Understandable -- The Axiomatic Method
Defining Rationality: Expected Utility Theory
Traditional Objections to the Axioms

The Shoulds and Dos of the System

Some Bum Raps for Decision Analysis

A Descriptive Decision Theory

Non-expected Utility Theories

Gain-Loss Framing Effects

Loss Aversion

Look to the Future

What's Next? New Directions in Research on Judgment and Decision Making

The Neuroscience of Decisions

Emotions in Decision Making

The Rise of Experimental Methods to Study Dynamic Decisions

Do We Really Know Where We're Headed?

In Praise of Uncertainty

Uncertainty as Negative

The Illusion of Hedonic Certainty

The Price of Denying Uncertainty

Two Cheers for Uncertainty

Living With Uncertainty
