Enterprise Systems - A Challenge for Future Research and Improved Practice
CbSSDF and OWL-S: A Scenario-Based Solution Analysis and Comparison

Enterprise Systems in a Service Science Context
A Petri Net-Based Software Process Model for Developing Process-Oriented Information Systems
Modern Enterprise Systems as Enablers of Agile Development
Patterns-Based IS Change Management in SMEs
Applying Use Cases to Describe the Role of Standards in e-Health Information Systems

Discussion on Development Trend of Chinese Enterprises Information System
Asymmetrical Effects of Using Positive and Negative Examples on Object Modeling
IS/IT Project Management
A Social Contract for University-Industry Collaboration: A Case of Project-Based Learning Environment
Replacement of the Project Manager Reflected Through Activity Theory and Work-System Theory

Integrating Environmental and Information Systems Management: An Enterprise Architecture Approach
Effective Monitoring and Control of Outsourced Software Development Projects
Classification of Software Projects' Complexity
Application of Project Portfolio Management

Human-Computer Interaction and Knowledge Management
Towards a Cost-Effective Evaluation Approach for Web Portal Interfaces
IT Knowledge Requirements Identification in Organizational Networks: Cooperation Between Industrial Organizations and Universities

A Knowledge Tree Model and Its Application for Continuous Management Improvement
On the Development of a User-Defined Quality Measurement Tool for XML Documents
The Paradox of "Structured" Methods for Software Requirements Management: A Case Study of an e-Government Development Project
The Research for Knowledge Management System of Virtual Enterprise Based on Multi-agent Model-Driven Engineering in ISD

Problem-Solving Methods in Agent-Oriented Software Engineering
MORPHEUS: A Supporting Tool for MDD
Towards a Model-Driven Approach to Information System Evolution
Open Design Architecture for Round Trip Engineering
Quality Issues on Model-Driven Web Engineering Methodologies
Measuring the Quality of Model-Driven Projects with NDT-Quality
Aligning Business Motivations in a Services Computing Design

Information Systems for Service Marketing and e-Businesses
CRank: A Credit Assessment Model in C2C e-Commerce
Towards Agent-Oriented Approach to a Call Management System
Design and Research on e-Business Platform Based on Agent
Research of B2B e-Business Application and Development Technology Based on SOA

Dynamic Inventory Management with Demand Information Updating p. 377
Analysis of Market Opportunities for Chinese Private Express Delivery Industry p. 383
Development of Information Systems for Creativity and Innovation p. 399
Explaining Change Paths of Systems and Software Development Practices p. 411
Designing a Study for Evaluating User Feedback on Predesign Models p. 425
Study on the Method of the Technology Forecasting Based on Conjoint Analysis p. 437
Towards a New Concept for Supporting Needy Children in Developing Countries - ICT Centres Integrated with Social Rehabilitation p. 449
An Investigation of Agility Issues in Scrum Teams Using Agility Indicators p. 461
The Influence of Short Project Timeframes on Web Development Practices: A Field Study p. 475

On Weights Determination in Ideal Point Multiattribute Decision-Making Model p. 475
Information Systems Engineering and Management p. 485
An Approach for Prioritizing Agile Practices for Adaptation p. 499
Effects of Early User-Testing on Software Quality - Experiences from a Case Study p. 511

Development of Watch Schedule Using Rules Approach p. 523
Priority-Based Constraint Management in Software Process Instantiation p. 535

A Framework for Decomposition and Analysis of Agile Methodologies During Their Adaptation p. 551
The Methodology Evaluation System can Support Software Process Innovation p. 561

Index p. 573
