Experimental Modal Analysis of 9-meter Research-sized Wind Turbine Blades p. 1
Modal Analysis of CX-100 Rotor Blade and Micon 65/13 Wind Turbine p. 15
Modeling, Estimation, and Monitoring of Force Transmission in Wind Turbines p. 29
Optical Non-contacting Vibration Measurement of Rotating Turbine Blades II p. 39
Structural Damage Identification in Wind Turbine Blades Using Piezoelectric Active Sensing p. 55
Energy Recovering from Vibrations in Road Vehicle Suspensions p. 67
Development of MEMS-based Piezoelectric Vibration Energy Harvesters p. 77
Analysis of Switching Systems Using Averaging Methods for Piezostructures p. 85
In-field Testing of a Steel Wind Turbine Tower p. 103
Full-scale Modal Wind Turbine Tests: Comparing Shaker Excitation with Wind Excitation p. 113
Damage Detection in Wind Turbine Blade Panels Using Three Different SHM Techniques p. 125
Force Estimation via Kalman Filtering for Wind Turbine Blade Control p. 135
Operational Modal Analysis of a Wind Turbine Mainframe Using Crystal Clear SSI p. 153
Practical Aspects of Dynamic Substructuring in Wind Turbine Engineering p. 163
Developments in Large Wind Turbine Modal Analysis Using Point Tracking Videogrammetry p. 187
Optimal Design of Magnetostrictive Transducers for Power Harvesting from Vibrations p. 199
Experimental Investigations of a Bistable Energy Harvester p. 211
Response of Uni-modal Duffing-type Harvesters to Random Excitations p. 219
Self-powered Active Control of Structures with TMDs p. 227
Energy Harvesting Under induced Best Conditions p. 239
Frequency Domain Solution of a Piezo-aero-elastic Wing for Energy Harvesting p. 247
Mechanical Effect of Combined Piezoelectric and Electromagnetic Energy Harvesting p. 261
Vibro-impact Dynamics of a Piezoelectric Energy Harvester p. 273
Experimental Vibration Analysis of the Zigzag Structure for Energy Harvesting p. 281
Energy Harvesting to Power Sensing Hardware Onboard Wind Turbine Blade p. 291
Limit Cycle Oscillations of a Nonlinear Piezo-magneto-elastic Structure for Broadband Vibration Energy Harvesting p. 305
Applicability Limits of Operational Modal Analysis to Operational Wind Turbines p. 317
Excitation Methods for a 60 kW Vertical Axis Wind Turbine p. 329
Comparison of System Identification Techniques for Predicting Dynamic Properties of Large Scale Wind Turbines by Using the Simulated Time Response Identification of the Dynamics of Large Wind Turbines by Using Photogrammetry p. 351
Output-only Modal Analysis of Linear Time Periodic Systems with Application to Wind Turbine Simulation Data p. 361
Validation of Wind Turbine Dynamics p. 375
