

Preface	p. xiii
Introduction	p. 1
References	p. 6
General Literature	p. 6
The Chemical Industry	p. 7
A Brief History	p. 7
Inorganic Chemicals	p. 7
Organic Chemicals	p. 10
The Oil Era	p. 11
The Age of Sustainability	p. 12
Structure of the Chemical Industry	p. 13
Raw Materials and Energy	p. 16
Fossil Fuel Consumption and Reserves	p. 16
Biomass as an Alternative for Fossil Fuels	p. 19
Energy and the Chemical Industry	p. 21
Composition of Fossil Fuels and Biomass	p. 23
Base Chemicals	p. 35
Global Trends in the Chemical Industry	p. 37
References	p. 39
General Literature	p. 40
Processes in the Oil Refinery	p. 41
The Oil Refinery - An Overview	p. 41
Physical Processes	p. 42
Desalting and Dehydration	p. 42
Crude Distillation	p. 43
Propane Deasphalting	p. 45
Thermal Processes	p. 46
Visbreaking	p. 46
Delayed Coking	p. 47
Flexicoking	p. 48
Catalytic Processes	p. 49
Octane and Cetane Numbers	p. 49
Catalytic Cracking	p. 51
Catalytic Reforming	p. 63
Alkylation	p. 69
Hydroprocessing	p. 76
Current and Future Trends in Oil Refining	p. 91
Stricter Environmental Regulations	p. 92
Refinery Configurations	p. 94
References	p. 96
Production of Light Alkenes	p. 99

Introduction	p. 99
Cracking Reactions	p. 100
Thermodynamics	p. 100
Mechanism	p. 101
Kinetics	p. 102
The Industrial Process	p. 103
Influence of Feedstock on Steam Cracker Operation and Products	p. 103
Cracking Furnace	p. 106
Heat Exchanger	p. 109
Coke Formation	p. 110
Product Processing	p. 111
Novel Developments	p. 113
Selective Dehydrogenation of Light Alkanes	p. 114
Metathesis of Alkenes	p. 116
Production of Light Alkenes from Synthesis Gas	p. 118
Dehydration of Bioethanol	p. 121
Direct Conversion of Methane	p. 122
References	p. 123
Production of Synthesis Gas	p. 127
Introduction	p. 127
Synthesis Gas from Natural Gas	p. 129
Reactions and Thermodynamics	p. 129
Steam Reforming Process	p. 131
Autothermal Reforming Process	p. 137
Novel Developments	p. 139
Coal Gasification	p. 142
Gasification Reactions	p. 142
Thermodynamics	p. 143
Gasification Technologies	p. 146
Recent Developments in Gasification Technology	p. 151
Applications of Coal Gasification	p. 154
Integrated Gasification Combined Cycle	p. 156
Why Gasify, Not Burn for Electricity Generation?	p. 158
Carbon Capture and Storage (CCS)	p. 159
Cleaning and Conditioning of Synthesis Gas	p. 161
Acid Gas Removal	p. 161
Water-Gas Shift Reaction	p. 163
Methanation	p. 166
References	p. 168
Bulk Chemicals and Synthetic Fuels Derived from Synthesis Gas	p. 171
Ammonia	p. 171

Background Information	p. 171
Thermodynamics	p. 173
Commercial Ammonia Synthesis Reactors	p. 175
Ammonia Synthesis Loop	p. 178
Integrated Ammonia Plant	p. 180
Hydrogen Recovery	p. 182
Production of Urea	p. 185
Methanol	p. 191
Background Information	p. 191
Reactions, Thermodynamics, and Catalysts	p. 192
Synthesis Gas for Methanol Production	p. 195
Methanol Synthesis	p. 196
Production of Formaldehyde	p. 199
Synthetic Fuels and Fuel Additives	p. 201
Fischer-Tropsch Process	p. 202
Methanol-to-Gasoline (MTG) Process	p. 212
Recent Developments in the Production of Synthetic Fuels	p. 214
Fuel Additives - Methyl Tert-Butyl Ether	p. 215
References	p. 218
Processes for the Conversion of Biomass	p. 221
Introduction	p. 221
Production of Biofuels	p. 223
Bioethanol and Biobutanol	p. 224
Diesel-Type Biofuels	p. 226
Production of Bio-based Chemicals	p. 231
Ethanol	p. 232
Glycerol	p. 233
Succinic Acid	p. 234
Hydroxymethylfurfural (HMF)	p. 236
The Biorefinery	p. 236
Biorefinery Design Criteria and Products	p. 236
Biorefinery Concepts	p. 238
Core Technologies of a Thermochemical Biorefinery	p. 239
Existing and Projected Biorefineries	p. 243
Possibility of Integrating a Biorefinery with Existing Plants	p. 243
Biorefinery versus Oil Refinery	p. 245
Conclusions	p. 246
References	p. 246
Inorganic Bulk Chemicals	p. 249
The Inorganic Chemicals Industry	p. 249
Sulfuric Acid	p. 250

Reactions and Thermodynamics	p. 252
SO	p. 252
Modern Sulfuric Acid Production Process	p. 254
Catalyst Deactivation	p. 256
Sulfur Production	p. 256
Nitric Acid	p. 260
Reactions and Thermodynamics	p. 260
Processes	p. 262
NO	p. 266
Chlorine	p. 268
Reactions for the Electrolysis of NaCl	p. 269
Technologies for the Electrolysis of NaCl	p. 270
References	p. 274
Homogeneous Transition Metal Catalysis In the Production of Bulk Chemicals	p. 275
Introduction	p. 275
Acetic Acid Production	p. 278
Background Information	p. 278
Methanol Carbonylation - Reactions, Thermodynamics, and Catalysis	p. 281
Methanol Carbonylation - Processes	p. 284
Hydroformylation	p. 286
Background Information	p. 286
Thermodynamics	p. 288
Catalyst Development	p. 289
Processes for the Hydroformylation of Propene	p. 292
Processes for the Hydroformylation of Higher Alkenes	p. 294
Comparison of Hydroformylation Processes	p. 296
Ethene Oligomerization and More	p. 297
Background Information	p. 297
Reactions of the SHOP Process	p. 298
The SHOP Process	p. 299
Oxidation of p-Xylene: Dimethyl Terephthalate and Terephthalic Acid Production	p. 301
Background Information	p. 301
Conversion of p-Toluic Acid Intermediate	p. 302
Processes	p. 303
Process Comparison	p. 305
Review of Reactors Used in Homogeneous Catalysis	p. 305
Choice of Reactor	p. 306
Exchanging Heat	p. 308
Approaches for Catalyst/Product Separation	p. 308
Biphasic Catalyst Systems	p. 309
Immobilized Catalyst Systems	p. 309

References	p. 311
Heterogeneous Catalysis - Concepts and Examples	p. 313
Introduction	p. 313
Catalyst Design	p. 314
Catalyst Size and Shape	p. 314
Mechanical Properties of Catalyst Particles	p. 316
Reactor Types and Their Characteristics	p. 316
Reactor Types	p. 316
Exchanging Heat	p. 319
Role of Catalyst Deactivation	p. 321
Other Issues	p. 322
Shape Selectivity - Zeolites	p. 323
Production of Isobutene	p. 325
Isomerization of Pentanes and Hexanes	p. 328
Production of Ethylbenzene	p. 330
Some Challenges and (Unconventional) Solutions	p. 334
Adiabatic Reactor with Periodic Flow Reversal	p. 334
Highly Exothermic Reactions with a Selectivity Challenge - Selective Oxidations	p. 338
Monolith Reactors - Automotive Emission Control	p. 344
Exhaust Gas Composition	p. 346
Reduction of Exhaust Gas Emissions	p. 347
References	p. 354
General Literature	p. 355
Production of Polymers - Polyethene	p. 357
Introduction	p. 357
Polymerization Reactions	p. 357
Step growth Polymerization	p. 358
Chain growth Polymerization - Radical and Coordination Pathways	p. 360
Polyethenes - Background Information	p. 363
Catalyst Development	p. 363
Classification and Properties	p. 364
Applications	p. 365
Processes for the Production of Polyethenes	p. 366
Monomer Production and Purification	p. 366
Polymerization - Exothermicity	p. 367
Production of Polyethenes	p. 367
References	p. 375
Production of Fine Chemicals	p. 377
Introduction	p. 377
Role of Catalysis	p. 380
Atom Economy	p. 380

Alternative Reagents and Catalysts	p. 381
Novel Reaction Routes	p. 384
Selectivity	p. 384
Biocatalysis	p. 392
Solvents	p. 394
Conventional Solvents	p. 394
Alternative Solvents	p. 395
Production Plants	p. 398
Multiproduct and Multipurpose Plants (MMPs)	p. 398
Dedicated Continuous Plants	p. 406
Batch Reactor Selection	p. 407
Reactors for Liquid and Gas-Liquid Systems	p. 408
Reactors for Gas-Liquid-Solid Systems	p. 409
Batch Reactor Scale-up Effects	p. 411
Temperature Control	p. 411
Heat Transfer	p. 411
Example of the Scale-up of a Batch and Semi-Batch Reactor	p. 412
Summary of the Scale-up of Batch Reactors	p. 416
Safety Aspects of Fine Chemicals	p. 416
Thermal Risks	p. 416
Safety and Process Development	p. 417
References	p. 419
Biotechnology	p. 423
Introduction	p. 423
Principles of Fermentation Technology	p. 424
Mode of Operation	p. 425
Reactor Types	p. 426
Sterilization	p. 432
Cell Biomass - Bakers' Yeast Production	p. 433
Process Layout	p. 433
Cultivation Equipment	p. 434
Downstream Processing	p. 434
Metabolic Products - Biomass as Source of Renewable Energy	p. 435
Bioethanol and Biobutanol	p. 435
Biogas	p. 438
Environmental Application - Wastewater Treatment	p. 438
Introduction	p. 438
Process Layout	p. 438
Aerobic Treatment Processes	p. 440
Anaerobic Treatment Processes	p. 443
Enzyme Technology - Biocatalysts for Transformations	p. 445

General Aspects	p. 445
Immobilization of Enzymes	p. 446
Production of L-Amino Acids	p. 447
Production of Artificial Sweeteners	p. 448
References	p. 452
General Literature	p. 453
Process Intensification	p. 455
Introduction	p. 455
What is Process Intensification	p. 455
How to Intensify Processes	p. 457
Structured Catalytic Reactors	p. 459
Types of Structured Catalysts and Reactors	p. 460
Monoliths	p. 462
Microreactors	p. 468
Multifunctional Reactors/Reactive Separation	p. 472
Reactive Distillation	p. 473
Coupling Reaction and Membrane Separation	p. 477
Coupling Reaction and Adsorption	p. 481
References	p. 482
Process Development	p. 485
Dependence of Strategy on Product Type and Raw Materials	p. 485
The Course of Process Development	p. 487
Development of Individual Steps	p. 489
Exploratory Phase	p. 489
From Process Concept to Preliminary Flow Sheet	p. 489
Pilot Plants/Miniplants	p. 494
Scale-up	p. 499
Reactors with a Single Fluid Phase	p. 499
Fixed Bed Catalytic Reactors with One or More Fluid Phases	p. 501
Safety and Loss Prevention	p. 505
Safety Issues	p. 505
Reactivity Hazards	p. 511
Design Approaches to Safety	p. 513
Process Evaluation	p. 514
Capital Cost Estimation	p. 515
Operating Costs and Earnings	p. 523
Profitability Measures	p. 524
Current and Future Trends	p. 526
References	p. 528
General Literature	p. 529
Magazines	p. 529

Chemical Industry - Figures	p. 531
Main Symbols Used in Flow Schemes	p. 535
Index	p. 539
