Preface p. xi
Introduction p. 1
Velocity p. 2
The Value of Immutability p. 3
Declarative Configuration p. 4
Self-Healing Systems p. 4
Scaling Your Service and Your Teams p. 5
Decoupling p. 5
Easy Scaling for Applications and Clusters p. 6
Scaling Development Teams with Microservices p. 6
Separation of Concerns for Consistency and Scaling p. 7
Abstracting Your Infrastructure p. 9
Efficiency p. 10
Summary p. 11
Creating and Running Containers p. 13
Container Images p. 14
The Docker Image Format p. 14
Building Application Images with Docker p. 16
Dockerfiles p. 16
Image Security p. 16
Optimizing Image Sizes p. 17
Storing Images in a Remote Registry p. 18
The Docker Container Runtime p. 19
Running Containers with Docker p. 19
Exploring the kuard Application p. 19
Limiting Resource Usage p. 19
Cleanup p. 20
Summary p. 21
Deploying a Kubernetes Cluster p. 23
Installing Kubernetes on a Public Cloud Provider p. 23
Google Container Service p. 24
Installing Kubernetes with Azure Container Service p. 24
Installing Kubernetes on Amazon Web Services p. 25
Installing Kubernetes Locally Using minikube p. 25
Running Kubernetes on Raspberry Pi p. 26
The Kubernetes Client p. 26
Checking Cluster Status p. 26
Listing Kubernetes Worker Nodes p. 27
Cluster Components p. 29
Kubernetes Proxy p. 29
Kubernetes DNS p. 30

Kubernetes UI p. 30
Summary p. 31
Common kubectl Commands p. 33
Namespaces p. 33
Contexts p. 33
Viewing Kubernetes API Objects p. 34
Creating, Updating, and Destroying Kubernetes Objects p. 35
Labeling and Annotating Objects p. 35
Debugging Commands p. 36
Summary p. 36
Pods p. 37
Pods in Kubernetes p. 38
Thinking with Pods p. 38
The Pod Manifest p. 39
Creating a Pod p. 40
Creating a Pod Manifest p. 40
Running Pods p. 41
Listing Pods p. 41
Pod Details p. 42
Deleting a Pod p. 43
Accessing Your Pod p. 43
Using Port Forwarding p. 44
Getting More Info with Logs p. 44
Running Commands in Your Container with exec p. 44
Copying Files to and from Containers p. 45
Health Checks p. 45
Liveness Probe p. 47
Readiness Probe p. 47
Types of Health Checks p. 47
Resource Management p. 47
Resource Requests: Minimum Required Resources p. 48
Capping Resource Usage with Limits p. 50
Persisting Data with Volumes p. 50
Using Volumes with Pods p. 51
Different Ways of Using Volumes with Pods p. 51
Persisting Data Using Remote Disks p. 52
Putting It All Together p. 53
Summary p. 54
Labels and Annotations p. 55
Labels p. 55
Applying Labels p. 56

Modifying Labels p. 58
Label Selectors p. 58
Label Selectors in API Objects p. 60
Annotations p. 61
Defining Annotations p. 62
Cleanup p. 62
Summary p. 63
Service Discovery p. 65
What Is Service Discovery? p. 65
The Service Object p. 66
Service DNS p. 67
Readiness Checks p. 68
Looking Beyond the Cluster p. 69
Cloud Integration p. 70
Advanced Details p. 71
Endpoints p. 72
Manual Service Discovery p. 73
Kube-proxy and Cluster IPs p. 74
Cluster IP Environment Variables p. 74
Cleanup p. 75
Summary p. 75
ReplicaSets p. 77
Reconciliation Loops p. 78
Relating Pods and ReplkaSets p. 78
Adopting Existing Containers p. 79
Quarantining Containers p. 79
Designing with ReplkaSets p. 79
ReplicaSet Spec p. 80
Pod Templates p. 80
Labels p. 81
Creating a ReplicaSet p. 81
Inspecting a ReplicaSet p. 82
Finding a ReplicaSet from a Pod p. 82
Finding a Set of Pods for a ReplicaSet p. 82
Scaling ReplicaSets p. 83
Imperative Scaling with kubectl Scale p. 83
Declaratively Scaling with kubectl apply p. 83
Autoscaling a ReplicaSet p. 84
Deleting ReplicaSets p. 85
Summary p. 86
DaemonSets p. 87

DaemonSet Scheduler p. 88
Creating DaemonSets p. 88
Limiting DaemonSets to Specific Nodes p. 90
Adding Labels to Nodes p. 90
Node Selectors p. 92
Updating a DaemonSet p. 92
Updating a DaemonSet by Deleting Individual Pods p. 92
Rolling Update of a DaemonSet p. 93
Deleting a DaemonSet p. 94
Summary p. 94
Jobs p. 95
The Job Object p. 95
Job Patterns p. 96
One Shot p. 96
Parallelism p. 100
Work Queues p. 102
Summary p. 106
ConfigMaps and Secrets p. 107
ConfigMaps p. 107
Creating ConfigMaps p. 107
Using a ConfigMap p. 108
Secrets p. 111
Creating Secrets p. 112
Consuming Secrets p. 113
Private Docker Registries p. 114
Naming Constraints p. 115
Managing ConfigMaps and Secrets p. 116
Listing p. 116
Creating p. 117
Updating p. 117
Summary p. 119
Deployments p. 121
Your First Deployment p. 122
Deployment Internals p. 122
Creating Deployments p. 123
Managing Deployments p. 125
Updating Deployments p. 125
Scaling a Deployment p. 125
Updating a Container Image p. 126
Rollout History p. 127
Deployment Strategies p. 130

Recreate Strategy p. 130
RollingUpdate Strategy p. 130
Slowing Rollouts to Ensure Service Health p. 134
Deleting a Deployment p. 135
Summary p. 136
Integrating Storage Solutions and Kubernetes p. 137
Importing External Services p. 138
Services Without Selectors p. 139
Limitations of External Services: Health Checking p. 141
Running Reliable Singletons p. 141
Running a MySQL Singleton p. 142
Dynamic Volume Provisioning p. 145
Kubernetes-Native Storage with StatefulSets p. 146
Properties of StatefulSets p. 146
Manually Replicated MongoDB with StatefulSets p. 147
Automating MongoDB Cluster Creation p. 149
Persistent Volumes and StatefulSets p. 152
One Final Thing: Readiness Probes p. 153
Deploying Real-World Applications p. 155
Parse p. 155
Prerequisites p. 155
Building the parse-server p. 156
Deploying the parse-server p. 156
Testing Parse p. 157
Ghost p. 158
Configuring Ghost p. 158
Redis p. 161
Configuring Redis p. 161
Creating a Redis Service p. 163
Deploying Redis p. 163
Playing with Our Redis Cluster p. 165
Summary p. 166
Building a Raspberry Pi Kubernetes Cluster p. 167
Index p. 175
