Physics and Principles of Transcranial Doppler Ultrasonography
Basic Transcranial Doppler Examination: Technique and Anatomy
Transcranial Doppler Ultrasonography: Normal Values
Pitfalls in Transcranial Doppler Diagnosis
Transcranial Color-Coded Real-Time Ultrasonography in Adults
Transcranial Doppler Ultrasonography and Cerebral Blood Flow
Cerebral Activation
Transcranial Doppler Evaluation of Patients with Ischemic Cerebrovascular Disease
Detection of Vasospasm Following Subarachnoid Hemorrhage
Arteriovenous Malformations
Transcranial Doppler in the Evaluation of Global Cerebral Ischemia: Syncope and Cardiac Arrest
Transcranial Doppler Ultrasonography in Sleep
Anemia and Sickle Cell Disease
Transcranial Doppler Ultrasonography in the Intensive Care Unit
Transcranial Doppler Ultrasonography in Anesthesia
Monitoring Blood Flow Velocity in the Middle Cerebral Artery during Carotid Endarterectomy
Intraoperative Monitoring with Transcranial Doppler Ultrasonography during Cardiac Surgery and Interventions
Embolus Detection Using Doppler Ultrasonography
Cerebrovascular Developmental Anatomy and Physiology in the Neonate and Child
Transcranial Doppler Applications in the Neonate and Child
Role of Transcranial Doppler Ultrasonography in Clinical Practice
