Power Electronics for the Next Century

Power Electronics in Effective Power Systems

A Multilevel-Voltage Source Diode Rectifier Suitable for High-Voltage, High-Power Applications

Modelling and Control of a Series Dual Bridge GTO Voltage Source Converter

Simple Structure and Control Method for a Neutral-Point-Clamped PWM Inverter

Input Filter Design for Current Source PWM GTO Converter

Constitution and Characteristics of Neutral Point Clamped Type Inverter for Driving LSM

Further Refinements to an Optimum Gate Drive for High Power GTO Thyristors

A Current Source Based Snubber Energy Recovery Circuit for GTO Inverters

PWM Control Method of Multiple Inverter for MAGLEV

Effects of Voltage Unbalance and Harmonics on Three-Phase SPWM AC-to-DC Converters with Instantaneous Power Feedback

New PWM Method for Current Fed Type PWM Converter with Filter Circuit

Adaptive Phase Control for Three Phase PWM AC-to-DC Converters with Constant Switching Frequency

Digital Control of Three-Phase PWM Inverters for UPSs Using Dead-Beat Observer

Reduce of the Acoustic Noise Effect from PWM-VSI Inverter Controlled AC-Drives by Music and Random Modulation

New Switching Method for Single-Phase AC to DC Converter

Performance Optimization of Quasi-Direct Converters

Design of a High Performance Three-Phase UPS with Unity Input Power Factor and High DC-Voltage Conversion Ratio

Pulse Density Modulation Based Power Control of a 4kW 400kHz Voltage-Source Inverter for Induction Heating Applications

New Quasi-Resonant Inverter for Induction Heating

Soft-Switched PWM Converter with Inductive DC Filter

A New Control Strategy to Improve AC Input Current Waveform of High-Power Parallel Connected PWM Rectifiers

Inverter Motor with Sinusoidal Starting Currents, a New Solution with 2 DC-Links Only

A New Control Law for Realizing Some Good Responses of DC-DC Converters

Application of the Zeta Converter in Switched-Mode Power Supplies

Quasi State Variable Method for Switching DC-DC Converters

Novel Control Strategy for Parallel Operation of Power Supply Modules

A State-of-the-Art 50kW - 10kHz Soft-Switching Assisted PWM DC-DC Converter for X-Ray Power Generator

A New, Partial Series Resonant Converter for Efficient DC to DC Conversion

A High-Efficiency, High-Power DC-DC Converter Using High-Voltage BSITs

Dynamic Modeling and Predictive Current Control Technique for New Parallel Resonant Zero-Voltage Switching AC to DC Converter

Control of PWM Three Phase Converters: A Sliding Mode Approach

Optimal Control of Transients in DC/DC Converters

Sinusoidal Voltage Controller for Uninterruptible Power Supply by Robust Control
Comparison of AC Current Regulators for IGBT Inverter p. 206
Disturbance Observer Based Digitally Controlled PWM Inverter for UPS Application p. 213
Flux-Observer-Based Multi-Level Modulation Technique for AC Drives with Variable-Structure Logic Controller p. 219
An Electric Vehicle Charging System with 'Universal' Inductive Interface p. 227
A Method for Improving Output Current Waveform of Series-Resonant AC Link Inverter p. 233
Follow-Up Control Method in a Resonant DC Link Inverter p. 245
New Control Methods of Resonant DC Link Inverter p. 251
On The Design and Control Strategy of High Power, High Frequency Converters for Tube Welding Applications p. 257
Zero Current Switching High Frequency Inverter with Constant Frequency Power Control p. 265
Analysis and Compensation of Speed Drive Systems with Torsional Loads p. 271
Self-Tuning Adaptive Controllers Using State Observers p. 278
Power Factor Improvement of PWM Matrix Converter Using Intermediate Voltage p. 284
MRAC and Sliding Motion Control Techniques to Design a New Robust Controller for Induction Motor Drives p. 290
Unified Interpretation of Indirect and Direct Vector Control p. 297
DSP-Based Self-Tuning IP Speed Controller and Predictive Current Controller for Rolling Mill DC Drive p. 303
Basic Consideration of Vibration Suppression and Disturbance Rejection Control of n-Inertia System Using SFLAC p. 309
A Modified Sliding Observer for Robust Estimation of Rotor Magnetizing Current of AC IM Drive p. 316
Methods of Generating the Voltage Space-Vector by Fast Real-Time Pulsewidth Modulation p. 322
Control Method of Linear Generator for Maglev Vehicle p. 328
Improved Resonant Type DC/DC Converter for Control of a Compound DC Motor p. 335
Direct Force Control with Linear Pulse Motor p. 341
Frequency-Domain Parameter Estimation for the Brushless Doubly-Fed Machine p. 346
Force Sensorless Impedance Control by Disturbance Observer p. 352
Plane Ultrasonic Piezoelectric Actuators p. 358
Wide Speed Operation of a Sensorless Brushless DC Motor Having an Interior Permanent Magnet Rotor p. 364
A New Approach for Robust Digital Position Control of Brushless Direct Drive Motor with Load Torque Observer p. 371
Vector Control of a Synchronous Reluctance Motor Including Iron Loss p. 377
A Microprocessor Controlled Drive for 3-Phase Permanent Magnet Brushless DC Motor p. 383
A Comparison of Output Power Control Methods of Switched Reluctance Motors p. 390
A New Phase Energization Strategy for the Minimization of Torque Ripples in Hybrid Step Motors p. 396
