Preface

Acknowledgements

Causality in Bayesian Belief Networks p. 3

From Conditional Oughts to Qualitative Decision Theory p. 12

A Probabilistic Algorithm for Calculating Structure: Borrowing from Simulated Annealing p. 23

A Study of Scaling Issues in Bayesian Belief Networks for Ship Classification p. 32

Tradeoffs in Constructing and Evaluating Temporal Influence Diagrams p. 40

End-User Construction of Influence Diagrams for Bayesian Statistics p. 48

On Considering Uncertainty and Alternatives in Low-Level Vision (Outstanding Student Paper) p. 55

Forecasting Sleep Apnea with Dynamic Network Models p. 64

Normative Engineering Risk Management Systems p. 72

Diagnosis of Multiple Faults: A Sensitivity Analysis p. 80

Additive Belief-Network Models p. 91

Parameter adjustment in Bayes networks. The generalized noisy OR-gate p. 99

A fuzzy relation-based extension of Reggia's relational model for diagnosis handling uncertain and incomplete information p. 106

Dielectric reasoning with inconsistent information p. 114

Causal Independence for Knowledge Acquisition and Inference p. 122

Utility-Based Abstraction and Categorization p. 128

Sensitivity Analysis for Probability Assessments in Bayesian Networks p. 136

Causal Modeling p. 143

Some Complexity Considerations in the Combination of Belief Networks p. 152

Deriving A Minimal I-map of a Belief Network Relative to a Target Ordering of its Nodes p. 159

Probabilistic Conceptual Network: A Belief Representation Scheme for Utility-Based Categorization p. 166

Reasoning about the Value of Decision-Model Refinement: Methods and Application p. 174

Mixtures of Gaussians and Minimum Relative Entropy Techniques for Modeling Continuous Uncertainties p. 183

Valuation Networks and Conditional Independence p. 191

Relevant Explanations: Allowing Disjunctive Assignments p. 200

A Generalization of the Noisy-Or Model p. 208

Using First-Order Probability Logic for the Construction of Bayesian Networks p. 219

Representing and Reasoning With Probabilistic Knowledge: A Bayesian Approach p. 227

Graph-Grammar Assistance for Automated Generation of Influence Diagrams p. 235

Using Causal Information and Local Measures to Learn Bayesian Networks (Outstanding Student Paper) p. 243

Minimal Assumption Distribution Propagation in Belief Networks p. 251

An Algorithm for the Construction of Bayesian Network Structures from Data (Outstanding Student Paper) p. 259

A Construction of Bayesian Networks from Databases Based on an MDL Principle p. 266
Knowledge-Based Decision Model Construction for the Hierarchical Diagnosis: A Preliminary Report
A Synthesis of Logical and Probabilistic Reasoning for Program Understanding and Debugging
An Implementation of a Method for Computing the Uncertainty in Inferred Probabilities in Belief Networks
Incremental Probabilistic Inference
Deliberation Scheduling for Time-Critical Sequential Decision Making
Intercausal Reasoning with Uninstantiated Ancestor Nodes
Inference Algorithms for Similarity Networks
Two Procedures for Compiling Influence Diagrams
An efficient approach for finding the MPE in belief networks
A Method for Planning Given Uncertain and Incomplete Information
The use of conflicts in searching Bayesian networks
GALGO: A Genetic ALGOrithm Decision Support Tool for Complex Uncertain Systems Modeled with Bayesian Belief Networks
Using Tree-Decomposable Structures to Approximate Belief Networks
Using Potential Influence Diagrams for Probabilistic Inference and Decision Making
Deciding Morality of Graphs is NP-complete
Incremental computation of the value of perfect information in stepwise-decomposable influence diagrams
Argumentative inference in uncertain and inconsistent knowledge bases
Argument Calculus and Networks
Argumentation as a General Framework for Uncertain Reasoning
On reasoning in networks with qualitative uncertainty
Qualitative Measures of Ambiguity
A Bayesian Variant of Shafer's Commonalities For Modelling Unforeseen Events
The Probability of a Possibility: Adding Uncertainty to Default Rules
Possibilistic decreasing persistence
Discounting and Combination Operations in Evidential Reasoning
Probabilistic Assumption-Based Reasoning
Partially Specified Belief Functions
Jeffrey's rule of conditioning generalized to belief functions
Inference with Possibilistic Evidence
Constructing Lower Probabilities
Belief Revision in Probability Theory
The Assumptions Behind Dempster's Rule
A Belief-Function Based Decision Support System
Author Index
