Preface

Acknowledgments

Description Logic Framework for Information Integration p. 2
A Completeness Result for Reasoning with Incomplete First-Order Knowledge Bases p. 14
A Strategy for Revising Default Theory Extensions p. 24
Anything Can Happen: on narratives and hypothetical reasoning p. 36
Combining Narratives p. 48
How (Not) To Minimize Events p. 60
A Comparison of the Static and the Disjunctive Well-founded Semantics and its Implementation p. 74
Preferred Answer Sets for Extended Logic Programs p. 86
Dynamic Logic Programming p. 98
Foundations of Spatioterminological Reasoning with Description Logics p. 112
A model for reasoning about bidimensional temporal relations p. 124
A Qualitative Theory of Motion Based on Spatio-Temporal Primitives p. 131
On the Compilability of Diagnosis, Planning, Reasoning about Actions, Belief Revision, etc. p. 144
Compiling Devices: A Structure-Based Approach p. 156
Explanatory Diagnosis: Conjecturing actions to explain observations p. 167
Comparing Consequence Relations p. 180
SYSTEM JZ: How to build a canonical ranking model of a default knowledge base p. 190
Pointwise Circumscription Revisited p. 202
Satisfiability Planning with Causal Theories p. 212
On Measuring Plan Quality (A Preliminary Report) p. 224
Modal Semantics for Knowledge Bases Dealing with Vague Concepts p. 234
A Theory of Granularity and its Application to Problems of Polysemy and Underspecification of Meaning p. 245
The PMA and Relativizing Change for Action Update p. 258
Quantifiers and Operations on Modalities and Contexts p. 270
Local Models Semantics, or Contextual Reasoning = Locality + Compatibility p. 282
Concurrent Actions and Interacting Effects p. 292
Logic Based Modelling of Goal-Directed Behavior p. 304
AOL: a logic of acting, sensing, knowing, and only knowing p. 316
A Canonical Model of the Region Connection Calculus p. 330
Undecidability of Plane Polygonal Mereotopology p. 342
Complexity results for independence and definability in propositional logic p. 356
The Complexity of Model Checking in Modal Event Calculi with Quantifiers p. 368
Probabilistic Deduction with Conditional Constraints over Basic Events p. 380
Specifying Transactions for Extended Abduction p. 394
Disjunctive Ordered Logic: Semantics and Expressiveness p. 418
Modeling an Agent's Incomplete Knowledge during Planning and Execution p. 432
Reformulating Temporal Plans For Efficient Execution p. 444
Execution Monitoring of High-Level Robot Programs p. 453
A general approach for inconsistency handling and merging information in prioritized knowledge bases p. 466
Formal Theory Building Using Automated Reasoning Tools p. 478
On the logic of merging p. 488
Characterizing the Semantics of Terminological Cycles in ALN Using Finite Automata p. 499
Satisfiability problem in description logics with modal operators p. 512
Nested Graphs: A Graph-based Knowledge Representation Model with FOL Semantics p. 524
Situation Calculus and Causal Logic p. 536
Sequential, Temporal GOLOG p. 547
Building Models of Prediction Theories p. 557
Reasoning About Infinite Random Structures with Relational Bayesian Networks p. 570
Geometric Foundations for Interval-Based Probabilities p. 582
Making Decision in a Qualitative Setting: from Decision under Uncertainty to Case-based Decision p. 594
Encoding Planning Constraints into Partial Order Planning Domains p. 608
A Planning Algorithm not based on Directional Search p. 617
More evaluation of decision procedures for modal logics p. 626
Using an Expressive Description Logic: FaCT or Fiction? p. 636
How to Tailor Representations to Different Requirements p. 650
What Robots Can Do p. 651
Description Logics and their Applications p. 652
Themes at the Co-Located Workshops p. 654
Index p. 656
