Applications and Properties of MOCVD Titanium Nitride

MOCVD of Titanium Nitride from TDEAT and NH$_3$ - Process Variables Affecting Step-Coverage, Resistivity and Impurity Levels

Experimental and Simulation Studies of Atmospheric Pressure Chemical Vapor Despotion of Titanium Nitride from Tetrakis-Dimethylaminotitanium and Ammonia

Chemical Vapor Deposited TiN Films for Sub-0.5 [μm] Contact and Via Applications

Low Temperature In-Situ Sequential Chemical Vapor Deposition of Ti/TiN Ultrathin Bilayers for ULSI Barrier Applications

CVD Ti and CVD TiN: Electrical Performance as Contact Metallurgy

Characterization of Titanium Thin Films Deposited by Plasma-Enhanced Chemical Vapor Deposition

Enhanced Bottom Coverage of Sub-Micron Contact Holes Using a Novel Hi-FILL Ti/TiN Sputter Process

Step Coverage of MOCVD TDEAT TiN in High Aspect Ratio, Small Dimension Contacts

Cluster Integration of Ti/TiN Barrier Deposition and N$_2$/O$_2$ RTP Stuffing for Hot Aluminum Contact Filling Application

The Use of Composite TiN Targets as a Non-Contaminating Arc Source

An In-Situ Reactively Sputtered Composite TiN Barrier for Use with Multi-Level, Hot Aluminum Fill 0.7u to 0.5u Logic Devices

Physical Vapor Deposited Adhesion and Barrier Layers for the ULSI Era

Collimated Sputter-Deposition of Metal Liners: Modeling of Microstructure and Step Coverage

Interactive Processing Effects of TDEAT/NH$_3$ Derived MOCVD TiN on Contact and Via Stacks

Experimental and Simulation Studies of PECVD Titanium

Uncollimated and Collimated TiN PVD: Simulations and Experiments

Planarization of Pre-Metal and Metal Levels for 0.5 [μm] and 0.35 [μm] Logic CMOS Processes

A Strategy to Accelerate the Implementation of Low K ILD Materials in ULSI Interconnections

Comparison of Single Frequency Versus Dual Frequency Nitrogen Plasma Pre-Treatment on O$_2$/TEOS Sub-Atmospheric CVD (SACVD) Oxide

Future Directions in Aluminum Alloy Electromigration: Relating Accelerated Testing to Product Life

Line Width Dependence of Stress Relaxation and the Role of Microstructure in Passivated Al(Cu) Lines

Observation of Dislocation Motion in Passivated Al-1% Cu Films

Electromigration Resistance of an ULSI Copper via Structure Compared with a Tungsten and an Aluminum-Plug Via Structure with Barrier Layers

Self-Aligned Silicidation for Sub Half Micron Technologies

Deposition Chemistry of CVD-WSi$_x$ Process from [actual symbol not reproducible]

Effect of SiH$_4$/WF$_6$/NF$_3$ Chamber Clean on Fluorine Content of CVD WSi$_x$ Layers

Silicidation Kinetics of TiN/Co/Ti Films
The Reduction of WF$_6$ by H$_2$ Studied by Laser Raman Scattering and Numerical Simulations

New Novel Cleaning Technique for Extending Mean Time Between Mechanical Cleans in a Genus Tungsten CVD Reactor

Differences in the Microstructure and Electrophysical Behavior of W Films Deposited by Chemical Vapor Deposition Using W(CO)$_6$ and WCl$_6$ Precursors

Selective Tungsten CVD Process Integration on 0.5[μm] CMOS Technology

Kinetic Model Testing and Extraction of Wafer Surface Conditions from Film Profiles in LPCVD Tungsten from Silane and Tungsten Hexafluoride

Selective Al CVD Technology for ULSI Application

Via Plugging by Selective-CVD-Al: Pretreatment of via Holes with or without Cap-Metal

Application of In-situ Al-Flow Process for Triple-Level Metallization

Void-Free Aluminum Planarization Process: Effects of Underlayers, Post-Deposition Treatments of TiN Barriers and Process Conditions of Sputtering

Manufacturing Issues of Al Planarization Processes for Sub 0.5 [μm] ULSI Interconnects

Process Optimization of Planarized Al Via for Sub-Half Micron ULSI Interconnects

Future Trends in Dram Technology

Processing of Stacked, High Aspect Ratio Contacts and Vias with Consistently Low Resistances

Uniform Metallization Concept for Chip Interconnection Techniques

A Submicron Contact Filling Technology by Contact Profile Control

Improved MIM Capacitors with Boron-Implanted Al
