Preface p. xxi
Acknowledgments p. xxiii
Materials Research Society Symposium Proceedings p. xxiv

Symposium E
Quantum Dot Theory
Tunnel-Coupled Quantum Dots: Atomistic Theory of Quantum Dot Molecules and Arrays p. 5

Quantum Dot Growth
Occurrence of ‘Accidental’ InN Quantum Dots in Indium Gallium Nitride/Gallium Nitride Heterostructures p. 13
1.6 [μm] Emission From InAs Quantum Dots Grown on a GaAs Substrate Using an AlGaAsSb Metamorphic Buffer p. 19
Binary and Ternary Mercury Chalcogenide Quantum Dots and Clusters p. 25
Semiconductor Nanocrystal Based Saturable Absorbers for Optical Switching Applications p. 31
Self Assembled PbSe Quantum Dots With Almost Equal Sizes Grown by MBE on PbTe/Si(111) p. 37

Quantum Dot Optics
Wavelength Selective Charge Storage in Self-Assembled InGaAs-GaAs Quantum Dots p. 45
Optical Properties of InAs/InP Planar Quantum Dot Microcavities p. 53
Local Strain Effects in Near-Field Spectra of Single Semiconductor Quantum Dots p. 59
Optical Properties of Semimagnetic Quantum Dots p. 65
Resonant Photoluminescence and Excitation Spectroscopy of CdSe/ZnSe and CdTe/ZnTe Self-Assembled Quantum Dots p. 71
Optical Properties of Self-Assembled InAs Quantum Dots Grown on InAlAs/InP(001) p. 77
Single Quantum Dot Spectroscopy
Nonlinear Carrier Relaxation in a Single GaAs Self-Organized Quantum Dot p. 87
Charge and Spin
Charged Excitons in Self-Assembled Quantum Dots p. 95
Kondo-Excitons and Auger Processes in Self-Assembled Quantum Dots p. 107

Poster Session
Sub-Wetting Layer Continuum States in the Self-Organized Quantum Dot Samples p. 115
Influence of In[0.2]Ga[0.8]As Strain-Reducing Layer on the Active Region of Quantum Dot Superluminescent Diodes p. 119
Dislocation-Induced Spatial Alignment of Self-Assembled InAs/GaAs Quantum Dots p. 129
Resonant Raman Scattering by Strained and Relaxed Ge Quantum Dots p. 135
Raman Spectroscopy of Self-Assembled InAs Quantum Dots in Wide-Bandgap Matrices of AlAs and Aluminium Oxide p. 141
Hyper-Rayleigh Scattering and Fluorescence of CdS-ZnS Nanoparticle Composites p. 147
Giant Exciton-Light Coupling in Large Size Semiconductor Quantum Dots p. 153
Up-Conversion Luminescence in Colloidal CdTe Nanocrystals p. 157
Long-Lifetime Nonlinear Absorption of PbS Quantum Dots p. 163
Chemically Functional Semiconductor Nanocrystals: Electrochemistry and Self-Assembly on Surfaces p. 169
GaSb-Based Nanocomposites as IR-Emitters p. 175
Investigation of the Shape of InGaAs/GaAs Quantum Dots p. 179
Shape Engineered InAs Quantum Dots With Stabilized Electronic Properties p. 185
Si/Ge Quantum Dot Structures
Silicon Epitaxial Regrowth Passivation of SiGe Nanostructures Patterned by AFM Oxidation p. 193
Bio-Quantum Dots
Synthesis of Semi-Conducting Nanoparticles Within a Protein Template p. 201
Electric Force Microscopy and Charge Injection
Optical Detection of the Charging of InAs Quantum Dots With Different Backgate Configurations p. 209
Transport
Size and Shape Dependent Level Structure in CdSe Quantum Rods p. 217
Current-Voltage Characteristics of Single CdSe Colloidal Nanodots Measured by Conductive-Tip Atomic Force Microscopy p. 227
Transport Properties of Superlattice Nanowires and Their Potential for Thermoelectric Applications p. 233
Symposium F
Si Nanocrystals and nc-Si Superlattices
Photoluminescence Within Crystalline-Si/SiO[subscript 2] Single Quantum Wells p. 243
Charge Retention in Single Silicon Nanocrystal Layers p. 253
Spectroscopic Ellipsometry Studies of Nanocrystalline Silicon in Thin-Film Silicon Dioxide p. 259
Mechanisms of Visible Photoluminescence From Size-Controlled Silicon Nanoparticles p. 265
Synthesis and Size Control of Si Nanocrystals by SiO/SiO[subscript 2] Superlattices and Er Doping p. 271
Quantitative Charge Imaging of Silicon Nanocrystals by Atomic Force Microscopy p. 283
A New Synthetic Route to Alkyl Terminated Silicon Nanoparticles p. 289
Control of Silicon Quantum Dots Nucleation and Growth by CVD p. 295
Synthesis of Crystalline Silicon Nanoparticles in Low-Pressure Inductive Plasmas SiGe Nanostructures p. 301
Self-Assembled Si/Ge Quantum Dot Structures for Novel Device Applications p. 309
Effect of Phosphorus on Ge/Si(001) Island Formation p. 321
Anomalous X-ray Scattering on Self-Assembled Islands: Direct Evaluation of Composition Profile, Strain Relaxation, and Elastic Energy p. 329
Poster Session
New Pairs of Inks and Papers for Photolithography, Microcontact Printing, and Scanning Probe Nanolithography p. 341
Preparation and Characterization of Fine Barium Carbonate Particles p. 347
Comparative Study of the Growth Curves of B. subtilis, K. pneumoniae, C. xerosis and E. coli Bacteria in Medium Containing Nanometric Silicon Particles p. 351
Preparation and Photoactive Characterization of Tube-Shaped Al-Doped ZnO Ceramics p. 357
Electron Irradiation on Amorphous Silicon p. 365
The Effect of Chemical Treatment on Porous Silicon: The Role of Alcohol p. 371
Clausius-Mossotti Approximation for Nonlinear Composites With Coated Ellipsoidal Particles p. 377
Transport Properties and Observation of Semimetal-Semiconductor Transition in Bi-Based Nanowires p. 383
Diffusional Coating of Nanoparticles p. 389
Raman Analysis of Carbon Nanotube Bundles for Bio-Electronic Applications p. 395
Two-Dimensional Epitaxial Growth of Strained InGaAs on GaAs(001) p. 401
Optical Amplification in Nanocrystalline Silicon Superlattices p. 407
Sol-Gel Template Synthesis and Liquid CO$_2$ Developed TiO$_2$/CdS Composite Nanowire Arrays p. 413
Patterned Structures of Silicon Nanocrystals Prepared by Pulsed Laser Interference Crystallization of Ultra-Thin a-Si:H Single-Layer p. 419
New Nanocrystalline Si Floating Gate Structure for Nonvolatile Memory Application p. 425
Periodic Two-Dimensional Arrays of Silicon Quantum Dots for Nanoscale Device Applications p. 431
Estimation of Silicon Nanocrystalline Sizes From Photoluminescence Measurements of RF Co-Sputtered Si/SiO$_2$ Films p. 437
Fabrication of Si-Ge Compound Nanowires by the FZ Melting Vapor Method p. 443
Electrical Properties of Thin Nitrogen-Doped Ultrananocrystalline Diamond Films p. 449
Sol-Gel Derived Bi$_{4-x}$Nd$_x$Ti$_3$O$_{12}$ Thin Films and Their Characterization p. 455
2D Assemblies of Silicon Nanocrystallites Prepared by Sol-Gel Method From Triethoxysilane p. 461
The Effect of Hydrogen Incorporation on the Performance of Nanocrystalline Silicon Thin Film Transistors Fabricated by Microwave ECR Plasma CVD p. 469
SiC-Like Phase and Room-Temperature Photoluminescence of Low-k SiOCH Films p. 475
Formation and Cathodoluminescence of Silicon Nanoclusters in Silica p. 481
Nano-Scale Morphology and Electron Spectrum of Defect States in Low-k SiOCH Films p. 487
Stoichiometry, Crystallinity, and Nano-Scale Surface Morphology of the Graded Calcium Phosphate-Based Bio-Ceramic Interlayer on Ti-Al-V p. 493
Polarization Anisotropy in Electroreflectance Spectrum of Porous Silicon p. 499
Carbon Nanotubes Grown on Metallic Wires by Cold Plasma Technique p. 505
Formation of SiGe Nanoparticles by Dry and Steam Thermal Oxidation of Thin Polycrystalline Layers p. 511
Spectroscopic Study of Rare Earth Doped Nano-Crystalline Silicon in SiO$_2$ Films p. 517
Characterization of Nanographite and Carbon Nanotubes by Polarization Dependent Optical Spectroscopy p. 523
Tunable Porous Silicon Mirrors for Optoelectronic Applications p. 529
Effect of Surface Treatments in Nanocrystalline Silicon p. 535
Optical Properties of Silicon Nanoparticles in Silica Gel Monoliths p. 541
Bioactive Nanostructures and Surface Chemistry
Porous Silicon Electrical Biosensors
Preparation and Electrochemical Characterization of DNA-Modified Nanocrystalline Diamond Films
Functionalization of Porous Silicon With Alkenes and Alkynes via Carbocation-Mediated Hydrosilylation
Covalently-Linked Adducts of Single-Walled Nanotubes With Biomolecules: Synthesis, Hybridization, and Biologically-Directed Surface Assembly
Electroless Deposition and Patterning of Morphologically Complex Precious Metal Films on Semiconductor Surfaces
Effects of Amorphous Carbon Films on the Performance of Porous Silicon Electroluminescence
Novel Lithographic Techniques and Lateral Nanopatterning
Nanoscale Organic Electronic Devices Formed by Lamination With Stamps
Electrophoretic Deposition of CdSe Nanocrystal Films on Conducting Electrodes
Si Nanoparticle Synthesis and Self-Organization
Semiconductor Nanowires and Nanotubes I
Direct Synthesis of Silicon Nanowires Using Silane and Molten Gallium
Quantitative V-L-S Growth Model and Experiments of Fe Catalyzed Si Nanowire Formation
Imaging, Structural and Chemical Analysis of Silicon Nanowires
Semiconductor Nanowires and Nanotubes II
Nano-Optics of Bismuth Nanowires
Poster Session
The Pile-Ups of Aluminum and Boron in the SiGe(C)
Evidence of Ti-Related Inclusions in an Al Alloy Interconnecting Layer for Nanometer 256MBit DRAM Semiconductor Devices Characterized by TEM, STEM, EELS Elemental Mapping, and XEDS Linescan
Si Nanocrystals by Metal Induced Growth Using Different Catalyzing Metals
Exploiting Silicon Porosity Gradients for Superior Antireflective Films
Polymorphous Silicon Nanowires Synthesized by Plasma-Enhanced Chemical Vapor Deposition
Anisotropy in the Phonon Dispersion Relations of Graphite and Carbon Nanotubes Measured by Raman Spectroscopy
Microstructure of the Silicon Film Prepared Near the Phase Transition Regime From Amorphous to Nanocrystalline
Influence of Different Atmospheres on the Life Time of Porous Silicon Light-Emitting Devices
Investigation on Process Dependence of Self-Assembled Metal Nanocrystals
TEM and PL Study of FeSi[2] Precipitates Formed in Si by Iron Implantation Using a Metal Vapor Vacuum Arc Ion Source
Characterization of Co-Catalyzed Multiwalled Carbon Nanotubes by High-Resolution Transmission Electron Microscopy
Moisture Effects of Crack Initiation in Nanocrystalline Silicon: A Hybrid Density-Functional/Molecular-Dynamics Study
Sol-Gel Synthesis and Characterization of CuO-Based Nanosystems
Particle Production in High Density Silane Plasma
