Strengthening of iron aluminate alloys for high-temperature applications  p. 3
Effect of alloying elements (Ga, Ge, Si) on pseudoelasticity in Fe[subscript 3]Al single crystals  p. 15
Pseudoelasticity of D0[subscript 3] ordered monocrystalline Fe[subscript 3]Al  p. 21
Development of high temperature creep resistance in Fe-Al alloys  p. 27
Microstructure and mechanical properties of Fe-Ni-Mn-Al alloys  p. 35
Thermomechanical treatment of a Fe[subscript 3]Al alloy  p. 41
Optimization of precipitation for the development of improved wrought Fe[subscript 3]Al-based alloys  p. 47
Effect of excess vacancies on antiphase domain growth in Fe[subscript 3]Al  p. 53
Microstructure, mechanical properties and wear resistance of Fe-Al based alloys with various alloying elements  p. 59
Microstructures and mechanical properties of NiAl-Mo composites  p. 67
Microstructure and thermo-mechanical behavior of NiAl coatings  p. 73
Quantitative analysis of [gamma] precipitates in cyclically deformed Ni[subscript 3](Al,Ti) single crystals using magnetic technique  p. 79
Microstructures in cold-rolled Ni[subscript 3]Al single crystals  p. 85
Crystal structure, phase stability and plastic deformation behavior of Ti-rich Ni[subscript 3](Ti,Nb) single crystals with various long-period ordered structures  p. 91
Effect of Fe alloying on the vacancy formation in Ni[subscript 3]Al  p. 97
An electron microscope study of mechanical twinning in a precipitation-hardened TiAl alloy  p. 103
Increase in [gamma]/[alpha] lamellar boundary density and its effect on creep resistance of TiAl alloy  p. 109
Effect of long-term aging and creep exposure on the microstructure of TiAl-based alloy for industrial applications  p. 115
Creep behavior and microstructural stability of Ti-46Al-9Nb with different microstructures  p. 121
Internal friction of a high-Nb gamma-TiAl-based alloy with different microstructures  p. 127
Investigation of the structure and properties of hypereutectic Ti-based bulk alloys  p. 133
TEM characterization of Fatigue tested lamellar Ti-44Al-8Nb-1B  p. 139
On the effects of interstitial elements on microstructure and properties of ternary and quaternary TiAl based alloys  p. 145
The correlation of slip between adjacent lamellae in TiAl  p. 151
A study of the deformation behavior of lamellar [gamma]-TiAl by numeric modeling  p. 157
Effect of B addition on thermal stability of lamellar structure in Ti-47Al-2Cr-2Nb alloys  p. 163
Compressive creep behavior in coarse grained polycrystals of Ti[subscript 3]Al and its dependence on binary alloy compositions  p. 169
Micro fracture toughness testing of TiAl based alloys with a fully lamellar structure  p. 175
High-temperature environmental embrittlement of thermomechanically processed TiAl-based intermetallic alloys with various kinds of microstructures  p. 181
Experimental studies and thermodynamic simulation of phase transformations in [gamma]-TiAl based alloys p. 187
Massive transformation in high Niobium containing TiAl-alloys p. 193
The creep behaviors of two fine-grained XD TiAl alloys produced by similar heat treatments p. 199
Creep of TiAl alloys at 750[degrees]C under moderate stress p. 205
Abnormal deformation behavior in polycrystalline TiAl crystals with A and N orientations - an AFM study p. 211
Rationalization of the plastic flow behavior of polycrystalline-twin (PST) TiAl crystals based on slip mode observation using AFM and Schmid's law p. 217
Texture development during hot extrusion of a gamma titanium aluminide alloy p. 223
Fatigue testing of microsized samples of [gamma]-TiAl based material p. 229
Microstructure-property relationships of two Ti[subscript 2]Al[subscript 33]Nb(at.%) and Ti-21Al-29Nb(at.%) p. 235
Phase transformation in orthorhombic Ti[subscript 2]AlNb alloys under severe deformation p. 241
Impact properties of hot-worked gamma alloys with BCC [beta]-Ti phase p. 247
Effects of long-period superstructures on plastic properties in Al-rich TiAl single crystals p. 253
TEM analysis of long-period superstructures in TiAl single crystal with composition gradient p. 259
Influence of micro-alloying on oxidation behavior of TiAl p. 265
The effects of substitutional additions on tensile behavior of Nb-silicide based composites p. 273
Effect of microstructure and Zr addition on the crystallographic orientation relationships among phases related to the eutectoid decomposition of Nb(subscript 3)Si in near eutectic Nb-Si alloy p. 279
Microstructures of LENS deposited Nb-Si alloys p. 285
Experimental investigation and thermodynamic modeling of phase equilibria in the Hf-Ti-Si system p. 297
Role of microstructure in promoting fracture and fatigue resistance in Mo-Si-B alloys p. 303
A bond-order potential incorporating analytic screening functions for the molybdenum silicides p. 309
High temperature oxidation behavior of Al added Mo/Mo[subscript 5]SiB[subscript 2] in situ composites p. 315
Nucleation of (Mo) precipitates on dislocations during annealing of a Mo-rich Mo[subscript 5]SiB[subscript 2] phase p. 321
Advanced TEM investigations on Ni-Ti shape memory material : strain and concentration gradients surrounding Ni[subscript 4]Ti[subscript 3] precipitates p. 329
Sub-nano and nano-structures of hydrides of LaNi[subscript 5] and its related intermetallics p. 339
Transformation behavior of TiNiPt thin films fabricated using melt spinning technique p. 347
Factors for controlling Martensitic transformation temperature of TiNi shape memory alloy by addition of ternary elements  
Shape memory effect through L1[script 0]-fcc order-disorder transition  
Effect of heat treatment conditions on multistage Martensitic transformation in aged Ni-rich Ti-Ni alloys  
Application of the CSL model to deformation twin boundary in B2 type TiNi compound  
Coarsening behavior and coercivity in L1[script 0]-ordered intermetallic Fe-Pd ferromagnets with equiaxed grain morphology  
Comparison of temperature driven ordering in bulk foil and thin film of L1[script 0]-ordered FePd  
Formation of defect structures during annealing of cold-deformed L1[script 0]-ordered equiatomic FePd intermetallics  
Magnetic properties of E2[script 1]-base Co[script 3]Al and the correlation with the ordering of carbon atoms and vacancies  
Structural properties and magnetic behavior in the pseudobinary alloys CoFe-CoAl  
Directional thermoelectric performance of Ru[script 2]Si[script 3]  
Mechanical aspects of structural optimization in a Bi-Te thermoelectric module for power generation  
Effects of Ga- and in-doping on the thermoelectric properties in Ba-Ge clathrate compounds  
Crystal structure and thermoelectric properties of Al-containing Re silicides  
Characterization and catalytic properties of Ni[script 3]Al for hydrogen production from methanol  
Complex intermetallic compounds: defects, disordering, details  
Effect of heat treatments on microstructure of rapidly solidified TiCo ribbons  
In situ observation of surface relief formation and disappearance during order-disorder transition of equi-atomic CuAu alloy using laser scanning confocal microscopy  
Phase equilibria and lattice parameters of Fe[script 2]Nb laves phase in Fe-Ni-Nb ternary system at elevated temperatures  
Sputtered coatings based on the Al[script 2]Au phase  
Solidification processing and fracture behavior of RuAl-based alloys  
Formation and morphology of Kurnakov type D022 compound in disordered fcc [gamma]-Ni, Fe) matrix alloys  
Parameters of dislocation structure and work hardening of Ni[script 3]Ge  
Identification of the chirality of intermetallic compounds by electron diffraction  
Mechanical behavior of a Pt-Cr jewelry alloy hardened by nano-sized ordered particles  
First-principles study of structural and defect properties in FeCo intermetallics  
Dislocation structure, phase stability and yield stress behavior of ultra-high temperature L1[script 2] intermetallics: combined first principles-Peierls-Nabarro approach  
Atomic, electronic, and magnetic structure of iron-based sigma-phases  
B2 phases and their defect structures: part I. Ab initio enthalpy of formation and enthalpy of mixing in the Al-Ni-Pt-Ru system
B2 phases and their defect structures: part II. Ab initio vibrational and electronic
free energy in the Al-Ni-Pt-Ru system p. 529

Thermal analysis of relaxation processes of supersaturated vacancies in B2-type
aluminides p. 535

Ab initio calculation of point defect energies and atom migration profiles in varying
surroundings in L12-ordered intermetallic compounds p. 541
