History and Ethnology of the Industries of Primary Processing
Economical Equilibrium and Dynamism
Legislative Aspects
The Biochemical Composition of Cereals
Physical Characteristics of Grains and Their By-Products
The Microbiology of Cereals and Flours
Cereal Contaminations Originating from Animals or Insects
The Milling Value of Wheat
Break Roller Mill Performances
The Shelling of Oats
Bolting, Purification and Air Classification
The Blending of Powdery Matter
Dry-Milling
The Dry and Wet Milling of Maize
Processing Rice
Handling, Packing and Transport of Finished Products
The Risk of Dust Explosion
Automation and Computerization in Primary Cereal Processing
Flour Aging
Defining Flour Quality According to Use
Improving Flour Quality: Additives Authorized in the Baking of French Breads
Industries for Primary Cereal Processing in Countries Under Development
The Future of Industries for Primary Cereal Processing
