Noise Problems Associated with Geometrically Stiffened Panels
Small Size Devices for Accurate Acoustical Measurements of Materials and Parts Used in Automobiles
Noise and Noise Reducing Materials
Damping Measurement of Sound Insulating Layers on Thin Metal Sheets
Measurement of Airborne Noise Reduction of Production Door Components on a Buck
Acoustical Performance Testing of Automotive Weatherseals
Noise Measurements and Characterization of Automotive Dampers
Measurement of the Statistical Variation of Structural-Acoustic Characteristics of Automotive Vehicles
The Measurement of Transient Vibration Intensity Using Three Channel Method
The Art of Measuring Noise from Vehicle Tires
Tire-Pavement Interaction Noise Measurement Under Vehicle Operating Conditions of Cruise and Acceleration
The Development of a New SAE Truck Tire-Pavement Interaction Noise Measurement Procedure
Reducing Tyre/Road Noise with Porous Road Surfaces and the Effect of Tyre Choice
The Influence of Boundary Conditions on the Vibration Transmission Properties of Tires
Motor Vehicle Noise Regulations
An Intelligent Systems Approach to Active Structural Acoustic Control
Vibration Absorbers Quiet Propeller Noise
An Analytical Study of Intensity Flow for Active Structural Acoustic Control in Cylinders
Active Control of Radiated Inlet Noise from Turbofan Engines
The Use of the Wigner Distribution to Identify Wave-Types in Multi-Element Structures
The Application of Dynamic Signal Analysis in Quality Control
High Resolution Order Tracking at Extreme Slew Rates, Using Kalman Tracking Filters
Chrysler's "New" Noise, Vibration, and Harshness Test Facility
Automotive Testing Requirements in the Design of a Reverberation Chamber
A Dynamometer System for Brake Noise Studies and Product Verification
Wind Noise and Aerodynamic Drag Optimization of Outside Rear View Mirrors
Noise Excitation by Auxiliary Units of Internal Combustion Engines
Measurement and Prediction of Power Steering Vane Pump Fluidborne Noise
Analysis of Tuning Cables for Reduction of Fluidborne Noise in Automotive Power Steering Hydraulic Lines
Integrating Fluid-Acoustic Unidimensional Models in the Time and Frequency Domains
Efficient Design Studies Using Eigensolution Reanalysis
Automotive Suspension Models Using Component Mobility Methodology
Identification of Internal Loss Factors During Statistical Energy Analysis of Automotive Vehicles
On the Use and Misuse of Statistical Energy Analysis for Vehicle Noise Control
Influence of Crankshaft-Pulley Dimensions on Crankshaft Vibrations and Engine-Structure Noise and Vibrations

Investigations into the Excitation of Low Frequency Half Order Vibrations in a Diesel Passenger Car Powertrain

Vibration Analysis of Drive Line and Suspension Using Finite Element Models

Engine Noise: Sound Source Location Using the STSF Technique

Development of a New Torsional Rubber Damper for Diesel Engines

Primary Noise Reduction Measures on IDI Diesel Engines

Vehicle Driveline Investigations: Applications of Computer Analysis Based on Operating Mode Shape Analysis OMS, Mode Shape Analysis and Substructure Calculations

Analysis and Improvement of Bus Body Vibration Excited by Road Surface Roughness

Practical Considerations of Vehicle Noise and Vibration Simulation Using an Improved Dynamic Impedance Method

An Improved Dynamic Impedance Method for Dynamic Analysis of a Vehicle

Influence of Bottom End Design on Noise and Vibration Behavior of 4-Cylinder In-Line Gasoline Engines

Special Noise Problems in Automotive Timing Belts

An Air Induction System for a Four-Cylinder Engine: Design, Noise Control and Engine Efficiency

Structural Vibration Analysis in Turbocharger-Exhaust Systems

The Thought and Reasoning Behind Developing SAE J1637 - Vibration Damping Test Method

On the Dynamic Response of Hydraulic Engine Mounts

Optimization of Engine Mounting Systems to Minimize Vehicle Vibration

A New Method for Analyzing Idle Shake on Front Wheel Drive Cars

Research for New Vibration Isolation Techniques: From Hydro-Mounts to Active Mounts

Road Noise Reduction Using Transfer Function Synthesis Method

Structural-Acoustic Analysis for the Prediction of Vehicle Body Acoustic Sensitivities

An Integrated Approach to Finite Element Model Validation: Software Tools and Case Study in Automotive Industry

Investigating Impulsive Sounds - Beyond "Zwicker-Loudness"

A New Method for Determining the Subjective Effects of Sounds and Vibration Using an Objective Procedure

Automated, Objective Classification of Vehicle Noise and Vibration Using Hyperstate Modeling

Quantification of Subjective Unpleasantness Using Roughness Level

Synthesis of Powertrain Sounds for Investigations in Roughness

Reduction of Cooling Fan Noise Caused by Crankshaft Torsional Vibration

A New Measurement Method for Separating Airborne and Structure Borne Sound from an I.C. Engine's Valve Train Mechanism

Analysis and Reduction of Engine Front Noise Induced by the Vibration of the Crankshaft System

An Experimental Study of a Dual Frequency Elastomeric Torsional Damper for an Engine Crankshaft
Reduction of Exhaust and Air Induction System Noise by a Predictive Method p. 611
Controlling Panel Noise and Vibration Using Non-Contacting Test Methodologies p. 619
Using Mechanical-Acoustic Reciprocity for Diagnosis of Structure Borne Sound in Vehicles p. 625
Structural Design Changes as a Solution to a Resonance Fatigue Problem of a Sports Car p. 631
Improving Vehicle Body Structure NVH - An Experimental Approach p. 641
Suspension Analysis in View of Road Noise Optimization p. 647
Real Time Identification and Classification of Road Surface with Neural Network p. 653
Sound Quality Analysis of Vehicle Windshield Wiper Systems p. 661
Sound Quality of Audible Warning Devices p. 669
Sound Quality Evaluation of Passenger Vehicle Interior Noise p. 675
Diagnosis of Vehicle NVH Problems by Operating Vibration Analyses p. 693
Incorporation of Analytical Simulations into the NVH Design and Development Process of the Nissan Quest p. 701
Prediction and Control of Heavy Duty Powertrain Torsional Vibration p. 713
