Preface
Introduction
The Standard Model and Some New Directions p. 3
Black Holes
A Search for Black Holes in Galaxy Nuclei p. 23
The Structure of M32 at Red Wavelengths p. 35
Supermassive Black Holes in the Centers of Galaxies? p. 36
Diagnostics of a Putative Black Hole at the Galactic Center p. 40
Testing the AGN Paradigm for Our Home Galaxy p. 44
Tidal Disruption of a Star by a Supermassive Black Hole p. 48
Relativistic Fluid Flows in the Magnetized Schwarzschild Spacetime p. 52
Probing the Monster in Luminous Starburst Galaxies p. 56
Double-Peaked Line Profiles in AGNs--Testing for Supermassive Binary Black Holes p. 57
On the Luminosity of Black Hole Ouster Model of Active Galactic Nuclei p. 61
Infrared Angular Size and the Supermassive Black Hole Hypothesis in AGN p. 65
Orbital Models for the Periodic X-Ray Flares of NGC 6814 p. 69
The X-Ray Variability of AGN and the Anomalous Behavior of NGC 6814 p. 83
Temporal and Spectral X-Ray Variability from the Seyfert I Galaxy NGC 6814 p. 93
NGC 7469. The Perfect Triptych: Interaction, Circumnuclear Starburst and Black Hole? p. 97
Strong Black Holes as Cores of AGN p. 101
The Origin of Black Holes in Active Galactic Nuclei p. 105
Astrophysical Bags: A New Paradigm for Active Galactic Nuclei? p. 109
Red Holes, Not Black Holes, at AGN Centers? p. 113
Accretion Disks I.
Towards a "Disk Paradigm"? or An Empirical Approach to Accretion Disks in AGN p. 119
Do Accretion Disks Exist? IR through Radio Observations p. 129
Lyman Edges: Signatures of Accretion Disks p. 139
Observational Evidence for Thin AGN Disks p. 146
Comments on the Nature of the Lyman Edge from Thin Accretion Disks p. 155
Modeling of Lyman Edge Features in Accretion Disk Spectra p. 159
Hard X-Ray Observations of AGN: Evidence for Cold Matter p. 163
Hard X-Ray Observations of AGN p. 173
X-Ray Fe Line Studies p. 183
BBXRT Observations of NGC 4151: Fe K Line Diagnostics p. 192
Problems for the Standard Black Hole/Accretion Disk Models in Cygnus X-1? p. 196
Towards a Complete Sample of Ultra-Soft X-Ray-Emitting AGN p. 200
Optical Properties of Ultra-Soft X-Ray AGN p. 204
Using Color-Color Diagrams to Test Models for the "Blue Bump" p. 208
The Role of UV Bump in Line Emission p. 212
Double Peaked H[alpha] Profiles in AGNs--Searching for Reverberation from an Accretion Disk p. 216
More Double Peaked H[alpha] Profiles in AGNs p. 220
On the Origin of Double Peaked Broad Line Profiles in AGN: Accretion Disk with Hot Spots or Biconical BLR? p. 224
Accretion Disks II.
Diskoseismology: Signatures of Black Hole Accretion Disks p. 231
Observations of Diskoseismology p. 235
Tidal Interaction and Brightening of Accretion Disks Around Supermassive Black Holes p. 239
Resolving Accretion Discs with Microlensing p. 243
A Search for Microvariability in Five OVV Quasars p. 247
Rapid Variability in AGN and Accretion, Disk Hot-Spots p. 251
Are All QSOs Long-Period Variables? p. 255
Limit Cycles in Pair Dominated Accretion Disks p. 260
UV Variability and the Nature of the Continuum Source in NGC5548 p. 264
Accretion Disk Coronas in QSOs p. 268
Do Accretion Disk Instabilities Drive a Thermal Wind in AGN? p. 271
Evolution of a Compton Heated Wind from an Irradiated Accretion Disk p. 276
A New Mechanism for Viscosity in Cloudy Accretion Disks: Anomalous (Turbulent) Viscosity p. 280
Black Hole Accretion with Radiative Viscosity p. 284
High Energy Continuum
Nonthermal Electron-Positron Pairs and Cold Matter in the Central Engines of Active Galactic Nuclei p. 291
The High Energy AGN Continuum: Models without [actual symbols not reproducible]--Pairs p. 301
Structure and Spectra of Electron-Positron Pair Cascade Atmospheres p. 311
Pair Cascades Triggered by Relativistic Protons in AGNs p. 313
Relativistic Electron Production by Inelastic and Elastic Collisions in Active Galactic Nuclei p. 317
The Theoretical Gamma-Ray Spectrum of Quasars p. 321
Comptonization Modifications to the Gamma-Ray Spectrum of Active Galactic Nuclei p. 325
Radiation from Magnetized Accretion Disks in AGN p. 329
High Energy Emission in Accretion Flows in AGN p. 333
High Energy Spectra from the Jet/Disk Interface p. 337
A Neutrino Astronomy Test of the AGN Paradigm and the Broad Line Region p. 341
Gamma Rays from 3C 279 and Universal Energy Spectrum p. 345
High Energy Continuum Measurement of Active Galactic Nuclei p. 348
Gamma-Ray Monitoring of AGN and Galactic Black Hole Candidates by the Gamma-Ray Observatory p. 356
Constraints on Pairs and Reflections in Active Galaxies p. 362
The X-Ray Spectrum of 3C 273 as Observed with ROSAT p. 366
Spectral-Luminosity Evolution of Active Galactic Nuclei (AGN) and the Cosmic X- and Gamma Ray Background p. 370
Jets
Compact Jets and the AGN Paradigm
Jets on Large Scales
Relativistic Jets in AGN
HST Observations of the Jet in M87
High Resolution Observation of 3C 66B
Parsec-Scale Linear Polarization Structure of Active Galactic Nuclei
The Parsec-Scale Jets in 3C 273 and 3C 345
The Use of Radio Observations to Constrain the Luminosity of Anisotropic Radiation Field in Radio Galaxies
Compact Steep Spectrum Radio Sources and the Nuclear Environment
Preliminary Results of Optical and Near Infrared Imaging of GPS Radio Sources: Evidence for an Obscured AGN?
Models for the Gamma-Ray Emission of 3C 279
Reflections: The Optical Jet of 3C 273
Time-Dependent Inhomogeneous Jet Models for BL Lac Objects
On the Radiation Field in Astrophysical Jets
Anisotropies in Relativistic Jets: Beaming Patterns for Synchrotron and Inverse-Compton Emission
Unification of Radio-Loud AGN
VLA Studies of X-Ray Selected BL Lacertae Objects
The Strong Magnetic Field AGN-Quasar-Galaxy Formation Paradigm
AGN Geometry
The Nature of the Obscuration/Reflection Zone
Geometry of AGN on Parsec and Micro Parsec Scales
Obscured Type I Seyfert Nuclei
Spectropolarimetrically Discovered Obscured BLRs Inside Four Seyfert 2 Galaxies
Radiative Transfer in Axi-Symmetric Dust Clouds Around AGN
Outflow, Holes and UV Shadowing in Four Active Galaxies
The Role of AGN in Generating Optical Nebulosity in Early-Type Galaxies
Are the Extended Narrow Line Regions in AGN Photoionized by the Emission From Thick Accretion Disks?
A ROSAT High Resolution X-Ray Image of NGC 1068
4.7 [mu]m Spectroscopy of NGC 1068 in Search of Absorption by Gaseous CO In the Molecular Torus
Infrared Weak Quasars
Broad Line Regions
The Nature of the Broad Line Region: Optical/UV/X-Ray Studies
Starburst-Black Hole QSO Model I: Broad Emission Lines and the Central Luminosity
Starburst-Black Hole QSO Model II: Broad Absorption Lines
Broad Lines from Tidally Disrupted Stars
The Contribution of Stars to the AGN Line Emission
Star-Disk Collisions in Active Galactic Nuclei and the Origin of the Broad Line Region
