Preface

Photovoltaic Manufacturing and Module Development

The Photovoltaic Manufacturing Technology Project p. 3
GaAs Concentrator Cell Production Cost Analysis p. 8
Status of CdTe/CdS Development at Photon Energy, Inc p. 17
Progress Toward Stable Amorphous Silicon Photovoltaic Modules p. 33
High Efficiency Concentrator Modules Using Single and Multijunction III-V Solar Cells p. 39

Design Criteria of the Spherical Solar Cell p. 47
Development of Monolithically Integrated Silicon-Film Modules p. 52
Progress Towards High Performance Low Cost a-Si:H Alloy Multijunction Modules p. 58
Advances in Amorphous Silicon Alloy-Based Multi-junction Cells and Modules p. 64

Photovoltaic Materials and Devices

Growth and Properties of Thin Crystalline Silicon Layers p. 75
Properties of Hydrogenated Amorphous Silicon Produced At High Temperature p. 81
High Efficiency Thin Film Cadmium Telluride Solar Cells p. 88
Characterization of Silicon Solar Cell Substrates Using Edge-Passivated Diode Arrays p. 94
Numerical Modeling of Polycrystalline Thin Film Solar Cells p. 102

Fundamental Studies of Photovoltaic Materials

Spontaneous Composition Modulation: A New Tool for Tailoring the Optoelectronic Properties of Semiconductors p. 125
Overview of Ordering and Related Anomalous Properties of Ga[subscript 0.5]In[subscript 0.5]P p. 132
Trap-Controlled Hydrogen Diffusion and the Mechanism of Light-Enhanced Diffusion in a-Si:H p. 138
Microcharacterization of Polycrystalline Semiconductor Thin Films for Photovoltaic Applications p. 140
Minority-Carrier Lifetime of Compound Semiconductors: Polycrystalline CdTe p. 149
Polycrystalline Thin Films

Analysis of High Efficiency CuInGaSe[subscript 2] Based Solar Cells p. 157
Copper-Indium-Diselenide Prepared by Elemental Deposition and Compound Formation: Material and Devices p. 164
Innovative Deposition Techniques for the Fabrication of Polycrystalline Thin-Film Photovoltaics p. 177
Novel Processing and Device Structures in Thin-Film CuInSe[subscript 2]-Based Solar Cells p. 186
Electronic Properties of Copper Indium Diselenide Fabricated by Two-Step/Solid Selenium Processing p. 194
Large-Grained Copper Indium Diselenide Crystal Growth by Computer-Controlled High-Pressure Liquid-Encapsulated Directional Solidification p. 200
Photovoltaics Performance and Testing
Thin-Film PV Module Testing at NREL  p. 429
EVA Degradation Mechanisms Simulating Those in PV Modules  p. 445
An Overview of NREL's PV Solar Radiation Research Task Activities and Results  p. 453
Photovoltaic Standards Development within ASTM  p. 462
National (IEEE) and International (IEC) Photovoltaic Standards Update IEC Standards Writing Process  p. 468
Application Opportunities for Photovoltaics
The Role of PV in Demand-Side Management: Policy and Industry Challenges  p. 479
New Capabilities for Solar Resource Assessments  p. 488
Studies of Solar Photovoltaic/Electrolytic Hydrogen Systems  p. 496
Other Photovoltaic Programs and Safety Perspectives
Photovoltaics in Europe - Recent Developments  p. 511
Sunshine Project-Outlook and Present State  p. 520
The Photovoltaics Program at Sandia National Laboratories  p. 523
EPRI Photovoltaics Activities: Technology Advancement and Applications Development  p. 529
An Update on Environmental, Health, and Safety Issues of Interest to the Photovoltaic Industry  p. 535
An Overview of Safety Assessment, Regulation, and Control of Hazardous Material Use at NREL  p. 549
Author Index  p. 557
