Preface

Overview of Quantum Well Infrared Detectors p. 1

Infared LEDs Based on Er Doping of III-V Nitride Semiconductors p. 10

InP-Based HBTs for Optical Signal Detection p. 19

Enhanced Electroluminescence from Single-Layer Polymer Light-Emitting Devices p. 29

Optical Properties of Quantum Wells with Embedded \([\text{delta}]\)-Strained Layers p. 51

Optical Coatings for Improved Semiconductor Diode Laser Performance p. 56

Room Temperature Single Electron Transistor Made by STM/AFM Nano-Oxidation Process p. 68

Growth of GaN Based Devices by Production Scale MOCVD p. 78

Ion Beam and Anodic Oxide Induced Intermixing of Quantum Well Heterostructures for Optoelectronic Devices p. 87

MgCdTe Far Infrared Photodiodes p. 97

Evaluation of Erbium Doped III-Nitride Semiconductors for Optoelectronic Applications p. 110

Edge and Surface Emitting Distributed Feedback Lasers for Optical Sensor Systems p. 119

Grating-Coupled Surface-Emitters with Built-In Beam Control p. 136

Red Emissions of Zn Diffused Mg:GaN Grown by Metal Organic Chemical Vapor Deposition p. 154

MOCVD Growth and Laser Applications of In(Ga)As/GaAs Quantum Dots p. 164

Growth of GaInNAs by Metalorganic Chemical Vapor Deposition Using Dimethylhydrazine p. 188

GaInNAs/GaAs Multiple Quantum Wells at 1.3 \([\mu]\)m Wavelength Grown by Gas-Source Molecular Beam Epitaxy p. 196

Vertical Cavity Surface Emitting Lasers Emitting Near 1.5 \([\mu]\)m with Sb-Based Reflectors p. 203

Nanometer Structures for Optics p. 210

Characterization of InP/InGaAs Avalanche Photodiodes for Optical Fiber Telecommunication p. 249

Laser Diode Degradation: Important Understanding for Material and Structural Improvements p. 265

Ion Implanted GaAs for Ultrafast Optoelectronic Applications p. 279

Non-Alloyed Ohmic Contacts for 850 nm Laser Structures for Improved Array Yield p. 289

Time Domain Modeling Of Temperature Dependent Characteristics Of InP/InGaAs Avalanche Photodiodes Based on a Simplified Approach p. 293

U.V. Lasing of Excitons in a ZnO Thin Film at Room Temperature p. 305

In-Situ Reflectance and Virtual Interface Analysis for Compound Semiconductor Process Control p. 311

In-Situ Monitoring and Control during Epitaxial Growth p. 320

Modulation Spectroscopy Techniques For Characterization of Device-Processing-Related Issues in GaAs p. 333

Preparation and Characterization of Hg\(\text{[subscript x]}\)Mn\(\text{[subscript 1-x]}\)Se Thin Films Hydrogen Related Defects In InP p. 351

Investigation of the Initial Stage of Heteroepitaxy of GaP on Silicon p. 359
