SOFC Status

U. S. DOE Office of Fossil Energy’s Solid Oxide Fuel Cell Programs p. 3

Status of National Project for SOFC Development in Japan p. 9

The Revolution Through Evolution: Delphi Solid Oxide Fuel Cell for APU and Hydrogen Reformation p. 16

Solid Oxide Fuel Cell Development at PNNL p. 31

SOFC Stacks and Systems

Solid Oxide Fuel Cell Systems for Power Generation Applications p. 43

Design and Manufacture of CFCL’s Modular and Thermally Cyclable Stack Technology p. 48

Development of MOLB Type SOFC p. 53

Following the Critical Path to Commercialization: An Update on Global Thermoelectric’s SOFC Technology and Product Development p. 60

Development of Tubular Type SOFC Module p. 70

Scale Up of a Multi-Functional Solid Oxide Fuel Cell to Multi-Tens of Kilowatt Level (MF-SOFC) p. 78

Development of a Solid Oxide Fuel Cell Stack by Delphi and Battelle p. 88

Recent Results of Stack Development at Forschungszentrum Julich p. 98

Status of the SOFC Development at Haldor Topsoe/Riso p. 105

Development of Intermediate-Temperature SOFC Module Using Doped Lanthanum Gallate p. 113

Development of Anode-Supported SOFC with Metallic Interconnectors p. 119

Portable SOFC Generator with Innovative SPIROCELLS p. 127

Micro Solid Oxide Fuel Cell p. 135

Electrolyte Materials, Processing and Performance

Ion Conducting Ceramic Electrolytes: A Century of Progress p. 141

Nanomaterials for SOFC Electrolytes and Anodes on the Base of Zirconia p. 153

Dopant Segregation in Nanometric TZP Ceramics p. 160

Electrical Properties of YSZ Thin Films Deposited on Nanoporous Substrates p. 169

Influence of Oxygen Vacancies and 26 D-Impurity on Electronic and Transport Properties of Zirconia p. 181

Influence of Powders on Ionic Conductivity of Polycrystalline Zirconias p. 187

Long Term Stability of Yttria and Scandia Doped Zirconia Electrolytes p. 196

Ageing of Solid Oxide Fuel Cells Based on Zirconia or Other Oxide Electrolytes p. 200

Electrolytic Damage in Zirconia Electrolytes p. 209

Lanthanide Diffusion in Calcia Stabilized Zirconia: Experimental and Theoretical Study p. 214

Characterization of Cathode Supported Thin Film Electrolytes p. 222

Modeling of Binder Burnout and Sintering of Solid Oxide Electrolyte Tapes by Thermokinetic Analysis p. 229

Densification of SOFC Yttria-Stabilized Zirconia Electrolytes Through Addition of Sintering Additives p. 238

Process and Characterization of YSZ Thick-Films Deposited by Electrophoretic Deposition for Intermediate-Temperature SOFC p. 246

Processing and Properties of Thin-Film Ceria Based SOFC p. 253
Oxygen Partial Pressure Dependence of Creep for Yttria-Doped Ceria Ceramics p. 261
Microstructural and Electrical Properties of Gadolinium Doped Ceria Thin Films Prepared by Atomic Layer Deposition (ALD) p. 267
Structural Analysis of Ce[subscript 1-x]M[subscript x]O[subscript 2-0.5x- delta] (M = Gd, Sm, Y) by High Temperature XRD Under Various Oxygen Partial Pressures p. 275
Phase Transformation from Cubic to Rhombohedral in Doped Bi[subscript 2]O[subscript 3]-CaO System p. 282
Stable High Conductivity Bilayered Electrolytes for Low Temperature Solid Oxide Fuel Cells p. 289
Lanthanum Gallate Electrolyte for Intermediate Temperature Operation p. 299
Cation Self and Impurity Diffusion in Poly-Crystalline La[subscript 0.9]Sr[subscript 0.1]Ga[subscript 0.9]Mg[subscript 0.1]O[subscript 2.9] p. 304
Dependence of Activation Energy on Temperature and Structure in Lanthanum Gallates p. 315
Plasma Sprayed LSGM Electrolyte for Intermediate Temperature Solid Oxide Fuel Cells p. 330
Charge Carrier Maps for (La[subscript 0.9]Sr[subscript 0.1])M[subscript III]O[subscript 3- delta] (M[subscript III] = Sc and In) Perovskites and (Ce[subscript 0.8]Sm[subscript 0.2])O[subscript 2- delta] Fluorite p. 349
Electrical Conductivity Studies of Ti-Substituted Pr[subscript 0.45]La[subscript 0.55]O[subscript 2.85] and Fe-Substituted SrSnO[subscript 3] p. 359
Elaboration and Ionic Conduction of Apatite-Type Rare Earth Oxides p. 372
Structure and Conductivity of a Yb-Doped SrCeO[subscript 3]-BaZrO[subscript 3] Solid Solution p. 379
Cathode Materials, Processing and Performance
Low Cost (La, Sr)MnO[subscript 3] Cathode Material with Excellent Electrochemical Properties p. 391
Improvement of LSM Cathode for High Power Density SOFCs p. 400
Synthesis, Structure and Electrophysical Properties of Cation-Deficient Lanthanum-Calcium Manganites p. 409
Development of Cathode Materials by Plasma Process at Room Temperature p. 414
Fabrication of High Performance (La, Sr)MnO[subscript 3] Cathodes by Ion Impregnation p. 422
Identification of Gas-Diffusion Process in a Thick and Porous Cathode Substrate of SWPC Tubular SOFC Using AC Impedance Method p. 430
Development of LSM/YSZ Composite Electrodes for Thin Film Solid Oxide Fuel Cells p. 440
Low Temperature Composite Cathodes for SOFC Applications p. 451
In-Situ Measurement of Oxygen Potential Around (La, Sr)MnO[subscript 3]/YSZ Interface p. 470
Oxygen Reactions at LaSrMnO$_3$/Yttria-Stabilized Zirconia (LSM/YSZ) Interfaces

Electrochemical Impedance Spectroscopy Studies of Perovskite/YSZ Ceramic Films

Use of an "Open" Triple-Phase Boundary to Demonstrate Where Chromium Contaminants Initially Deposit at the LSM-YSZ Interface

Mixed Conducting Porous SOFC Cathodes: Current Distributions and Polarization Resistances

Nonlinear Harmonic Response of Mixed-Conducting SOFC Cathodes

Microstructural and Electrochemical Characterisation of LSFC-Based Cathodes for Anode-Supported Solid Oxide Fuel Cells

Comparison Between LSCF-CGO and GSC-CGO Composite Cathodes on a CGO Electrolyte for IT-SOFC

Elaboration of Ruddlesden-Popper Thin Film via a Sol-Gel Process for SOFC Cathode Materials

Evaluation of La$_2$Ni$_{1-x}$Co$_x$O$_{4+\delta}$ as a SOFC Cathode Material

Oxygen Transport and Electrochemical Activity of La$_2$Ni$_{1-x}$Co$_x$O$_{4-\delta}$-Based Cathode Materials

Application of LaNi(Fe)O$_{3+\delta}$ as Air Electrode of Solid Oxide Fuel Cells

Electrochemical Characterisation of a La$_2$Ni$_{1-x}$Co$_x$O$_{4+\delta}$Sr$_{0.2}$Fe$_{0.8}$O$_{3-\delta}$ Cathode for IT-SOFC

Electrode Properties of La$_2$Ni$_{1-x}$Co$_x$O$_{4-\delta}$Sr$_{0.2}$Cu$_{0.8}$O$_{2.5-\delta}$ As New Cathode Materials for Intermediate Temperature SOFCs

Effects of Water on Cathodic Performance of Ba$_{0.6}$La$_{0.4}$CoO$_{3-\delta}$ on the Cell Using LaGaO$_3$-Based Oxide for Electrolyte

Precious Metal Thin-Films for SOFC Application

Noble Metals in SOFC Cathodes: Processing and Electrochemical Performance

Improved Solid Oxide Fuel Cell Performance with Sputtered Pt Catalyst

Comparative Investigation of Polarization Mechanism of Sputter Deposited Cermet Cathode Interlayers by Impedance-Spectra Time Relaxation Transform Technique

Anode Materials, Processing and Performance

New Chemical Routes for Preparation of Ultrafine NiO-YSZ Powders for SOFC Anode Applications

Effect of Anode Porosity and Pore Size on Electrochemical Performance

Performance of YSZ-Supported Anode for SOFC Substrates

Reduction and Re-Oxidation Kinetics of Nickel-Based Solid Oxide Fuel Cell Anodes

Characterization of Anode/Electrolyte Interface for Advanced Anode Structures

H$_2$-H$_2$O-Ni-YSZ Electrode Performance and Segregation to the Interface

Solid-Solutioning Effect of the Ni-Based Cermet on the Electrochemical Oxidation of Methane

Effect of Additive to Ni-YSZ Cermet on Reforming CH$_4$ and Electrochemical Activity for SOFC

In Situ Observation of Deposited Carbon on Anode for Solid Oxide Fuel Cells

Characteristics of Anodic Polarization of Solid Oxide Fuel Cells Under Pressurized Conditions
