Some steps on the molten salt route

Development of nonflammable lithium secondary battery with ambient temperature molten salt electrolyte: performance of positive electrode

The role of additives in the electroreduction of sodium ions in chloroaluminate-based ionic liquids

A low viscosity ionic liquid electrolyte for dye sensitized solar cells with \[\text{greater than or equal to}]7.4\% efficiencies

Room temperature molten fluorohydrogenates for electrochemical systems

Bronsted acid-base ionic liquids based on imidazole and pyrazole as proton conducting non-aqueous electrolytes

Oxygen reduction reaction on Pt electrode in mixture of bronsted acid and room temperature molten salts at medium temperature

Zwitterionic liquid/acid mixtures as anhydrous proton conducting systems

Preparation and characterization of ionic liquid copolymers for lithium ion conduction

Room temperature ionic liquids containing ionized solvent molecule as an in-volatile additive for a lithium battery electrolyte

Network and cluster-like structures in ScCl\(_3\)-CsCl melts

A thermodynamic database for AlCl\(_3\)-based Molten salt systems

NMR contribution to the structural study of cryolitic melts: study of NaF-AlF\(_3\)-Al system

The characterisation of molecular cesium bromate by matrix isolation I.R. spectroscopy

Short range structure of molten CsCl - NaCl mixtures obtained by XAFS analysis

Domains with the reaction type change in the 3-phase regions of the ternary salt systems

Mass transport in molten alkali carbonate mixtures

An x-ray absorption spectroscopy study of yttrium and zirconium complexes in molten lithium chloride

Oxygen ion oxidation process on a platinum electrode in LiCl-Li\(_2\)O at 650[degrees]C

Behavior of TiB\(_2\)-coating on graphitized carbon cathodes during laboratory aluminum electrolysis

Vanadium-sulfate-pyrosulfate electrolytes for electrochemical removal of sulfur oxide

Anomalous properties of molten carbonates coexisting with porous inorganic powder

Higher degree decomposition of harmful organic compounds containing chloride by using molten salts

Interaction of MCI molecules with environment in cluster model of alkali metal chloride melts

Corrosion protection of nickel equipment in chloride-fluoroniobate melts

Electrochemical behavior of aluminum phosphate in cryolite-alumina melts

High-energy synchrotron x-ray diffraction study of high-temperature levitated liquids

Cathodic behavior of carbon in cryolite-alumina melts

Coordination state of vanadium in chloride melts: an electronic absorption spectroscopy study
Electro-chemical evaluation of molten lithium niobate

Electrical evaluations of molten lithium borates in microgravity

Vapor complexation in the CrCl\textsubscript{3}-ACl (A= Li, Cs) system

Glass formation and phase transitions of NbF\textsubscript{5} and TaF\textsubscript{5} from 77 to 600 K

Synthesis and characterization of new types of ionic liquids

Development of low melting ionic liquid compositions using mixtures of imidazolium and pyrazolium ionic liquids

Preparation and properties of high mass tetraalkylphosphonium ionic liquids

A new strategy toward synthesis of room temperature ionic liquids based on complexation reactions of cations

Novel ionic liquids composed of only heterocycles

New hydrophobic ionic liquids (molten salts) with highly fluorinated anions: synthesis and properties

Novel hydrophobic ionic liquids based on quaternary ammonium and perfluoroalkyltrifluoroborate

Structures and properties of 1-ethyl-3-methylimidazolium salts of fluorocomplex anions

Asymmetric quaternary ammonium ionic liquids and their properties

Stability and thermal decomposition of quaternary and protonated imidazolium nitrate and picrate salts

Structure of ionic liquid-benzene mixtures

An electrostatic interpretation of structure-property relationships in ionic liquids

Revisiting "regular" solutions

Decomposition kinetics of 1-butyl-2,3-dimethylimidazolium tetrafluoroborate and the effects of impurities using TGA

Ionic liquid-lithium salt electrolyte mixtures: phase behavior and electrochemical characteristics

Measurement and thermodynamic analysis of reference electrode potentials in a few fluoride melts containing HF

Potential dependant analysis of 1-butyl-3-methylimidazolium hexafluorophosphate ionic liquid on platinum electrode by sum frequency generation spectroscopy

Electrochemistry of chiral polyaniline in ionic liquids

Electrochemical investigations of lewis acid interactions with ketones in a room-temperature ionic liquid

Electrochemical behavior of iron and several iron complexes in hydrophobic room temperature molten salts

Electrochemical behavior of oxygen / superoxide ion couple in 1-butyl-1-methylpyrroloidinium bis(trifluoromethanesulfone)imide room-temperature molten salt

Water content of hydrophobic ammonium imide-type room temperature ionic liquid

Physicochemical properties of room-temperature molten salts of symmetrical tetraalkyl ammonium diisooctylsulfosuccinates

Novel hydrophobic molten salts based on tetraakis[3,5-bis(trifluoromethyl)phenyl] borate anion for electrochemistry of the molten-salt water interface
Anodic behavior of each component in a few nickel-metal composites and effect of added metal in composites on electrolytic production of NF$_3$ p. 528

Development of anode for electrolysis of (CH$_3$)$_4$NF·4HF room-temperature molten fluoride p. 537

Imidazolium ionic liquids: C2 substitution and acidity p. 548

Organoborates as potential anions for novel ionic liquids p. 556

Ionic liquid-promoted regioselective catalysts by palladium p. 564

Deep desulfurization of oil refinery streams by extraction with ionic liquids p. 572

Ionic liquids as a solvent for bioelectrocatalysis using electrode-immobilized cytochrome C p. 583

Preparation of homogeneously dispersed trialkyl imidazolium compatibilized multi-walled carbon nanotube/polystyrene nanocomposites via melt extrusion p. 600

The use of 1,2-dimethyl-3-(benzyl ethyl iso-butyl POSS)imidazolium chloride as an organic modifier in polymer-layered silicate nanocomposites p. 607

Regeneration of silk fibroin with ionic liquids p. 617

Use of ionic liquids for membrane-based and electrochemically-driven gas separations p. 625

Supported ionic liquid-phase (SILP) catalysts in continuous flow processes p. 630

Electrochemical doping/dedoping behaviors of polythiophene derivatives in the ionic liquids p. 639

Preparation and characteristics of thermally stable polymer-in-zwitterionic liquid p. 646

Enrichment of rare earth and alkaline earth elements by countercurrent electromigration in room temperature molten salts p. 656

Effect of rare earth addition to molten carbonate on the solubility of NiO p. 666

Direct electrodeposition of Mg including La in molten salt p. 679

Thermodynamic properties of the melt of the NaI-CeI$_3$ system p. 686

Cathodic behavior of Ce(III) ion in NaCl-2CsCl melt p. 694

Thermodynamics properties of plutonium in NaCl-KCl and CaCl$_2$[subscript 2] at 1073K and in liquid gallium p. 700

Solubility of rare earth oxides in the NaCl-2CsCl melt p. 713

In Situ high temperature NMR and EXAFS spectroscopy in molten lanthanide fluorides: application to nuclear wastes recycling p. 720

The reprocessing of nuclear waste using molten salts: selective precipitation using phosphate and solving problems of speciation p. 729

Assessment of pyrochemical methods for the molten salt reactor fuel clean-up p. 738

Trials of plutonium electrorefining in calcium chloride p. 749

Kinetics of electrode processes in LiCl-KCl melt p. 761

Partitioning of transuranic metal ions to ionic liquids containing the ionizable complexant cyanex-272 p. 779

Metal electrodeposition and electron transfer studies of uranium compounds in room temperature ionic liquids p. 790

Radiation chemistry of ionic liquids p. 802

An EXAFS spectroscopy study of speciation of uranium and some fission product elements in chloride melts p. 814
Physicochemical properties of lanthanide(III) iodide species formed in and above molten salts

Investigation of deposited materials on carbon electrodes in molten salts by in-situ x-ray diffraction measurements

Some recent results on the EuBr[subscript 2]-MBr binary systems (M= Li, Na, K, Rb)

Investigation of behavior of zirconium-rare-earth metal fluoride mixture in molten fluoride

Electrodeposition of in-Sn alloys in EMI-BF[subscript 4]-Cl molten salts

Electrodeposition of Al-Mo-X (X : Mn or Ni) ternary alloys from lewis acidic AlCl[subscript 3]-EtMeImCl molten salts

Electrodeposition of nanoscale metals and semiconductors in ionic liquids

In-Situ stress measurements during aluminum deposition from AlCl[subscript 3]-EtMeImCl

A new route to precious metal recovery and subsequent electrodeposition using ionic liquids

Co-deposition of Al-Cr and Al-Ni alloys using potential pulse technique in molten salt

Order/disorder in electrodeposited aluminum-titanium alloys

Formation of a porous nickel electrode in zinc chloride-alkali chloride melts

Electrodeposition of refractory metals in medium-temperature molten salts

Electrochemical formation of Tb-Fe alloys in molten chlorides

Electrochemical deposition of metal nitride films in a molten chloride system

Modeling of deposition processes from molten salts

Electrochemical reduction of TiO[subscript x] at room temperature in ionic liquids

Si production by direct electrolytic reduction of solid SiO[subscript 2] in molten CaCl[subscript 2]

Preparation of hydrogen storage alloys from the oxides by calcium reduction in molten CaCl[subscript 2]

Electrodeposition of palladium-containing alloys in a lewis basic 1-ethyl-3-methylimidazolium chloride/tetrafluoroborate ionic liquid

Electrochemical study of sodium tungstate-sodium pyrosulfate melt and tungsten coatings electrodeposited from them

Electrochemical behavior of niobium and aluminum in chloride melts

Electrochemical reduction of titanium dioxide thin film in LiCl-KCl-CaCl2 eutectic melt

Formation of broccoli-like morphology of Ta powder

Ceramic membrane in direct reduction of TiO[subscript 2] in molten CaCl[subscript 2]

Effect of sulphur and phosphorus microimpurities in melts on the features of sodium-reduced tantalum powers
