Introduction

Keynote Remarks: Challenges and Opportunities in Abdominal Aortic Aneurysms Research

Epidemiology and Initiatives to Prevent Death from Rupture

Epidemiology of Aortic Aneurysm Repair in the United States from 1993 to 2003

A Biomechanics-Based Rupture Potential Index for Abdominal Aortic Aneurysm Risk Assessment: Demonstrative Application

Long-term Relationship of Wall Stress to the Natural History of AAAs (Finite Element Analysis and Other Methods)

A Summary of the Contributions of the VA Cooperative Studies on Abdominal Aortic Aneurysms

Pharmacological Approaches to Prevent AAA Enlargement and Rupture

Should Usual Criteria for Intervention in Abdominal Aortic Aneurysms be "Downsized" Considering Reported Risk-Reduction With Endovascular Repair?

Animal Models: Pathophysiology and Biomechanical Aspects

Pathophysiology of Abdominal Aortic Aneurysms: Insights from the Elastase-Induced Model in Mice with Different Genetic Backgrounds

Regression of Abdominal Aortic Aneurysm by Inhibition of c-Jun N-Terminal Kinase in Mice

Role of the Renin-Angiotensin System in the Development of Abdominal Aortic Aneurysms in Animals and Humans

AAA Disease: Mechanism, Stratification and Treatment

Refinements in Mathematical Models to Predict Aneurysm Growth and Rupture

Enzymology - Another Approach to Interventional Pharmacology

AAA - A complex Multifactorial Disease: Interactions of Polymorphisms of Inflammatory Genes, Features of Autoimmunity, and Current Status of MMPs

The Intraluminal Thrombus as a Source of Proteolytic Activity

Activators of Plasminogen and the Progression of Small Abdominal Aortic Aneurysms

Is There a Role for Macrophage 5-Lipoxygenase Pathway in Aortic Aneurysm Development in Apolipoprotein E Deficient Mice?

Do Cathepsins Play a Role in AAA Pathogenesis?

MMP-2: The Forgotten Enzyme in Aneurysm Pathogenesis

Biological Aspects of Endovascular Devices to Repair AAA

Current Status of Endovascular Repair of Infrarenal Abdominal Aortic Aneurysms in the Context of 50 Years of Conventional Repair

Animal Models of Endovascular AAA Repair

Aortic Aneurysm, Thoracoabdominal Aneurysm, Juxtarenal Aneurysm, Fenestrated Endografts, Branched Endografts, Endovascular Aneurysm Repair

Vibrometry: A Novel Non-invasive Application of Ultrasonographic Physics to Estimate Wall Stress in Native Aneurysms

Combining Open and Endovascular Approaches to Complex Aneurysms

Engineering Improvements in Endovascular Devices: Design and Validation

Genetics and Immunology in AAA

The Abdominal Aortic Aneurysm (AAA) is a Specific Antigen-driven T-cell Disease

Genes predisposing to rapid aneurysm growth
Genetic Basis of Thoracic Aortic Aneurysms and Dissections: Potential Relevance to Abdominal Aortic Aneurysms

Structural and Functional Genetic Disorders of the Great Vessels and Outflow Tracts

Genome-wide approach to finding AAA susceptibility genes in humans

The Candidate Gene Approach to Susceptibility for Abdominal Aortic Aneurysm (AAA): TIMP1, HLA-DR-15, Ferritin Light Chain, and Collagen XI-ALPHA-1
