New Biology of Cellular Receptors for Neuromediators: Regulation of Expression, Signal Transduction, and Mechanisms of Cross-talk

G Protein-coupled Receptor Structures, Molecular Associations, and Modes of Regulation

Discovery of PACAP-regulated Genes through Microarray Analyses in Cell Culture and in Vivo

Monitoring the State of Cholecystokinin Receptor Oligomerization after Ligand Binding Using Decay of Time-resolved Fluorescence Anisotropy

Role of Pituitary Adenylate Cyclase Activating Polypeptide in the Pancreatic Endocrine System

PTHRP Regulates Gli Transcriptional Activation: Lessons Learned from Bone Development and Cartilage Neoplasia

Molecular Mechanisms of TRPV4-Mediated (neural) Signaling

The Sall2 Transcription Is a Novel p75NTR Binding Protein That Promotes the Development and Function of Neurons

Neuromediator Participation in Host Defense, Immunity, and Inflammation

Diverse Mechanisms and Consequences of Immunoadoption of Neuromediator Systems

Substance P in Stress and Anxiety: NK1 Receptor Antagonism Interacts with Key Brain Areas of the Stress Circuitry

Mast Cells Stimulate Activated T Cells: Implications for Multiple Sclerosis

VIP-mediated Th17 Differentiation: An Expanding Spectrum of VIP Effects in Immunity and Autoimmunity

Neurokinin-1 Receptor Expression and Function Macrophages and Brain- Role in HIV Neuropathogenesis - (Perspective)

Neuromediators in Diseases

Glutamate and Neurotrophic Factors in Neuronal Plasticity and Disease

Diversity of Neuropathogenic Mechanisms and Implications of Neuromediation of Diseases

Inhibitory Effects of a Neurokinin-1 Receptor Antagonist on Postoperative Peritoneal Adhesion Formation

Neuropeptides, Mesenteric Fat, and Intestinal Inflammation

Gastrin-Releasing Peptide, Immune Responses, and Lung Disease

The VIP Gene Is a Key Modulator of Pulmonary Vascular Remodeling and Inflammation

Neuromediators in Prenatal Development and Stress

Prenatal Alcohol Exposure Increases Vulnerability to Stress and Anxiety-like Disorders in Adulthood

Role of Various Neurotransmitters in Mediating the Long-term Endocrine Consequences of Prenatal Alcohol Exposure

Perinatal Maternal Fat Intake Affects Metabolism and Hippocampal Function in the Offspring: A Potential Role for Leptin

Diagnostic and Therapeutic Strategies for Neuromediators in Diseases

Informed Development of Drugs Acting at Family B G Protein-coupled Receptors
