Assessment of personal care and decorative cosmetics  p. 1
Review of skin structure and function with special focus on stratum corneum lipid  p. 3
Color measurement techniques  p. 45
Noninvasive techniques to measure cutaneous effects of skin care products  p. 57
Using consumer research in the development and restaging of personal care products  p. 95
Fundamentals of personal care and decorative cosmetics  p. 107
Pigment dispersions  p. 109
Contribution of surfactants to personal care products  p. 121
Cleaner/conditioner systems: surface chemical aspects  p. 137
Emulsions and their behavior  p. 149
Role of surfactant micelle charge in protein denaturation and surfactant-induced skin irritation  p. 177
Skin lipid structure: insights into hydrophobic and hydrophilic driving forces for self-assembly using IR spectroscopy  p. 189
Cosmetoceuticals in modified microemulsions  p. 211
Surfactants in finished products  p. 235
Surfactants in lip products  p. 237
Surfactants in liquid foundation  p. 243
Surfactants for nail care  p. 251
Sunscreens  p. 277
Specific technologies for pigmented products  p. 323
Formulating with dihydroxyacetone (DHA)  p. 325
Hydrocarbons in pigmented products  p. 341
Meadowestolide and meadowlactone: unique materials for skin care and pigmented products  p. 357
Polymers in pigmented products  p. 371
Alkyl dimethicone in pigmented products  p. 389
Esters in pigmented products  p. 405
Hydrolysis-resistant esters  p. 447
Branched esters as oil phases in pigmented products  p. 455
