Foreword
Preface
Acknowledgments
Introduction
Where Near-Field Measurements Are Useful
Information Provided by Near-Field Maps
Near-Field Diagnostics
Measurements May Perturb the Near-Fields
Modulated Scatterer Approach
Basic Requirement
Near-to-Far-Field Transformations
Two Sets of Applications of Modulated Scatterers
Near-Field Basics
Some Definitions for Free-Space Radiation of Antennas
Extension to Small Antennas and Circuits
About the Near Field Within Inhomogeneous Structures
Remark
Various Kinds of Measurements
Standard Circuit Measurements
Standard Antenna Measurements
Direct Near-Field Measurement
Perturbation Techniques for Indirect Measurements
Cavity Perturbation
Perturbation Measurement of SAR in Phantoms
Perturbation by a Scatterer
Measurement of the Far-Field Pattern of an Antenna
Modulated Scatterer Technique
Spinning Dipole
Electrically Modulated Scatterer
Historical Landmarks
Comparison of Direct and Indirect Measurements
Tagging Systems and Transponders
Biologically Modulated Scatterers
About Computer Simulation And Measurement
Field Maps
Microstrip Directional Coupler
Printed Patch Antenna
Measurements of Large Antennas
EMC
Dosimetry
Microwave Tomography
Patch Antennas with Parasitic Elements p. 131
PIFA Dual Band Antennas p. 132
Multifrequency Multiband Antennas p. 132
Near-Field Diffraction by Two Slits p. 133
Printed Transmission Lines And Circuits p. 135
Wilkinson Power Dividers p. 135
Branch Line Hybrid Couplers p. 135
Rat Race Hybrid Rings p. 136
Meander Transmission Lines p. 136
Microstrip Filters with Holes in the Ground Plane p. 138
MMICs p. 141
Radiating Probe for Microstrip Integrated Amplifier p. 141
Currents on a Whisker Mixer for Radiometry p. 142
Guiding Structures p. 144
Detection of Electric-Field Lines in a Liquid Microstrip p. 144
Fields in a Rectangular Waveguide p. 146
EMC p. 147
Industrial Applications p. 148
Microwave and RF Heating p. 148
Industrial Microwave and RF Heating p. 148
Modulated Scatterer Moisture Sensors p. 149
Near-Field Measurement in High-Power Systems p. 149
Medical Applications And Dosimetry p. 152
Diathermy and Hyperthermia p. 152
Portable Phones p. 152
Measurement of the SAR p. 153
Radiometric Measurements p. 154
SAR Measurement of Portable Phones p. 155
Hyperthermia Applicator and Probe Characterization p. 157
References p. 157
Probe Arrays
Introduction p. 161
Reduction of the Duration of Measurements p. 161
Reduction of the Amount of Measured Data p. 162
Speeding Up the Measurement Rate p. 162
Measurement Strategies p. 163
Specific Features Of Probe Arrays p. 164
Choice of Architectures p. 164
Preconceptions p. 166
Probe Array Arrangements p. 167
Spatial Sampling Requirements p. 169
